LEADERSHIP ETHICS
Three-Volume Set
Edited by Joanne Ciulla University of Richmond, Mary Uhl-Biel University of Nebraska, Lincoln and Patricia J. Werhane DePaul University

The field of leadership ethics and research therein has grown and evolved gradually over the course of the past few decades. This timely set arrives at an important moment in the subject's history. In a relatively new field, such a collection offers scholars more than articles on a topic; it also serves to outline the parameters of the field. Carefully structured over three volumes, the material runs through an understanding of the key philosophical and practical questions in leadership ethics along with a wide range of literature - from wide-ranging disciplines including philosophy, business and political science, to name a few.

Volume One: Theoretical Aspects of Leadership Ethics
Volume Two: Behavioral and Psychological Aspects of Leadership Ethics
Volume Three: Leadership Ethics, Contexts and Narratives

ENVIRONMENTAL LEADERSHIP
A Reference Handbook
Two-Volume Set
Edited by Deborah Rigling Gallagher Duke University, Nicholas School of the Environment

Part of the SAGE Reference Series on Leadership, this two-volume set tackles issues relevant to leadership in the realm of the environment and sustainability.

Volume One considers such topics as: environmental thought leadership (environmental ethics, conservation, eco-feminism, collective action and the commons and what we have termed contrarians); political leadership (the environmental challenge context for the expression of political leadership); governmental leadership (government initiatives to provide leadership in environmental management); private-sector leadership (private-sector leadership in environmental management as individuals, through organizations or through specific initiatives); non-profit leadership (non-profit-sector leadership in topical areas such as conservation, advocacy, philanthropy and economic development); signaling events (events and their impact on the exercise of environmental leadership through individual, political and organizational actions); grassroots activism (profiles of individual environmental activists and considerations of how environmental leadership is exercised through activism); environmental leadership in journalism, literature and the arts; and environmental leadership in education.

Volume Two covers topics that confront the particular intractable characteristics of environmental problem-solving. Individual chapters focus on how environmental leadership actions or initiatives may be applied to address specific problems in context, offering both analyses and recommendations.

Encyclopedia of Management Theory

Two-Volume Set
Edited by Eric H. Kessler
Pace University

In discussing a management topic, scholars, educators, practitioners, and the media often toss out the name of a theorist (Taylor, Simon, Weber) or make a sideways reference to a particular theory (bureaucracy, total quality management, groupthink) and move on, as if assuming their audience possesses the necessary background to appreciate and integrate the reference. This is often far from the case. Individuals are frequently forced to seek out a hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea, while reference librarians often find it difficult to guide readers to an informed, one-stop resource with just the basics - the 'who, what, where, how, when, and why'.

This work is designed to serve as a core reference for anyone interested in the essentials of contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses to thoughtfully apply them. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools and figures.

Coaching and mentoring activities are fast growing and developing across the world. In the UK, such schemes are widespread through all types of organization - public, private, large, small and not-for-profit - and there is no doubt that coaching activity is on the rise in the whole of Europe and across the globe. Despite this growing significance, debates over what the universally agreed definitions for either coaching or mentoring are not being had within the academic community, and in essence this means that authors, practitioners, clients and researchers may not be discussing the same social phenomena and may be attributing different meanings to both coaching and mentoring. This new, six-volume major work therefore plays a valuable role in building a map of the topic by bringing together the most influential papers on the subject in a single resource. The volumes are organized thematically and contextualized by an introductory chapter written by editor, Bob Garvey.
TRUST AND SOCIAL CAPITAL IN ORGANIZATIONS

Four-Volume Set
Edited by Ana Cristina Costa and Neil Anderson both at Brunel University (UK)

Trust and social capital have gained significant importance over the last 40 years as both areas of research and professional practice, becoming key concepts in the analysis of relationships in organizations and critical to organizations’ effectiveness. As research has grown in these areas, literature on trust and social capital has become highly disparate: international in orientation; multilevel in focus, ranging from the individual to the workgroup, within and between organizations; and dual-focused on fundamental research issues and best practice.

Volume One: Trust between People: Interpersonal and Team Level Trust
Volume Two: Trust in Institutions: Organizational and Inter-Organizational Level Trust
Volume Three: Social Capital: Conceptual Issues and Levels of Analysis
Volume Four: Social Capital: Organizational Advantage and Inter-Organizational Networks

CORPORATE ENVIRONMENTALISM AND THE GREENING OF ORGANIZATIONS

Six-Volume Set
Edited by John M. Jermier University of South Florida

As awareness of global environmental problems spreads, the natural environment has become an area of high strategic significance for organizational managers and other policy makers. Since scholars turned their attention to the natural environment in the early 1990s, research on corporate environmentalism and organizational greening has become a vibrant field.

This major work shows both the variety of rigorous methods being employed in this area as well as the limitations in current research and the need to develop more innovative methods. Providing a general framework for thinking about corporate environmentalism and the greening of organizations, this collection serves as a foundational resource for those interested in developing new theories, including researchers and students, as well as environmental policy experts in business and government around the world.

PUBLIC AFFAIRS MANAGEMENT

Four-Volume Set
Edited by Phil Harris University of Chester (UK)

This four-volume set looks at the evolution of ideas around public affairs, and how our understanding and conceptualization of the topic has changed over the years.

Through thematic exploration of the key conceptual and empirical articles to have come out of the field, public affairs, is here, understood as a discipline and professional practice, taking in: the organization and structuring of the public affairs function; the characteristics and factors influencing the effectiveness of public affairs; the profile, characteristics and competencies of public affairs practitioners; the value of public affairs; what is understood about ‘best practice’ in the public affairs context and its limitations; and the international perspective of public affairs.

Skillfully edited and introduced by a leading voice in the field, this major work shines a spotlight on a subject that is increasingly gaining significance across disciplines on the global stage.

THE SAGE HANDBOOK OF RISK COMMUNICATION
Edited by Hyunyi Cho and Torsten Reimer both at Purdue University and Katherine A. McComas Cornell University

This handbook provides a comprehensive, state-of-the-art overview of the field of risk communication. Leading experts summarize theory, current research, and practice in a range of disciplines including decision science, psychology, sociology, communication and public health, while explicating effective communication approaches to addressing risk issues in diverse applied contexts including health, environment, science, technology and crisis.

The book offers practical insights alongside a foundational understanding of the psychological and sociological bases of risk perceptions that are necessary for effective risk communication. It also considers risk communication in all contexts and applications—interpersonal, group and societal—offering a wider view of risk communication than volumes emphasizing crisis communication exclusively.

NEW! THE SAGE HANDBOOK OF ORGANIZATIONAL COMMUNICATION
Advances in Theory, Research, and Methods
Third Edition
Edited by Linda L. Putnam University of California, Santa Barbara and Dennis K. Mumbly The University of North Carolina at Chapel Hill

Organizational communication as a discipline has grown tremendously over the latter part of the 20th century, but accompanying that growth has been a struggle to establish a clear identity for the field. The ongoing evolution of complex organizations in an equally complex global environment has scholars continuing to define and redefine the focus, the boundaries and the future of the field. The SAGE Handbook of Organizational Communication, completely reconceptualized for this Third Edition, is a landmark volume that weaves together the various threads of this interdisciplinary area of scholarship.

LEADERSHIP DEVELOPMENT AND PRACTICE
Four-Volume Set
Edited by Richard Hall State University of New York, David Grant University of Sydney (AU) and Joseph Raelin Northeastern University

Emerging complexities have arisen regarding leadership, leadership studies and leadership development. It is widely recognized that contemporary conditions demand new styles of organizational leadership. Changing environmental conditions including globalization, climate change, increased market volatility and shifts in the balance of power in the global political economy suggest the need for more creative, interactive and longer-term strategic leadership. In order to address and react to these shifts in understanding, one must go back to the essential questions: what is it that leaders actually do, or should do, and what can leadership achieve?

This major work on leadership development and practice engages these debates and issues by drawing together some of the most important and influential research from the related domains of leadership practice and leadership development.

ENCYCLOPEDIA OF WHITE-COLLAR AND CORPORATE CRIME

Second Edition
Two-Volume Set
Edited by Lawrence M. Salinger
Arkansas State University

Since the first edition of the Encyclopedia of White Collar and Corporate Crime was produced in 2004, the number and severity of these crimes have risen to the level of calamity, so much so that many experts attribute the near-Depression of 2008 to white-collar malefiance, namely crimes of greed and excess by bankers and financial institutions. Whether the perpetrators were prosecuted or not, white-collar and corporate crime came near to collapsing the U.S. economy. In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history (Maddoff), an ecological disaster caused by British Petroleum and its subcontractors (Gulf Oil Spill) and U.S. Defense Department contractors operating like vigilantes in Iraq (Blackwater).

White-collar criminals have been busy, and the Second Edition of this encyclopedia captures what has been going on in the news and behind the scenes with new articles and updates to past articles.

Federal, state, county and municipal police forces all have their own codes of conduct, yet the ethics of being a police officer remain perplexing and are often difficult to apply in dynamic situations. The police misconduct statistics are staggering and indicate that excessive use of force comprises almost a quarter of misconduct cases, with sexual harassment, fraud/theft and false arrest being the next most prevalent factors. The ethical issues and dilemmas in criminal justice also reach deep into the legal professions, the structure and administration of justice in society and the personal characteristics of those in the criminal justice professions.

The Encyclopedia of Criminal Justice Ethics includes A to Z entries by experts in the field that explore the scope of ethical decision making and behaviors within the spheres of criminal justice systems, including policing, corrections, courts, forensic science and policy analysis and research. This two-volume set is available in both print and electronic formats.

Features include:
• Entries are authored and signed by experts in the field and conclude with references and further readings, as well as cross references to related entries that guide readers to the next steps in their research journeys
• A reader’s guide groups related entries by broad topic areas and themes, making it easy for readers to quickly identify related entries
• A chronology highlights the development of the field and places material into historical context; a glossary defines key terms from the fields of law and ethics; and a resource guide provides lists of classic books, academic journals, websites and associations focused on criminal justice ethics
• Reports and statistics from such sources as the FBI, the United Nations, and the International Criminal Court are included in an appendix
• In the electronic version, the reader’s guide, index and cross references combine to provide effective search-and-browse capabilities.

The Encyclopedia of Criminal Justice Ethics provides a general, non-technical yet comprehensive resource for students who wish to understand the complexities of criminal justice ethics.

