KEY CONCEPTS IN GEOGRAPHY

Second Edition

Edited by Nicholas Clifford University of Nottingham, Sarah Holloway, Stephen P Rice both at Loughborough University and Gill Valentine University of Sheffield

The bestselling, standard student resource for undergraduate students, this book explains the key terms - from space, time and place to landscape, nature and globalization - that define the language of geography.

THE DATA REVOLUTION

Big Data, Open Data, Data Infrastructures and Their Consequences

Rob Kitchin National University of Ireland, Maynooth

A data revolution is underway, one that is already reshaping how knowledge is produced, business conducted and governance enacted. The Data Revolution provides a synoptic and critical analysis of the emerging data landscape. Accessible in style, the book provides:

• an introduction to thinking conceptually about data, data infrastructures, data analytics and data markets
• a critical discussion of the technical shortcomings and the social, political and ethical consequences of the data revolution
• an analysis of the implications of the data revolution to academic, business and government practices.

CONTENTS

Conceptualizing Data / Small Data, Data Infrastructures and Data Brokers / Open and Linked Data / Big Data / Enablers and Sources of Big Data / Data Analytics / The Governmental and Business Rationale for Big Data / The Reframing of Science, Social Science and Humanities Research / Technical and Organizational Issues / Ethical, Political, Social and Legal Concerns / Making Sense of the Data Revolution

“What difference does it make?” In one form or another, that question is at the core of virtually all social science research. This book reverses the lens and asks, “What differences do social sciences and scientists themselves make on public policy and how?” The answers found here offer thought-provoking insights for academics and researchers interested in how the methods and findings of social science can transmit from the cloisters of academia to the real world of policy impact.

- Brian Baird, Former Member of Congress, President, Antioch University Seattle

This key study demonstrates the essential role of university social science in the ‘human-dominated’ and ‘human-influenced’ systems now central to our civilization. It focuses empirically on Britain, the second most influential country for social science research after the US. Using in-depth research the authors show how the growth of a services economy, and the success of previous scientific interventions, mean that key areas of advance for corporations, public policy-makers and citizens alike now depend on our ability to understand our complex societies and economies. This is a landmark study in the evidence-based analysis of social science impacts.

CONTENTS

A STUDENT’S INTRODUCTION TO GEOGRAPHICAL THOUGHT
Theories, Philosophies, Methodologies
Pauline Couper

This ‘ism’-busting text is an accessible account of the key philosophical ideas that have informed geographical research. It makes the abstract theory explicit and connects theory with the real practices of geographical research and knowledge. Uniformly structured chapters which explain the key ideas:

- use examples that address both physical geography and human geography
- use a familiar and real-world example - ‘the beach’ - as an entry point to basic questions of philosophy
- include boxed summaries and suggested further reading, along with exercises and commentaries.

CONTENTS
Introduction: Geographers at the Beach / Positivism / Critical Rationalism / Marxism and Critical Realism / Phenomenology and Post-Phenomenology / Social Constructionism and Feminism / Structuralism, Post-Structuralism and Postmodernism / Chaos and Complexity / Moral Philosophy and Ethics / Return to the Beach: ‘Human Geography’ and ‘Physical Geography’

AN INTRODUCTION TO SCIENTIFIC RESEARCH METHODS IN GEOGRAPHY AND ENVIRONMENTAL STUDIES
Second Edition
Daniel Montello University of California, Santa Barbara
and Paul Sutton University of Denver, Colorado

Montello and Sutton is one of the best texts I’ve used in seminars on research methodology. The text offers a clear balance of quantitative vs. qualitative and physical vs. human which I’ve found particularly valuable.... Unlike many recent surveys and anthologies of geographic methodologies, Montello and Sutton provide a comprehensive and integrated overview which will continue to be of value across the entire discipline

- Kenneth E Foote, University of Colorado at Boulder

CONTENTS
KEY METHODS IN GEOGRAPHY

Second Edition

Edited by Nicholas Clifford, Shaun French both at University of Nottingham and Gill Valentine University of Sheffield

The bestselling introduction to the principal methodological issues involved in the collection, analysis and presentation of geographical information. It is unique in the reference literature for providing an overview of qualitative and quantitative methods for both human and physical geography.

NEW EDITION!

STATISTICAL METHODS FOR GEOGRAPHY

A Student’s Guide

Fourth Edition

Peter A Rogerson University of Buffalo

Accessibly written, and focused on student learning, this Fourth Edition is a Statistics 101 with definitions, examples and exercises throughout. Now fully integrated with online self-assessment exercises and video navigation, it explains everything required to get full credits for any undergraduate statistics module. Completely revised and including new material with related exercises and downloadable datasets.

AN INTRODUCTION TO R FOR MAPPING AND SPATIAL ANALYSIS

Chris Brunsdon National University of Ireland, Maynooth and Lex Comber University of Leicester

This book provides an introduction to the use of R for spatial statistical analysis, geocomputation and the analysis of geographical information for researchers collecting and using data with location attached, largely through increased GPS functionality.

Brunsdon and Comber take readers from ‘zero to hero’ in spatial analysis and mapping through functions they have developed and compiled into R libraries. This enables practical R application in GIS, spatial analyses, spatial statistics, mapping, and web-scraping. Each chapter includes:

- example data and commands for exploring it
- scripts and coding to exemplify specific functionality
- advice for developing greater understanding - through functions such as locator(), View(), and alternative coding to achieve the same ends
- self-contained exercises for students to work through
- embeded code within the descriptive text screen grabs.

This is a definitive ‘how to’ that takes students - of any discipline - from coding to actual applications and uses of R.

CONTENTS

Data, Data Types and Plots / Handling Spatial Data in R / Programming in R / Methods for Spatial Analysis / Point Pattern Analysis Using R / Spatial Attribute Analysis with R / Localized Spatial Analysis with R / R and Internet Data

GEOCOMPUTATION

A Practical Primer

Chris Brunsdon National University of Ireland, Maynooth and Alex Singleton University of Liverpool

This text provides a selection of practical examples of geocomputational techniques and ‘hot topics’ written by world-leading practitioners. It integrates supporting materials in each chapter, such as code and data, so that readers can work through the examples themselves.

It has been specifically designed for those readers who are new to geocomputation as an area of research, showing how complex real-world problems can be solved through the integration of technology, data and geocomputational methods. This is the applied primer for geocomputation in the social sciences.

METHODS OF SUSTAINABILITY RESEARCH IN THE SOCIAL SCIENCES

Edited by Frances Fahy and Henrike Rau both at National University of Ireland, Galway

Fahy and Rau’s collection provides useful perspectives on how ‘sustainability’ as a term can be opened up conceptually and methodologically. The essays will prove attractive to researchers pursuing interdisciplinary questions on how societal development can be reconciled with the consumption of resources in different regional and economic contexts

- William Jenkins, York University, Canada, GSI Book of the Year panel

VISUAL METHODOLOGIES
An Introduction to Researching with Visual Materials
Third Edition

Gillian Rose  The Open University

Visual Methodologies succeeds both as an introductory text, certain to be widely adopted in the classroom, and as a sophisticated refresher course for those who have followed the rapid maturation of this remarkable interdisciplinary discourse

- Martin Jay, University of California, Berkeley

RESEARCHING THE CITY
A Guide for Students

Edited by Kevin Ward  University of Manchester

An invaluable guide to urban research design. It provides the novice researcher with a wealth of practical advice on theory, methods, writing style, and everything else one needs to know to design and manage a