ENCYCLOPEDIA OF COMMUNITY POLICING AND PROBLEM SOLVING

Edited by Kenneth J. Peak University of Nevada, Reno

Community policing, as a philosophy, supports the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder and fear of crime - as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Originating during police reform efforts of the 1970s, the philosophy of community policing is currently widespread and embraced by many citizens, police administrators, scholars, and local and federal politicians.

THE SOCIAL HISTORY OF CRIME AND PUNISHMENT IN AMERICA

An Encyclopedia

Five-Volume Set

Edited by Wilbur R. Miller State University of New York, Stony Brook

This four-volume work surveys the history and philosophy of crime, punishment and criminal justice institutions in America from colonial times to the present. It covers the whole of the criminal justice system, from crimes, law enforcement and policing, to courts, corrections and human services. Among other things, the encyclopedia: explicates philosophical foundations underpinning the U.S. system of justice; chart-changing patterns in criminal activity and subsequent effects on legal responses; identifies major periods in the development of the U.S. system of criminal justice; and explores evolving debates and conflicts on how best to address issues of crime and punishment. Its signed entries provide the historical context for students to better understand contemporary criminological debates and the contemporary shape of the U.S. system of law and justice.

ENCYCLOPEDIA OF STREET CRIME IN AMERICA

Edited by Jeffrey Ian Ross University of Baltimore

In the United States, street crime has recently hovered near historic lows; hence, the declaration of certain analysts that street-life in America has never been safer. But is it really? Street crime has changed over past decades, especially with the advent of surveillance cameras in public places - the territory of the street criminal - but at the same time, criminals have found ways to adapt.

This work focuses primarily on urban lifestyle and its associated crimes, ranging from burglary to drug peddling to murder to new, more sophisticated forms of street crime and scams. This traditional A-to-Z reference has significant coverage of police and courts and other criminal justice subdisciplines while also featuring thematic articles on the sociology of street crime.

*Booklist Editor’s Choice 2013
The SAGE Library of Educational Thought and Practice major works series encapsulates and disseminates the seminal works in the field of educational science and collects together those articles and essays which have been most influential in shaping and driving the discipline. Each multivolume set presents readers with a collection of both classical and contemporary published works sourced from the foremost publications in the field by an internationally renowned editor or editorial team. Each set includes a full introduction, presenting a rationale for the selection and which contextualizes the major work within the discipline, giving students, researchers and academics insight into the past, present and likely future of that area of research.

**TEACHING AND LEARNING IN HIGHER EDUCATION**

Four-Volume Set

Edited by James E. Groccia and William F. Buskist both at Auburn University

This collection presents the major theoretical, empirical and best practice articles and book chapters on teaching and learning in higher education. The prestigious editors have selected material from multiple perspectives, including cross-cultural, from United States and international educational experts. The work identifies seven interrelated variables that must be investigated to develop a full perspective of college and university teaching and learning:

- teacher
- learner
- learning process
- learning context
- course content
- instructional processes
- learning outcomes.

**SOCIAL THEORY AND EDUCATION RESEARCH**

Four-Volume Set

Edited by Mark Murphy

University of Glasgow (UK)

The main purpose of this collection, via an introductory contextualizing chapter, is to provide a work that is both advanced and accessible, which will offer the education practitioner or researcher a suitable guide to assist their acquisition and application of social theory, and to develop the capacity of postgraduate student teachers to engage with these debates at an advanced level.

**THEORIES OF LEARNING**

Four-Volume Set

Edited by David Scott

University of London (UK)

Editor David Scott presents a comprehensive exploration of the subject of learning, ranging from theories to models of learning, and from relations with curriculum to resulting themes and issues. The work is carefully organized and structured with reference to Jerome Bruner’s model of learning, particularly in relation to Bruner’s distinction between symbol-processing and sociocultural views of learning.

**ENCYCLOPEDIA OF EDUCATIONAL THEORY AND PHILOSOPHY**

Two-Volume Set

Edited by D. C. Phillips

The two-volume Encyclopedia of Educational Theory and Philosophy introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice. Drawing together a team of international scholars, this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, this work offers essays on cutting-edge research and concise, to-the-point definitions of key concepts, ideas, schools, and figures.

THE SAGE HANDBOOK OF INTERNATIONAL HIGHER EDUCATION

Edited by Darla K. Deardorff Duke University, Hans de Wit Universiteit van Amsterdam (NL), John D. Heyl CEA Global Education, Tempe, Arizona and Tony Adams Macquarie University (AU)

The SAGE Handbook of International Higher Education examines the internationalization of higher education from a marginal to a core dimension of higher education worldwide. This mainstreaming of internationalization is a fascinating phenomenon: new concepts, program, providers and methods of delivery are emerging; impressive national and regional scholarship programs have been established; radical reforms have been undertaken to make higher education globally competitive; and mobility of students and scholars has increased around the world. The handbook presents an overview of these developments, in a combination of issues and regional accounts.

Play and learning scholarship has developed considerably over the last decade, as has the recognition of its importance to children’s learning and development. Containing chapters from highly respected researchers whose work has been critical to building knowledge and expertise in the field, this handbook focuses on examining historical, current and future research issues in play and learning scholarship.

The handbook is organized into three sections which consider:
- theoretical and philosophical perspectives on play and learning
- play in pedagogy, curriculum and assessment
- play contexts.

Children spend more time at school than anywhere else except home. Schools can have a major effect on children’s health by providing a healthy physical environment, serving meals and snacks built around sound nutritional guidelines, and teaching about health, as well as modeling and promoting healthy behaviors.

School health-services programs involve not only school nurses and focus not only on nursing practice standards and performance issues, they also include services and classes to teach students the information and skills they need to become health-literate, to maintain and improve their health, to prevent disease and to reduce risky behaviors impacting health.

The Encyclopedia of School Health offers quick access to health and wellness information most relevant to children. Valuable guidance is provided on: developmental stages, acute and chronic illnesses, special education, nutrition, crisis response, prevention and more.

The wider sociopolitical environment within any country provides the forum for the ideological and philosophical debates from which the organization of education is derived. Educational policies therefore reflect the dominant discourses of the time, from which overarching guiding principles are formulated.

In this new four-volume collection, esteemed editors Leslie Bell and Howard Stevenson bring together a wealth of material which discusses these dominant discourses and the strategic directions which emanate from them, looking at areas such as key ideological debates, policy issues, organizational theories and culture, leadership theories and critical perspectives, and managing teaching and learning. The set is carefully organized into four thematic volumes:

MULTIMEDIA ATLAS OF GLOBAL WARMING AND CLIMATOLOGY

Thomas J. Eley, University of Alaska, Fairbanks

Multimedia Atlas of Global Warming and Climatology is an online compendium of 100 maps designed to graphically illustrate for students key concepts in global warming and the study of climate. Map topics were selected from the approximately 700 articles in the Second Edition of the Encyclopedia of Global Warming and Climate Change. Covering such disciplines as environmental studies, atmospheric sciences, meteorology, glaciology, oceanography and paleoclimatology, the map topics range from what the world looked like in the past during various climate ages to predictions of sea level rise due to global warming.

Features:

- Maps are accompanied by clickable icons that deliver the data and statistics making up each map.
- Multimedia elements, including videos and full-color photographs, accompany map themes and presentations.
- A video introduction by the General Editor, Thomas J. Eley of University of Alaska, Fairbanks, introduces the Atlas.
- A Resource Guide to key books, journals, and associations, a Glossary, and easy-to-use search-and-browse features enhance the user experience.

GREEN ATLAS
A Multimedia Reference
Edited by Dustin Mulvaney
University of California, Berkeley

This reference resource, in atlas format, is an online-only compendium of maps and data sets accompanied by multimedia elements designed to illustrate key concepts in green issues and environmentalism graphically and interactively. Topics for the maps presented in this work were selected from articles in the 12-volume SAGE Reference Series on Green Society: Toward a Sustainable Future.

Each map includes links to one or more of the series articles. Maps include interactive components, with clickable icons to deliver the data and statistics that make up each map. Further, multimedia elements (photos, video and audio clips and transcripts) accompany map themes and presentations.

Key features include:

- 100 maps, with 100 supporting data sets, cover such issues as acid rain, carbon emissions, fossil fuels, hydroelectric power, irrigation, landfills, nuclear reactors, power grids, sea level rise, supply chains and waste disposal
- clickable icons allow users to jump from maps to the data sets on which they are based
- sources for data sets include such institutions as the U.S. Department of Energy, Nuclear Regulatory Commission, World Bank, European Union, CIA World Factbook, Greenpeace, energy associations, foreign government web sites and energy departments, and more
- tied to the e-only SAGE Reference Series on Green Society, maps link to series articles that provide readers with background on the topic or issue at hand; however, the atlas can also be used independently of the series
- multimedia elements (approximately 20 videos, 10 audio clips, 75 four-color photos) accompany map themes and presentations.
- the editor provides a podcast lecture on green society and sustainability
- pedagogical elements include: a thematic reader’s guide to the maps; a resource guide of key books, journals and web sites for further reading and exploration; and a thorough Index to feed electronic search-and-browse capabilities.

ENCYCLOPEDIA OF TRANSPORTATION
Social Science and Policy
Four-Volume Set
Edited by Mark Garrett
Ohio State University

Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics.

The articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just economically but politically and socially as well, of President Eisenhower’s modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what’s the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says—despite the allure—will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities?

University of Plymouth (UK)

The SAGE Handbook of Transport Studies is an authoritative survey of contemporary transportation systems in view of economic, social, technical and environmental challenges. Incorporating an extensive range of approaches - from modes, terminals, planning and policy to more recent developments related to supply chain management, information systems and sustainability - the work provides a cohesive and extensive overview of the discipline. Authored by international experts in their field, each chapter bridges a broad range of conceptual, theoretical and geographical perspectives.
ENCyclopedia of Health Communication
Three-Volume Set
Edited by Teresa L. Thompson University of Dayton
From the dynamics of interpersonal communication between health professionals and clients to global command-and-control during public health emergencies that cross international borders, the field of health communication bridges many disciplines and involves efforts from the micro to the macro. It involves navigating personal, cultural, and political complexities and an ability to distill complex technical science into quickly and easily understood terms for ready distribution by the mass media—or to an individual patient or to the parent of an ailing child.
Despite an abundance of textbooks, specialized monographs, and academic handbooks, this is the first this is the first encyclopedic reference work in this area, covering the breadth of theory and research on health communication, as well as their practical application.
Nearly 600 original articles are organized A-to-Z within a three-volume set to provide comprehensive coverage of this exciting field, including such topics as:
• Theories and research traditions
• Evaluation and assessment
• Cultural complexities
• High risk and special populations
• Message design and campaigns
• Provider/patient interaction issues
• Media issues

ENCyclopedia OF HumAn SerViCES AND Diversity

Three-Volume Set

Linwood H. Cousins, Western Michigan University

Encyclopedia of Human Services and Diversity is the first encyclopedia to reflect the changes in the mission of human services professionals as they face today’s increasingly diverse service population. Diversity encompasses a broad range of human differences, including differences in ability and disability, age, education level, ethnicity, gender, geographic origin, religion, sexual orientation, socioeconomic class and values. Understanding the needs and problems of Asian Americans, Hispanic Americans, the deaf, the blind, the LGBT community and many other groups demands an up-to-date and cutting-edge reference. This three-volume encyclopedia provides human services students, professors, librarians and practitioners the reference information they need to meet the needs of an increasingly diverse population.

Features:
- 600 signed entries are organized A-to-Z across three volumes.
- Entries, authored by key figures in the field, conclude with cross references and further readings.
- A Reader’s Guide groups related articles within broad, thematic areas, such as aging, community mental health, family and child services, substance abuse, etc.
- A detailed index, the Reader’s Guide and cross references combine for a search-and-browse feature in the electronic version.

drug and alcohol studies

Six-Volume Set

Edited by Susanne MacGregor London School of Hygiene and Tropical Medicine (UK) and Betsy Thom Middlesex University (UK)

The field of drug and alcohol studies has expanded rapidly in recent years, with estimates of at least a doubling in the number of publications in the past decades. A feature of this wide and multidisciplinary field is the tendency of sub-groups of scholars to operate within their disciplinary silos, paying only token attention to the contributions of others. There are also, naturally, significant differences in approaches of different countries, reflecting different policy frameworks and cultural perspectives. When faced with these challenges to comprehensive study, a publication such as this new six-volume collection - which aims to bring together the various disparate strands of the topic, including key articles written by scholars from across the globe, disciplines and decades - truly proves itself to be a unique and valuable resource for specialist students and researchers in the field.

STRATEGIC COMMUNICATION

Four-Volume Set

Edited by Robert L. Heath University of Houston and Anne Gregory Leeds Metropolitan University (UK)

The roots of strategic communication lie in public relations, which has been a well-established concept in countries around the globe for more than 100 years. In the United States, for instance, this concept has been associated with publicity, promotion, and public policy battles. At times, especially in the early years of the 20th Century, it was seen as inseparable from propaganda and a means for promoting and protecting democracy. The field has developed immeasurably in the past few decades, but strategic communication is still clearly a topic with strong, influential links to a variety of different disciplines, and increasingly relevant in both a professional and academic capacity. This major work seeks to capture the definitions, key developments and future of the field through a carefully-selected collection of seminal papers on the topic.

The Encyclopedia of Public Relations remains the sole reference source for any library serving patrons in business, communication and journalism as it explores the evolution of the field with examples describing the events, changing practices and key figures who developed and expanded the profession.

The Second Edition continues to explore key challenges facing the profession, such as earning the trust and respect of critics and the general public. Much greater emphasis and space are placed on a theme that was just emerging when the first edition appeared: the Internet and social media as public relations tools. International coverage and representation are greatly expanded, as well. Finally, biographies (which are now widely available on the web) have been deleted to give room to areas of enhanced coverage, and any biographical material will be included where appropriate within the context of topical entries.

**MULTICULTURAL AMERICA**  
A Multimedia Encyclopedia  
Four-Volume Set  
Edited by Carlos E. Cortés  
University of California, Riverside

While several titles tackle multiculturalism, this is the first to use newly released 2010 U.S. Census data to examine multiculturalism today and tomorrow in America. The 2010 Census provided compelling evidence documenting dramatic racial and ethnic changes in the United States with great implications going forward. According to one report, we moved distinctly away from a ‘black/white’ nation to a more diverse mosaic. From 2000 to 2010, the African American population expanded 12% and the number of non-Hispanic whites grew by 4% whereas Asian Americans grew by more than 43% and Hispanics by 43%. Clearly the composition of our nation’s multi ethnic mosaic is undergoing a profound transformation. Multicultural America explores this pivotal moment and its ramifications with some 1,000 signed entries providing not just a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is America today. Pedagogical elements include an Introduction, a thematic Reader’s Guide, a Chronology of Multicultural Milestones, Glossary, Resource Guide to Key Books, Journals, and Associations, and an Appendix of 2010 U.S. Census Data. Finally, the electronic version will be the only reference work on this topic to augment written entries with multimedia for today’s students, with approximately 100 videos (with transcripts) from Getty Images and Video Vault, Agence France Presse, and Sky News, as reviewed by the Media Librarian of the Rutgers University Libraries, working in concert with the editors of the project.

Edited by Manuel Alvarado  
University of Luton (UK), Milly Buonanno  
La Sapienza University of Rome (IT), Herman Gray  
University of California, Santa Cruz and Toby Miller  
City University, London (UK)

Bringing together a truly international spread of contributors from across the UK, US, South America, Mexico and Australia, this handbook charts the field of television studies from issues of ownership and regulation through to reception and consumption.

Separate chapters are dedicated to individually examining the roles of journalists, writers, cinematographers, producers and manufacturers in the production process, whilst others explore different formats including sport, novella and soap opera, news and current affairs, music and reality TV. The final section analyses the pivotal role played by audiences in the contexts of gender, race and class, and spans a range of topics from effects studies to audience consumption.

The SAGE Handbook of Television Studies is an essential reference work for all advanced undergraduates, graduate students and academics across broadcasting, mass communication and media studies.

CRITICAL DISCOURSE ANALYSIS
Four-Volume Set
Edited by Ruth Wodak University of Lancaster (UK)

Since the late 1980s, critical discourse analysis (CDA) has become a well-established field in the social sciences. However, in contrast with some branches of linguistics, CDA is not a discrete academic discipline in the traditional sense, with a fixed set of research methods. The manifold roots of CDA lie in a myriad of disciplines including rhetoric, anthropology, philosophy and cognitive science, to name a few. Sculpted and edited by a leading voice in the field, this work covers the interdisciplinary roots, the most important approaches and methodologies of CDA, as well as applications in other disciplines in an updated and comprehensive way.

Structured thematically, the four volumes cover a wide range of aspects and considerations:

Volume One: Histories, Concepts and Interdisciplinarity
Volume Two: Theoretical Approaches and Methodologies
Volume Three: ‘Doing CDA’ - Case Studies
Volume Four: Applications and Perspectives - New Trends in CDA

CRISIS COMMUNICATION
Four-Volume Set
Edited by Timothy Coombs University of Central Florida

Crisis communication is a rapidly evolving field which is producing an increasing amount of research globally. The study of crisis communication is of interest to scholars and researchers from across the board of disciplines; such as in public relations, corporate communication, organizational communication, health communication, rhetoric, marketing, and information sciences. Because communication is instrumental to all phases of a crisis, the term captures a broad range of aspects: pre-crisis, the crisis response, and post-crisis.

For the first time, the most influential papers on this multidisciplinary and complex topic have been brought together in this four-volume major work, which also includes an introductory chapter to the work, written by editor Timothy Coombs.

Volume One: Origins of Crisis Communication
Volume Two: Theory Development in Crisis Communication
Volume Three: Crisis Communication Connects with Other Strategic Communication Fields
Volume Four: Crisis Communication Evolves: Digital Channels, Globalization, and Critiques

**ENCYCLOPEDIA OF MILITARY SCIENCE**

Four-Volume Set
Edited by G. Kurt Piehler Florida State University

Provides a comprehensive, ready-reference on the organization, traditions, training, purpose and functions of today's military. Entries include coverage of the duties, responsibilities and authority of military personnel and an understanding of strategies and tactics of the modern military and how they interface with political, social, legal, economic and technological factors. A large component is devoted to issues of leadership, group dynamics, motivation, problem-solving and decision-making in the military context. Finally, the work also covers recent American military history since the end of the Cold War with a special emphasis on peacekeeping and peacemaking operations, the first Persian Gulf War, the events surrounding 9/11, and the wars in Afghanistan and Iraq, and how the military has been changing in relation to these events.

INTERNATIONAL DIPLOMACY

Four-Volume Set
Edited by Iver B. Neumann London School of Economics and Political Science (UK) and Halvard Leira Norwegian Institute of International Affairs

Following on from where 2004’s widely acclaimed three-volume SAGE collection, Diplomacy (ed. Jonsson and Langhorne) left off, this new four-volume major work takes a new look at a subject which has matured and developed significantly over the past decade. With the rise of India, China and Brazil as well as of the global south, diplomacy’s history looks different. Significant shifts have prompted scholars in the field to reconsider the historical sequences that are relevant to an understanding of what diplomacy is today, and where it may be heading. Increased mediatization of global politics and diplomacy has prompted an exponential growth in literature on public diplomacy.

CHINA AND THE WORLD

Eight-Volume Set
Edited by Shaun Breslin University of Warwick (UK), Simon Shen The Chinese University of Hong Kong and Carla Freeman Johns Hopkins University

To say that the rise of China has captured the popular attention is something of an understatement. Hardly a day goes by without the publication of a new study that confidently predicts China’s future – be it that a focus on internal challenges and potential collapse, or China’s rise to inevitable global dominance. This four-volume collection aim is to provide, in a single resource, an overarching view of the totality of China’s place in the world – where it came from, what forms it takes, how it is studied, why it matters and where it is going.

The four volumes are divided into the key areas of perspectives, policies, relationships and issue. In this major work the editors have created a carefully balanced collection of seminal work, contextualized by a new introductory essay, which seeks to bring to light the perspectives of key figures from both inside and outside of China.

REGIONALISM

Four-Volume Set
Edited by Philippe De Lombaerde and Fredrik Söderbaum
United Nations University, Belgium

Since the mid-1980s, there has been an explosion of various forms of regionalist projects on a global scale. The widening and deepening of the European Union (EU) is the most pervasive example, but regionalism is also made visible through the revitalization or expansion of many other regional projects around the world. With a strong global focus on the field, this new major work will be of great value to the international academic community, collating and presenting seminal articles written by scholars from around the globe. The volumes are structured chronologically, reflecting the evolution of the subject:

Volume One: 1945-1970 Classical Regional Integration
Volume Two: 1970-1990 Revision of Classical Regional Integration
Volume Four: 2000-2010 Comparative Regionalism

HUMAN SECURITY

Four-Volume Set
Edited by Taylor Owen
Columbia University

Human security is understood as a response to the proliferation of new security threats which fit awkwardly within the relatively narrow confines of the traditional, state-centric national security paradigm. Human security is a field of study that has emerged over the last 20 years. It is a subsection of security studies but encompass a diverse range of academic disciplines and policy discourses (development studies, international relations, environmental studies, and public health, economics, gender issues, human rights and foreign policy). It is also increasingly being adopted by policy makers from individual nation states (Canada and Japan), bodies (the European Union and the African Union) as well as institutionalized by the United Nations, and used by non-state actors in such as NGOs and the corporate sector.

PEACEBUILDING

Four-Volume Set
Edited by Roger MacGinty
Manchester University (UK)

This new four-volume major work showcases the main debates and controversies associated with peacebuilding. In particular, this collection seeks to go beyond a simple explanation of peacebuilding institutions and projects to unpack the ideas and ideologies that underpin the subject. Recent years have seen a large increase in the academic and policy literature on peacebuilding. They have also seen significant successes and failures in peacebuilding, reforms among international organizations (such as the United Nations and World Bank), and increased prominence awarded to local peacebuilding actors. The articles in this major work capture these changes and collectively present a state-of-the-art account of contemporary peacebuilding.

Containing diverse perspectives, including from scholars from the global south and global north, and from scholars with different methodological standpoints, this collection is designed with academics as well as practitioners in mind.

ENERGY SECURITY
Six-Volume Set
Edited by Benjamin K. Sovacool
Vermont Law School

The classic conception of energy security addresses the relative supply and safety of energy fuels and services. Yet the past three decades have seen both the emergence of new energy security threats, such as climate change, and new conceptions of energy security, such as definitions which focus on social stewardship, affordability, or innovation of energy research and development. The articles collated in this new six-volume major work chart these significant developments, and place them in a wider context through a comprehensive and illuminating introductory chapter, written by editor Benjamin K. Sovacool and energy security expert Scott V. Valentine.

Divided thematically, the volumes cover the following topics:
Volume One: Definitions, and Concepts
Volume Two: Fuels and Technologies of Energy Security
Volume Three: Economic, Political, and Environmental Dimensions of Energy Security
Volume Four: Regional Perspectives of Energy Security
Volume Five: National Perspectives of Energy Security
Volume Six: Indices and Measures of Energy Security Progress

NUCLEAR POLITICS
Four-Volume Set
Edited by Maria Rost Rublee
and Ramesh Thakur
National University

While the Cold War ended more than two decades ago and global nuclear stockpiles have shrunk dramatically, there are still around 18,000 nuclear warheads distributed among nine nuclear-armed states. Against the backdrop of continual political tensions and conflict, the nuclear issue will continue to dominate headlines for several decades into the future. This new four-volume major work explores this important issue and aims to introduce readers to the key arguments and authors in the field. With such a wide variety of theoretical approaches and substantive topics under the umbrella of nuclear politics, this collection will not only allow the reader to peruse the diverse explanations for the regime, proliferation, non-proliferation and disarmament, it will also guide them through the intellectual history of the field.

HANDBOOK OF INTERNATIONAL RELATIONS
Second Edition
Edited by Walter Carlsnaes
Uppsala University (SE), Thomas Risse
Otto-Suhr-Institut, Free University of Berlin (DE) and Beth A. Simmons Harvard University

[A] brilliantly conceived and wonderfully designed piece of scholarship that makes a major contribution of its own to the field. An outstanding achievement

- Professor Michael Cox, London School of Economics and Political Science

The original Handbook of International Relations was the first authoritative and comprehensive survey of the field of international relations. In this eagerly-awaited new edition, the Editors have once again drawn together a team of the world’s leading scholars of international relations to provide a state-of-the-art review and indispensable guide to the field, ensuring its position as the pre-eminent volume of its kind.

The SAGE Library of Political Science series brings together the articles that have been most influential in shaping the discipline. Each multivolume set will present a collection of field-defining published works, both classical and contemporary, sourced from the foremost publications in the discipline by an internationally renowned editor or editorial team. They will also include a full introduction, presenting a rationale for the selection and mapping out the past, present and likely future of each area.

**POLITICAL EXTREMISM**
Four-Volume Set
Edited by Cas Mudde
University of Georgia

This major work brings together key papers on political extremism and radicalism, focusing predominantly upon extremism and radicalism within (liberal) democratic contexts, but also moving beyond this by including both (particularly historic) studies of the main extremist regimes and articles of the 20th century. Curated by a leading voice in the field, the articles are mapped and set in context by the introductory chapters which open each of the work’s four volumes. Each volume focuses on a key area:

- **Volume One**: Extremism and Democracy: Concept, Theories and Responses
- **Volume Two**: Historical Extremism
- **Volume Three**: Right-Wing Extremism
- **Volume Four**: Left-Wing Extremism

Edited by Stephen White
University of Glasgow (UK) and Cerwyn Moore
University of Birmingham (UK)

The central aim of these comprehensive four volumes is to capture the diversity of the historical trends, political changes and international dynamics which continue to evolve, and which have framed the post-Communist period. Additionally, they offer a timely collection of seminal excerpts on post-Soviet politics, thereby giving insight into how we understand Russia today.

- **Volume One**: From The USSR to a Post-Communist Russia
- **Volume Two**: Citizens and Politics
- **Volume Three**: Polity, Economy and Society
- **Volume Four**: Foreign Relations

**PROPAGANDA**
Four-Volume Set
Edited by Paul Baines
Cranfield School of Management (UK) and Nicholas J. O’Shaughnessy
Queen Mary University London (UK)

A comprehensive major work on the topic of propaganda studies is required now more than ever. Not least because in the age of the ‘war on terror’, we have witnessed terrorist bombings - suicide and otherwise - all over the world, which are often later accompanied by, and frequently preceded by, the use of propaganda to enhance the feeling of terror amongst the target population. This set is organized to provide the reader with a solid and detailed grounding in all aspects of the subject, past and present.

- **Volume One**: Historical Origins, Definitions and the Changing Nature of Propaganda
- **Volume Two**: The Psychological and Sociological Underpinnings of Propaganda
- **Volume Three**: Propaganda in Military and Terrorism Contexts
- **Volume Four**: Advances and Contemporary Issues in Propaganda Studies

THE SAGE HANDBOOK OF GLOBALIZATION

Two-Volume Set

Edited by Manfred Steger University of Hawaii and RMIT University (AU), Paul Battersby and Joseph Siracusa RMIT University (AU)

The SAGE Handbook of Globalization allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field. The topics covered speak to a transdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology, anthropology, history, media and cultural studies, economics and governance, environmental sustainability, international law and criminal justice. Spanning two volumes, specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core ‘global’ concerns of narrative, praxis, space and place. This integrated approach sets the handbook apart and distinguishes global studies as the most equipped academic discipline with which to address the scope and pace of global change in the twenty-first century.

THE UNITED NATIONS

Eight-Volume Set

Edited by Sam Daws University of Oxford (UK) and Natalie Samarasinghe United Nations Association of the United Kingdom

Literature on the UN is as wide-ranging as the organization’s remit; there exists a multitude of books, articles and reports on its various programs and activities. Indeed, the very breadth of literature about the organization can make it hard to navigate and understand.

The format of this major work is ideally suited to a serious treatment of the United Nations that can clarify and illuminate its structures and role, and make it accessible to scholars and practitioners. The generous eight-volume format of this collection, along containing the best cross-disciplinary articles from around the world, provides an opportunity to present a comparative and holistic analysis of the organization.

GLOBALIZATION AND POLITICS

Four-Volume Set

Edited by Paul James Royal Melbourne Institute of Technology (AU)

The final set of the Central Currents in Globalization series starts off with two volumes that focus on the politics of globalization from ‘above’ and ‘below’.

The first volume considers the idea of global political governance, including the impact of globalization on the nation-state and the role of multilateral regimes such as the United Nations. The second volume looks at globalizing political developments at ground level, including the notion of a ‘global civil society’ and the rise of the ‘anti-globalization’ movement. The final two volumes in the series review the various social theories and philosophies of globalization - including cosmopolitanism and human rights - along with the political critiques of globalization as an homogenizing, marginalizing and/or exploitative force.

Volume One: Global Political Governance (with Nevzat Soguk, RMIT University)
Volume Two: Global Social Movements and Global Civil Society (with Paul van Seters, University of Tilburg)
Volume Three: Social Theories of the Global (with James H. Mittleman, American University, Washington D.C.)

COMPARATIVE PUBLIC POLICY

Four-Volume Set
Edited by Michael Hill Emeritus
Professor at the University of Newcastle upon Tyne (UK)

Increasingly, writings on public policy involve comparative analysis. This is a development sparked by the growing mutual engagement of scholars from different countries about the topic, and by a recognition that comparison can contribute to theory-building. But it must also be seen as being affected by aspects such as global influences upon nation states, supra-national collaborative policies, aid policies and the development of regional political unions (of which the European Union is the leading example). This is a comprehensive and truly international major work, charting an area of study which cuts across a number of scholarly boundaries.

PUBLIC SECTOR REFORM

Four-Volume Set
Edited by Andrew Massey
University of Exeter (UK)

Public sector reform is endemic to public administrations and governmental structures globally. It is driven by a variety of dynamics and these vary according to their specific context: geographical; cultural; social; political; economic; and temporal. This four-volume set brings together elements of the classical and modern work in this diverse field in a comprehensive and accessible way; providing an indispensable resource for both academics and practitioners from a social science and business perspective. Through a four-volume structure, which takes in historical and modern-day perspectives whilst maintaining a strong global focus on the subject, the set demonstrates that reform is a constant process and that it has been taking place for a long time; that which we often consider a ‘golden age’ in terms of Weberian bureaucracies or welfare-state hierarchies, was itself a reform that belonged to a specific time and set of places.

THE SAGE HANDBOOK OF PUBLIC ADMINISTRATION
Second Edition
Edited by B. Guy Peters University of Pittsburgh and Jon Pierre Gothenburg University, Sweden

Guy Peters and Jon Pierre are rightly regarded as leading figures in the area, but even that does not guarantee the striking breadth reflected in the company of contributors: this quality may be because the 14 separate areas covered in the volume are “franchised” to separate expert (and geographically scattered) “part editors” to co-ordinate and discuss entries. There is in consequence a similarly striking breadth to the field reviewed. The title is somewhat “retro” as the intellectual tradition is again reclaimed from policy-making, public sector management and other competing perspectives that have emerged. But while the label may be traditional, the content undermines any negative associations that implies

- Grant Jordan, Emeritus Professor of Politics, the University of Aberdeen

THE SAGE HANDBOOK OF HUMAN RIGHTS
Two-Volume Set
Edited by Anja Mihr University of Utrecht (NL) and Mark Gibney University of North Carolina, Asheville

Spanning two volumes, this handbook brings together over 50 original chapters that examine human-rights issues of both contemporary and future significance. Combining a diverse range of work in a number of fields from law, political science and philosophy to climate change, demography, economics, geography, urban studies, mass communication, and business and marketing, the handbook is both comprehensive and current in scope and content. Furthermore, it considers the manner in which human rights has come to play a prominent role in popular culture in a section on human rights in art, film, music and literature.

Not only does the handbook provide a state-of-the art analysis of this wide-ranging discipline, addressing the history and development of human rights standards and its movements, mechanisms and institutions, but it also seeks to go beyond this by suggesting a way forward through prospective thinking.

Mercenaries
A Guide to Private Armies and Private Military Companies
Alan Axelrod
Mercenaries: A Guide to Private Armies and Private Military Companies provides a comprehensive survey and guide to the mercenary forces, entrepreneurs, and corporations that are a major component of warfare today. Security, military advice, training, logistics support, policing, technological expertise, intelligence, transportation—all are outsourced to a greater or lesser degree in the U.S. military—while countries as diverse as Saudi Arabia and Australia rely on privatization in one form or another.

This comprehensive one-volume work covers the full range of mercenaries active on the international military scene today, including a concise history of mercenaries and private armies on land, sea and in the air.

Key Features:
- Illuminating sidebars include biographies of major figures, key statistics, historical and current documents, contracts and legislation on private armies and outsourced military services.
- Each chapter includes a bibliography of books, journal articles and websites.
- A general bibliography concludes the entire work.

Vital Statistics on the Presidency

The Definitive Source for Data and Analysis on the American Presidency

Fourth Edition
Lyn Ragsdale, Rice University

Looking beyond the individual office holders to the office itself, this Fourth Edition of Vital Statistics on the Presidency covers George Washington’s tenure through the 2012 election. The book’s expansive view of the presidency allows readers to recognize major themes across administrations and to reach overall conclusions about the nature of the institution and its future. The illuminating data is put into context by thoughtful essays explaining key statistical patterns, making this edition an intriguing and comprehensive reference to important patterns throughout the history of the presidency.

Landmark Legislation 1774-2012

Major U.S. Acts and Treaties

Second Edition
Steven W. Stathis, Congressional Research Service

The Second Edition of this renowned treasure trove of information about the most important laws and treaties enacted by the U.S. Congress now deepens its historical coverage and examines an entire decade of new legislation. Landmark Legislation 1774-2012 includes additional acts and treaties chosen for their historical significance or their precedential importance for later areas of major federal legislative activity in the over 200 years since the convocation of the Continental Congress.

Brand new chapters expand coverage to include the last five numbered Congresses (10 years of activity from 2003-2012), which have seen landmark legislation in the areas of health insurance and health care reform; financial regulatory reform; fiscal stimulus and the Temporary Asset Relief Program; federal support for stem cell research; reform of federal financial support for public schools and higher education; and much more.

Features & Benefits:
- Each chapter covers one of the numbered Congresses with a historical essay, followed by the major acts of that Congress arranged in chronological order of passage — with each act summarized.
- A Finder’s Guide summarizes all of the acts and treaties into approximately 40 separate topical policy areas.
- The work’s extensive bibliography has been expanded and updated.

Guide to the White House Staff

Shirley Anne Warshaw, Gettysburg College

This insightful new work examines the evolution and current role of the White House staff. It provides a study of executive-legislative relations, organizational behavior, policy making, and White House-cabinet relations. It also makes an important contribution to the study of public administration for researchers seeking to understand the inner workings of the White House.

Guide to the White House Staff also provides biographies of key White House staff that served the presidencies of Richard M. Nixon through George W. Bush. This valuable new reference will find a home in collections supporting research on the American presidency, public policy, and public administration.

Youth Justice in America
Second Edition
Maryam Ahranjani, Andrew G. Ferguson
University of the District of Columbia, Jamin B. Raskin
American University

Youth Justice in America combines thoughtful commentary with selections from actual federal and state constitutional criminal law cases to explore issues of juveniles and justice. The book addresses tough, important issues that are part of many high school curriculums and directly affect today’s young people, including:

- How should we balance liberty with the need for an ordered society?
- How do we enforce order while maintaining constitutional rights?
- Should we treat juveniles differently than adult offenders?

The Supreme Court and Military Justice
Jonathan Lurie  Rutgers University
This book addresses the body of statutory and case law covering both the military and military conduct. Four chapters discuss the relationship between the Supreme Court and military justice, covering the Civil War era, World War II, the postwar period from 1956 to 1987, and developments since the September 11, 2001, attacks. Each chapter also includes a set of documents that shed light on these periods of U.S. history. Excerpts from key Supreme Court briefs and rulings are complemented by articles from the Army Times, the Armed Forces Journal, and mass media including the New York Times and The Nation. Incisive introductions to these documents explain the evolution of constitutional law and the ways in which federal and state statutes have lessened the effectiveness of both civilian control over the military and civilian judicial oversight.

Congress and the Nation 2009–2012, Volume XIII
Politics and Policy in the 111th and 112th Congresses
Dave Tarr

Chronicling the highly partisan and polarized environment during the historic first term of President Barack Obama, Congress and the Nation 2009–2012 is the most authoritative reference on congressional law-making and trends during the 111th and 112th Congresses. The newest edition in this award-winning series documents the most fiercely debated issues during this period, including:

- Stimulus spending in the wake of financial crisis
- The controversial reform of the U.S. healthcare system
- Showdowns over raising the national debt ceiling
- Extensions of tax cuts and unemployment compensation
- Confirmation of two new female members of the U.S. Supreme Court
- Overhaul of financial industry regulations
- Repeal of the “don’t ask, don’t tell” law banning openly gay armed forces personnel from military service

This acclaimed resource also covers the shift in partisan control of the U.S. House after the 2010 midterm election and the subsequent gridlock for lawmaking in the 112th Congress. Organized by policy area, each chapter summarizes the legislative activity, including a chronology and legislative history of the bills passed and the major provisions of the final laws.

No other source guides readers seamlessly through the policy output of the national legislature with the breadth, depth and authority of Congress and the nation. This must-have reference for all academic libraries meets the needs of the full spectrum of users, from lower-level undergraduates through researchers and faculty.

Vital Statistics on Interest Groups and Lobbying
Holly Brasher  
University of Alabama, Birmingham

This latest volume in the CQ Press series on vital statistics in American politics tackles interest groups and lobbying. This book builds from data that has been collected and organized from disclosure forms now required to be filed by registered lobbyists. After providing background about the Lobbying Disclosure Act, the book explores such questions as: When do organizations register to lobby? What are the characteristics of lobbying organizations (varying from professional and trade associations to businesses, coalitions, public interest groups and intergovernmental groups)? How extensively do organizations lobby on issues? What sorts of efforts do they exert across Congress, the White House, and the various federal agencies? What is involved in terminations of lobbying firms and organizations? What sorts of issues and organizations are most often targeted? And what sorts of moneys are spent and how?

Via narrative supported by extensive tables and charts, Vital Statistics on Interest Groups and Lobbying provides a broad, comprehensive and informative view of lobbying, interest groups, and campaign contributions and their impact on American national politics.

**Guide to U.S. Political Parties**

Marjorie R. Hershey  
*Indiana University Bloomington*

This one-volume reference presents the major conceptual approaches to the study of U.S. political parties and the national party system, describing the organization and behavior of U.S. political parties in thematic, narrative chapters that help undergraduates understand party origins, historical development, and current operations. Further, it provides researchers with in-depth analysis of important subtopics and connections to other aspects of politics.

Key Features:

- Thematic, narrative chapters, organized into six major parts, provide the context, as well as in-depth analysis of the unique system of party politics in the United States.
- Top analysts of party politics provide insightful chapters that explore how and why the U.S. parties have changed over time, including major organizational transformations by the parties, behavioral changes among candidates and party activists, and attitudinal changes among their partisans in the electorate.
- The authors discuss the way the traditional concept of formal party organizations gave way over time to a candidate-centered model, fueled in part by changes in campaign finance, the rise of new communication technologies and fragmentation of the electorate.

**Historical Guide to World Media Freedom**

A Country-by-Country Analysis

**Jenifer Whitten-Woodring** University of Massachusetts, Lowell, **Douglas Van Belle** Victoria University of Wellington (NZ)

**Historical Guide to World Media Freedom** brings together comprehensive historical data on media freedom since World War II, providing consistent and comparable measures of media freedom in all independent countries for the years 1948 to the present. The work also includes country-by-country summaries, analyses of historical and regional trends in media freedom, and extensive reliability analyses of media freedom measures. The book’s detailed information helps researchers connect historical measures of media freedom to Freedom House’s annual *Freedom of the Press* survey release, enabling them to extend their studies back before the 1980s when Freedom House began compiling global press freedom measures.

**Key Features:**

- A-to-Z, country-by-country summaries of the ebb and flow of media freedom are paired with national media freedom measures over time.
- Introductory chapters discuss such topics as the theoretical premises behind the nature and importance of media freedom, historical trends and the challenges of coding for media freedom in a way that ensures consistency for comparison.
- Concluding material covers the historical patterns in media freedom, how media freedom tracks with other cross-national indicators and more.

Historic Documents of 2013
CQ Press
For more than 40 years the Historic Documents series has made primary source research easy by presenting excerpts from documents on the important events of each year for the United States and the world. Each volume includes approximately 70 events with well over 100 documents from the previous year, from official or other influential reports and surveys to speeches from leaders and opinion makers, to court cases, legislation, testimony and much more.
Historic Documents is renowned for the well-written and informative background, history, and context it provides for each document. Each volume begins with an insightful essay that sets the year’s events in context, and each document or group of documents is preceded by a comprehensive introduction that provides background information on the event. Full-source citations are provided. Readers have easy access to material through a detailed, thematic table of contents and a cumulative five-year index that directs them to related material in earlier volumes.

City Crime Rankings 2014

**Science and Politics**
An A-to-Z Guide to Issues and Controversies

*Brent S. Steel*  *Oregon State University*

Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena. This politicization of science is deepened by the key role government funding plays in scientific research and development, the market-leading position of U.S.-based science and technology firms, and controversial U.S. exports (such as genetically modified foods or hormone-injected livestock).

This groundbreaking, one-volume, A-to-Z reference features 120–150 entries that explore the nexus of politics and science, both in the United States and in U.S. interactions with other nations. The essays, each by experts in their fields, examine:

- Health, environmental, and social/cultural issues relating to science and politics
- Concerns relating to government regulation and its impact on the practice of science
- Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect

Guide to U.S. Environmental Policy
Sally K. Fairfax University of California, Berkeley (Emeritus), Edmund P. Russell, University of Virginia

Guide to U.S. Environmental Policy provides the analytical connections showing readers how issues and actions are translated into public policies and persistent institutions for resolving or managing environmental conflict in the United States. The guide highlights a complex decision-making cycle that requires the cooperation of government, business, and an informed citizenry to achieve a comprehensive approach to environmental protection. The book’s topical, operational and relational essays address development of U.S. environmental policies, the federal agencies and public and private organizations that frame and administer environmental policies, and the challenges of balancing conservation and preservation against economic development, the ongoing debates related to turning environmental concerns into environmental management, and the role of the U.S. in international organizations that facilitate global environmental governance.

Key Features:
• Thirty-four essays by leading conservationists and scholars in the field investigate the fundamental political, social and economic processes and forces driving policy decisions about the protection and future of the environment.
• Essential themes traced through the chapters include natural resource allocation and preservation, human health, rights of indigenous peoples, benefits of recycling, economic and other policy areas impacted by responses to green concerns, international cooperation, and immediate and long-term costs associated with environmental policy.
• The essays explore the impact made by key environmental policymakers, presidents and politicians, as well as the topical issues that have influenced U.S. environmental public policy from the colonial period to the present day.
• A summary of regulatory agencies for environmental policy, a selected bibliography and a thorough index are included.

Guide to U.S. Health and Health Care Policy
Thomas R. Oliver University of Wisconsin School of Medicine and Public Health, Madison

Guide to U.S. Health and Healthcare Policy provides the analytical connections showing students how issues and actions are translated into public policies and institutions for resolving or managing health care issues and crises, such as the recent attempt to reform the national health care system. The guide highlights the decision-making cycle that requires the cooperation of government, business and an informed citizenry to achieve a comprehensive approach to environmental protection. Through 30 topical, operational and relational essays, the book addresses the development of the U.S. health care system and policies, the federal agencies and public and private organizations that frame and administer those policies, and the challenges of balancing the nation’s healthcare needs with the rising costs of medical research, cost-effective treatment and adequate health insurance.

Key Features:
• Thirty-topical essays investigate the fundamental political, social, economic, and procedural initiatives that drive health and health care policy decisions affecting Americans at the local, regional and national levels.
• Essential themes traced throughout the chapters include providing access to healthcare, national and international intervention, nutrition and health, human and financial resource allocation, freedom of religion versus public policy, discrimination and health care policy, universal health care coverage, private health care versus publicly funded health care, and the immediate and long-term costs associated with disease prevention, treatment and health maintenance.
• A glossary of key health care policy terms and events, a selected master bibliography and a thorough index are included.

Guide to U.S. Economic Policy
Robert E. Wright  Augustana College, Sioux Falls, Thomas W. Zeiler  University of Colorado

Guide to U.S. Economic Policy shows students and researchers how issues and actions are translated into public policies for resolving economic problems (like the Great Recession) or managing economic conflict (like the left-right ideological split over the role of government regulation in markets). Taking an interdisciplinary approach, the guide highlights decision-making cycles requiring the cooperation of government, business and an informed citizenry to achieve a comprehensive approach to a successful, growth-oriented economic policy. Through 30 topical, operational, and relational essays, the book addresses the development of U.S. economic policies from the colonial period to today, the federal agencies and public and private organizations that influence and administer economic policies, the challenges of balancing economic development with environmental and social goals and the role of the United States in international organizations such as the IMF and WTO.

Key Features:
- Thirty essays by experts in the field investigate the fundamental economic, political, social and process initiatives that drive policy decisions affecting the nation’s economic stability and success.
- Essential themes traced throughout the chapters include scarcity, wealth creation, theories of economic growth and macroeconomic management, controlling inflation and unemployment, poverty, the role of government agencies and regulations to police markets, Congress versus the president, investment policies, economic indicators, the balance of trade and the immediate and long-term costs associated with economic policy alternatives.
- A chronology of key economic events, a summary of bureaus and agencies charged with economic policy decisions, a master bibliography and a thorough index appear at the back of the book.

Federal Regulatory Directory
Sixteenth Edition
CQ Press

After more than three decades, the Federal Regulatory Directory continues to offer a clear path through the maze of complex federal agencies and regulations, providing to-the-point analysis of regulations. Information-packed profiles of more than 100 federal agencies and departments detail the history, structure, purpose, actions and key contacts for every regulatory agency in the U.S. government. Now updated with an improved searching structure, the Federal Regulatory Directory continues to be the leading reference for understanding federal regulations, providing a richer, more targeted exploration than is possible by cobbling together electronic and print sources. Features include:

• A clear picture of the arrangement of economic, environmental, safety, health and other regulatory agencies
• Up-to-date contact information for all offices listed and profiles of regulatory officials
• Comprehensive narratives detailing the history and current issues facing the major regulatory agencies as well as information on major regulatory legislation
• An introduction that clearly explains the purposes, development, implementation and oversight of federal regulation
• A thematic finding aid that allows users to browse regulatory organizations by subject of regulation

CHILDHOOD COGNITIVE DEVELOPMENT

Five-Volume Set

Edited by Susan Gelman
University of Michigan

Presents a collection of important papers that cover key contributions in the area. Designed to be a touchstone text for scholars, practitioners and educators with an interest in children's thinking. Although the primary focus is on basic scientific research, each volume also discusses important applied issues.

Volume One: Basic Processes
Volume Two: Concepts, Categories and Language
Volume Three: Core Theories
Volume Four: Reasoning, Problem-Solving and Academic Skills
Volume Five: Context and Culture

SAGE LIBRARY IN DEVELOPMENTAL PSYCHOLOGY

The study of developmental disorders is an enormous and intrinsically multi-disciplinary field of research. The articles in this five-volume collection cover the myriad genetic and non-genetic developmental psychopathological conditions which are now known and being researched from a variety of perspectives, from dyslexia to autism and beyond. Covering a broad range of considerations around the topic, the papers in this major work seek to capture historical antecedents, contemporary themes, conceptual issues and cutting-edge methods in the study of human neurodevelopmental disorders. Each volume opens with a contextualizing introductory passage written by the editors and the volumes are organized thematically for ease of navigation:

Volume One: Disorder Typology and explanatory frameworks
Volume Two: Behaviourally defined developmental disorders
Volume Three: Genetically defined developmental disorders
Volume Four: Developmental disorders and the environment
Volume Five: Multi-disciplinary approaches to developmental disorders

SAGE BENCHMARKS IN PSYCHOLOGY

The SAGE Benchmarks in Psychology series brings together the most influential and field-defining articles, both classical and contemporary, in each of the subdisciplines of psychological science presented as a series of multivolume major works. Each multivolume set represents a collection of the published works from leading international scholars and academics throughout the world, collated from the foremost journals in each field and brought together by an editor or editorial team of renowned international stature. A full introduction is offered by the editor of each set to present a rationale for the selection of articles, an overview of the field, the discipline’s past, present and likely future, and to draw upon the articles selected in each volume as signposts for the reader.

CLINICAL PSYCHOLOGY

Collection: I & II

Eight-Volume Set

Edited by Michael Barkham University of Sheffield (UK), Susan Llewelyn University of Oxford (UK), Gillian Hardy and Graham Turpin both at University of Sheffield (UK)

Clinical Psychology I: Assessment and Formulation covers the process of assessing clients looking at diagnostics, measures and formulation of presenting problems based on clear theoretical models.

Clinical Psychology II: Treatments and Interventions concentrates on treatments and interventions based on the surfeit of clinical, cognitive and neuropsychological models for patient care.

How do athletes overcome fears, slumps, mental blocks or injuries? How do they deal with stress and anxiety, be it from competitors, teammates, audiences, parents, coaches or themselves? What psychological techniques prove effective in mental training for peak performance, maintaining concentration, motivation and competitive drive? How can an athlete enhance his or her commitment to a training regime, or how might the average person better adhere to a program of fitness and exercise? Readers will find answers to these questions and more in the Encyclopedia of Sport and Exercise Psychology.

Key features include:
- Entries explore the theory, research and application of psychology as it relates to sport and fitness in a manner that is accessible and jargon-free to help readers better understand human behavior in sport and exercise settings.
- From personal factors to situational factors influencing performance to specific psychological techniques for enhancing performance, this work provides comprehensive coverage of the field via approximately 350 to 400 signed entries.
- Entries conclude with cross-references and suggestions for further readings to further guide students in their research journey.

Available in print and online, this monumental work is edited by two leading figures in the field with a distinguished international Editorial Advisory Board to select and assign entries, ensuring authoritative content readers can trust.

READERSHIP
Students and researchers in sports psychology and behavioral medicine
The SAGE Library in Social Psychology brings together the most influential and field-defining articles, both classical and contemporary, in each of the constituent subfields of social psychology presented as a series of multivolume major works. Charting an area of psychological science which is very firmly established historically as well as one of the fastest-moving in the current day in research terms, each multivolume set represents a collection of published works from leading international scholars throughout the world, collated from the foremost journals in each field and brought together by an editor or editorial team of renowned international stature.

**SOCIAL COGNITION**

Four-Volume Set
Edited by Susan T. Fiske
Princeton University

All human interactions are conditioned on social cognition and, in turn, influence social cognition. This four-volume collection brings together some of the most influential and important articles to have come out of the field over the past decades, as well as taking in modern developments which reflect just how vital the subject still is today.

**Volume One: Basic Concepts in Social Cognition**
**Volume Two: Topics in Social Cognition: Self, Attributions, Heuristics and Inferences**
**Volume Three: Topics in Social Cognition: Cognitive Approaches to Attitudes, Stereotyping and Prejudice**
**Volume Four: Beyond Cognition: Affect and Behaviour**

**GROUP PROCESSES**

Four-Volume Set
Edited by Craig D. Parks
Washington State University

Issues related to group-based and group-influenced behavior have always been at the heart of social psychology. Researchers in other disciplines are increasingly drawn to the group as a focus of study and, of course, groups remain the standard decision-making unit for most important decisions in most societies. The four volumes explore this key area of study in four volumes:

**Volume One: Group Performance**
**Volume Two: Interdependence within Groups**
**Volume Three: Decision-Making Groups**
**Volume Four: Relations among Groups**

ENCYCLOPEDIA OF ACTION RESEARCH

Edited by David Coghlan Trinity College Dublin (IE) and Mary Brydon-Miller University of Cincinnati

Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational, community and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design, enactment and evaluation of liberating actions through combining action and research, reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s, there has been a dramatic increase in research output and adoption in university curricula over the past decade. This is now an area of high popularity among academics and researchers from various fields - especially business and organization studies, education, health care, nursing, development studies and social and community work.

The Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state-of-the-art overview and comprehensive breakdown of the key tenets and methods of action research, as well as detailing the work of key theorists and contributors to action research.

FUNDAMENTALS OF REGRESSION MODELING

Four-Volume Set

Edited by Salvatore Babones University of Sydney (AU)

Presents a collection of landmark studies on the topic of regression modeling, identifying the most important, fundamental articles out of thousands of relevant contributions. The social sciences - particularly sociology and political science - have made extensive use of regression models since the 1960s, and regression modeling continues to be the staple method of the field.

The collection is framed by an orienting essay which presents to a guide to regression modeling, written with applied practitioners in mind.

FOCUS GROUP RESEARCH

Four-Volume Set

Edited by Graham R. Walden

Focus groups are a popular, widely accepted and legitimate research method to determine attitudes, experiences, perceptions and knowledge on a wide range of topics in many fields of endeavour. For example, studies have been conducted to examine participants' favourite pizza toppings, their quality of life following hip-replacement surgery and how they feel about human cloning. Focus groups lead to the voicing of attitudes and insights not readily attainable from other qualitative forms of data collection. The spectrum of interest in focus groups covers virtually all disciplines, and the variety of the applications for this technique is extraordinary.

STATISTICAL ANALYSIS OF CONTINUOUS DATA

Four-Volume Set

Edited by Roger Penn Queen's University Belfast (UK) and Damon Berridge University of Lancaster (UK)

Tracks the development of statistical methods for continuous, or interval-scale data. Examples of such data occurring in the social sciences include indicators of educational attainment (for example, GCSE scores) and psychometric measures of intelligence. Framed by a contextualizing introduction, the volumes are organized thematically, covering key areas to enable a well-rounded and comprehensive understanding of the discipline.

Volume One: Statistical Foundations for the Analysis of Continuous Data
Volume Two: Basic Principles for the Statistical Modelling of Continuous Data
Volume Three: Multivariate Analyses of Continuous Data
Volume Four: Statistical Modelling of Multivariate Continuous Data

This new four-volume set Applied Statistical Modeling brings together seminal articles in the field, selected for their exemplification of the specific model type used, their clarity of exposition and their importance to the development of their respective disciplines. The set, as a whole, is designed to serve as a master class in how to apply the most commonly used statistical models with the highest level of methodological sophistication. In essence, it is a user’s guide to statistical best-practice in the social sciences.

Volume One: Control variables; multicollinearity and variance inflation; interaction models; multilevel models
Volume Two: Models for panel data; Time series cross-sectional analysis; Spatial models; Logistic regression
Volume Three: Multinomial Logistic; poisson regression; instrumental variables
Volume Four: Structural Equation Models; latent variables and factor analysis models

SMALL WORLD RESEARCH
Four-Volume Set
Edited by Sebastian Schnettler
Small-world research started about 50 years ago with an idea about a social phenomenon: that any two randomly chosen individuals in a country, or in the world even, could be connected with each other via a relatively short chain of acquaintances. But since its formation, this idea has evolved and - despite research almost dying off in the 1980s - has now become an exciting and vital area of study. Following the publication of seminal research in the late 1990s, which sheds new light on the question of how short connections are possible in large scale networks, researchers began to see the significance of their subject reflected in many different facets of existence; small-world structures were found in a number of distinct contexts, including, for example, a protein interaction network and in communication networks via instant messaging. What had once started as small-world research has now evolved into an interdisciplinary science of complex networks.

Volume One: The Small-World Phenomenon: An Introduction
Volume Two: Network Search
Volume Three: A Complex Networks Approach to the Small-World Problem
Volume Four: Multidisciplinary Applications

OBSERVATION METHODS
Four-Volume Set
Edited by Barry Smart University of Plymouth (UK), Kay Peggs Portsmouth University (UK) and Joseph Burridge
Observation - as a deliberate, organized and systematic form of 'looking' or 'watching' - is integral to all scientific inquiry. It is a process that is guided by rational principles and assumptions, and motivated by an interest in obtaining data on occurrences, events, processes, reactions, forms of conduct and relationships. This collection demonstrates the rich diversity of observational methods, techniques and associated innovations, as well as provides examples of results obtained by studies now considered to be social science classics. The volumes contain important material concerned with the development and refinement of observational methods, as well as the theoretical and philosophical understandings and assumptions integral to observation as a process. Sources that explore the practical matters involved in the stages of preparing for, engaging in and analyzing observations also feature, along with material from classic studies using observational methods. Finally, in addition to critiques of methods of observation, there are sources responding to recent developments within observational methods which utilize the possibilities afforded by contemporary digital and information technology in creative ways.

AUTOETHNOGRAPHY
Four-Volume Set
Edited by Pat Sikes University of Sheffield (UK)
From the 1980s onwards, there has been what has frequently been described as an auto/biographical turn in the social sciences and also in the arts and humanities. Changes in conceptions of self, society and identity, postmodern, post-structural and post-colonial influences and sensibilities, to name but a few, have all played their part in focusing attention on to, and valorizing the perceptions and experiences of the individual. Now, at a time of exciting development for the subject, this new, four-volume set seeks to capture the seminal articles that have come out of the field over the past decades. Framed by a newly written introductory chapter, the set includes work that spans disciplinary boundaries, bringing together a comprehensive collection that will prove invaluable to scholars in the field.

GROUNDED THEORY AND SITUATIONAL ANALYSIS
Four-Volume Set
Edited by Adele E. Clarke University of California, San Francisco and Kathy Charmaz Sonoma State University
This four-volume major work brings together a wealth of valuable research on the qualitative research methods of grounded theory and situational analysis. Both theories draw on poststructural developments in the social sciences and humanities, (re)situating these methods among cutting-edge approaches today. The articles in this collection come from a variety of disciplines, from sociology to science and technology studies, as well as taking in a broad cross-section of issues relating to race, class and gender. Framed and contextualized by an introductory chapter, newly written for the set by the widely respected editorial team of Adele E Clarke and Kathy Charmaz, the collection is clearly divided into the four thematic volumes:

Volume One: Grounded Theory and Situational Analysis as Methods for Qualitative Research
Volume Two: Exemplars of Grounded Theory Research: A
Volume Three: Exemplars of Grounded Theory Research: B
Volume Four: Exemplars of Situational Analysis Research

SAGE BENCHMARKS IN SOCIAL RESEARCH METHODS

Ever since its conception some 40 years ago, consumer research has been the channel through which innovations in social science, social and cultural theory and the arts have entered the marketing discipline. With each transformation and interjection of new ideas, discourses and approaches, consumer research has also translated a whole tradition of language and identity, gender, multilingualism and intercultural communication, to name a few. In its deft construction and careful balance of thematic volumes, this truly multidisciplinary set represents the wealth of contemporary research in the field and the contribution conversation analysis’s methodology has made to an increasing range of substantive areas of research.

Volume One: Social Action and Epistemics
Volume Two: Responses
Volume Three: Identities in Interaction
Volume Four: Institutions and Applications

CONSUMER RESEARCH METHODS

Edited by James Fitchett and Andrea Davies both at University of Leicester (UK)

Ever since its conception some 40 years ago, consumer research has been the channel through which innovations in social science, social and cultural theory and the arts have entered the marketing discipline. With each transformation and interjection of new ideas, discourses and approaches, consumer research has also translated a whole tradition and variety of method into marketing theory and research practice. This collection offers a comprehensive and illuminating overview of the main methods used in consumer research and outlines the main theoretical, conceptual and historical debates that are relevant to the area. It highlights the full range of methodological considerations, from questionnaire design through to analyzing qualitative data, as well as discussing the progression and development of the field from its initial conception as a relatively coherent and unified subdiscipline through to the diverse community of methods today.

VIRTUAL RESEARCH METHODS

Four-Volume Set

Edited by Christine Hine
University of Surrey (UK)

Despite a number of handbooks and textbooks published in recent years there is still a dearth of authoritative works which offer comprehensive coverage of the virtual research methods available to social researchers. In particular, there is none which thoroughly explores the full range of virtual research methods and their antecedents, and which explores the methodological and epistemological ramifications of their development. This multivolume reference collection fills this gap.

The collection covers: perspectives on the Internet as a social space; research models for the Internet and the skills, techniques and approaches needed to conduct research in a virtual environment; innovations in the research process and reflections on these innovations; and the ethical considerations to take into account when doing research on the Internet.

TEXTUAL ANALYSIS

Four-Volume Set

Edited by Martin W. Bauer
London School of Economics and Political Science (UK), Aude Bicquelet and Ahmet Suerdem
London School of Economics (UK)

This four-volume major work mines the extensive research into textual analysis of the past few decades. The set’s esteemed team of editors brings together seminal papers which consider the key difference between content analysis and textual analysis, the conceptual starting point and the logic and the attitude of the research process, as well as exploring the tension between reading a text and using a text, amongst other key topics. With experienced and respected figures in the field at the helm, the carefully selected papers in this collection are put into context and analyzed in a newly written introductory chapter charts the developments and looks to the future of the field.

EXPERIMENTAL DESIGN IN
THE BEHAVIORAL AND
SOCIAL SCIENCES

Four-Volume Set
Edited by Sandra Schneider
University of South Florida

Experimental Design in the Behavioral
and Social Sciences includes articles,
primarily from scholarly journals, that highlight
perspectives of recognized leaders on historical,
theoretical, methodological and pragmatic considerations affecting
the role of experimental designs within the behavioral and social
sciences. The selected articles are problem-focused, include
illustrative examples and provide comprehensible input for a broad
audience spanning multiple disciplines. Taken together, the articles
provide an advanced understanding of the flexibility and limitations
of experimental designs in the social/behavioral context. The articles
raise awareness of the basic assumptions, theoretical perspectives
and empirical findings that fundamentally shape the progress of
experimental research in the behavioral and social sciences.

THE SAGE HANDBOOK OF QUALITATIVE DATA ANALYSIS
Edited by Uwe Flick Free
University of Berlin, Germany

This exciting new handbook is the first to provide a state-of-the-art overview of general analytic strategies and approaches specific for different types of qualitative data. The proliferation of analytic strategies - such as grounded theory, content analysis, hermeneutics, phenomenology and narrative analysis - is complemented by new trends like mixed methods, re-analysis and meta-analysis. The handbook addresses these new trends, along with the growing range of data used across disciplines: from interviews, focus groups, conversations, documents and observations to video, film, images, sounds, media, virtual data and discourses.

THE SAGE HANDBOOK OF HISTORICAL THEORY
Edited by Nancy Partner McGill
University of Oxford (UK)
Sarah Foot

This handbook introduces the foundations of modern historical theory and the applications of theory to a full range of subfields of historical research, bringing the reader as up to date as possible with continuing debates and current developments. The handbook brings together, in one volume, discussions of modernity, empiricism, deconstruction, narrative and postmodernity in the continuing evolution of the historical discipline into our post-postmodern era. Chapters are written by leading academics from around the world and cover a wide array of specialized areas of the discipline, including social history, intellectual history, gender, memory, psychoanalysis and cultural history. The influence of major thinkers such as Jacques Derrida, Michel Foucault and Hayden White is fully examined.

THE SAGE HANDBOOK OF CHILD RESEARCH
Edited by Gary B. Melton University of Colorado Denver School of Medicine, Asher Ben-Arieh Hebrew University of Jerusalem, Israel, Judith Cashmore University of Sydney (AU), Gail S. Goodman University of California, Davis and Natalie K. Worley Clemson University

This authoritative handbook takes its lead from a number of key assumptions on the subject of research methods for child-related research. These include, to name but a couple of examples: the importance of recognizing the significance of the different contexts in which children find themselves in determining the nature of appropriate research methods; and the importance of having clear ethical guidelines and standards governing the research activities of those involved in research on and with children. Accommodating basic principles such as these, this handbook aims to provide researchers, practitioners and scholars with an interest in undertaking research with children with a comprehensive and definitive manual.

RESEARCHING GENDER
Four-Volume Set
Edited by Christina Hughes
University of Warwick (UK)
Researching Gender is an authoritative, four-volume reference of major works in the field of feminist methodologies. International and interdisciplinary in scope, the collection draws on perspectives from across the social sciences and humanities. The full range of feminist political, ethical and epistemological approaches to methodology from the second wave through to contemporary concerns is included. An introductory essay to each volume provides a guide to the development of this field and its future directions. These will define key concepts, summarize debates and introduce major themes and “turns”.

CASE STUDY METHODS IN EDUCATION
Four-Volume Set
Edited by Gary Thomas
University of Birmingham (UK)
This four-volume major work collates and contextualizes key papers on the use of case study in education. The collection brings together methodological publications and publications which provide exemplars of case study. The methodological material provides both critical analyses of case study and those which champion its use, offering at the same time a chronological map of the development of case study from its earliest uses to today. Framed by introductory passages in each volume which seek to provide a synopsis of the methodological discussion and a commentary on the exemplary material, this set provides for serious students in education original source material to appraise the method together with exemplary sample material to help them plan and organize their case studies.

Volume One: Methodological issues around the use of case studies in social science
Volume Two: Methodological issues around the use of case studies in education
Volume Three: The case study in practice - general issues and specific examples

RESEARCHING SOCIAL GERONTOLOGY
Four-Volume Set
Edited by Malcolm P. Cutchin Wayne State University, Candace L. Kemp Georgia State University and Victor W. Marshall University of North Carolina
Social gerontology draws upon a wide base of disciplines such as sociology, geography, anthropology, psychology, and more. The complexity of ageing from a social-gerontology perspective demands a broad range of methodological approaches. Thus, the overarching theme of this collection is methodological - exemplifying the different ways of conducting investigations about the most important issues in ageing studies. Under the expert guidance of a team of respected editors, this four-volume set brings together key contributions to the social scientific study of the ageing process and the places, relationships and institutions that shape that process.

Research Methods
Evaluation is an essential characteristic of the human condition, and perhaps the single most important and sophisticated cognitive process in the repertoire of human reasoning and logic. Evaluation serves society by providing affirmations of worth, value and improvement to name just a few, and is a process which permeates all areas of human activity, scholarship and production.

This new four-volume major work brings together key works on the highly interdisciplinary topic of evaluation research methods, including papers on recent developments in the field and carefully selected international literatures.

Case Study Methods in Business Research
Four-Volume Set
Edited by Albert J. Mills St Mary’s University, Halifax, Canada and Gabrielle Durepos St. Francis Xavier University, Antigonish, Nova Scotia
Case studies are one of the most popular approaches to business and management research. By bringing together research accounts from various research traditions, this collection is unique within the field. Over four volumes, the editors focus on central themes in the subject over time, before moving on to selected cases from positivist, interpretivist and critical approaches, and finishing with a look at traditions of the ‘post’.

THE SOCIAL HISTORY OF THE AMERICAN FAMILY

An Encyclopedia
Four-Volume Set
Edited by Lawrence H. Ganong and Marilyn J. Coleman
University of Missouri, Columbia

The American family has come a long way from the days of the idealized family portrayed in iconic television shows of the 1950s and 1960s. The four volumes of The Social History of the American Family explore the vital role of the family as the fundamental social unit across the span of American history. Experiences of family life shape so much of an individual’s development and identity, yet the patterns of family structure, family life and family transition vary across time, space and socioeconomic contexts. Both the definition of who or what counts as family and representations of the ‘ideal’ family have changed over time to reflect changing mores, changing living standards and lifestyles, and increased levels of social heterogeneity.

Available in both digital and print formats, this carefully balanced academic work chronicles the social, cultural, economic and political aspects of American families from the colonial period to the present. Key themes include families and culture (including mass media), families and religion, families and the economy, families and social issues, families and social stratification and conflict, family structures (including marriage and divorce, gender roles, parenting and children, and mixed and non-modal family forms), and family law and policy.

Key features:
• Approximately 600 articles, richly illustrated with historical photographs and color photos in the digital edition, provide historical context for students.
• A collection of primary source documents demonstrate themes across time.
• The signed articles, with cross references and further readings, are accompanied by a reader’s guide, chronology of American families, resource guide, glossary and thorough index.

THEORY IN SOCIAL AND CULTURAL ANTHROPOLOGY

An Encyclopedia
Two-Volume Set
Edited by R. Jon McGee and Richard L. Warms Texas State University

Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the ‘who, what, where, how, and why’. These two volumes provide users with the most thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. Key features include:

• 335 signed entries that provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage;
• an appendix with a chronology of anthropology theory that allows students to easily chart directions and trends in thought and theory from early times to the present;
• suggestions for further reading at the end of each entry and a master bibliography at the end that guide readers to sources for more detailed research and discussion.

CULTURAL SOCIOLOGY OF DIVORCE

An Encyclopedia
Three-Volume Set
Edited by Robert E. Emery University of Virginia

While the formal definition of divorce may be concise and straightforward (legal termination of a marital union, dissolving bonds of matrimony between parties), the effects are anything but, particularly when children are involved. The Americans for Divorce Reform estimates that ‘40 or possibly even 50 percent of marriages will end in divorce if current trends continue.’

This multi-disciplinary encyclopedia covers curricular subjects related to divorce as examined by disciplines ranging from marriage and the family, to anthropology, social and legal history, developmental and clinical psychology, and religion, all through a lens of cultural sociology.

This encyclopedia is purposefully interdisciplinary, the goal being to convey a clear sense of how philosophy looks at the social sciences and thereby delineate a detailed picture of how exactly the two are interrelated. Though the theme of this relationship has had its own history and received some academic treatment in the past, there are now fast-developing novel areas at the interface between philosophy and certain modern areas of social-scientific research spawning out of AI and cognitive studies and their subfields that demand a totally new and rather more complex perspective. It is becoming increasingly apparent that both traditional philosophical branches (like the philosophy of mind) as well as traditional social-scientific ones get linked up to each other via such developments in the area of cognition that have outmoded, old-fashioned, rigid divisions between the humanities and social sciences. At the same time, advances in social-scientific research, such as rational choice theory, statistical or stochastic models of decision-making or mathematical modeling of action, have in turn impacted philosophy.

ENCYCLOPEDIA OF DECEPTION
Two-Volume Set

Edited by Timothy R. Levine Korea University, South Korea

The Encyclopedia of Deception examines lying from multiple perspectives drawn from the disciplines of social psychology, sociology, history, business, political science, cultural anthropology, moral philosophy, theology, law, family studies, evolutionary biology, philosophy and more.

From the 'little white lie,' to lying on a resume, to the grandiose lies of presidents, this two-volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives. Not only a cultural phenomenon historically, lying is a frequent occurrence in our everyday lives. Research shows that we are likely to lie or intentionally deceive others several times a day or in one out of every four conversations that lasts more than 10 minutes.

Key features:

- More than 360 entries authored by key figures in the field are organized A-to-Z in two volumes, which are available in both print and electronic formats.
- Entries are written in a clear and accessible style that invites readers to explore and reflect on the use of lying and self-deception.
- Each article concludes with cross references to related entries and further readings.

This academic, multi-author reference work will serve as a general, non-technical resource for students and researchers within social and behavioral science programs.

At no point in recorded history has there been an absence of intense, and heated, discussion about the subject of how to conduct relations between women and men. This handbook provides a comprehensive guide to these issues and debates, mapping the present and future of thinking about feminist theory.

The handbook presents the state of the art in scholarship in this field, covering epistemology and marginality; literary, visual and cultural representations; sexuality; the macro and microeconomics of gender; and conflict and peace. The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been (and are) organized. This handbook asks us, across all disciplines and situations, to abandon our taken-for-granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism.

Social deviance—any behavior that violates a cultural norm—can involve something as major as crime or as minor as consistently and deliberately wearing lively mismatched socks. Whether a crime, a sin, or simply unique taste, what is considered deviant at one time and place can change, as when extensive tattooing and “body art” evolved from a sideshow carnival spectacle to a nearly universal rite of passage within U.S. culture. Drawing contributions from across the social and behavioral sciences, including sociology, anthropology, criminology, politics, psychology and religion, the Encyclopedia of Social Deviance introduces readers to the lively field of rule-making and rebellion that strikes at the core of what it means to be an individual living in a social world.

Key features:
• More than 300 articles authored by key figures in the field are organized A-Z in two volumes.
• Each article concludes with cross-references to related entries and further readings.
• A thematic Reader’s Guide groups related articles by broad areas (e.g., concepts, theories, research methodologies, individual deviance, organizational deviance etc.) as one handy search feature on the e-reference platform, which also includes a comprehensive index of search terms.

Available in both electronic and print formats, this two-volume, A-to-Z encyclopedia set is a must-have resource for students and researchers who seek to understand social deviance.
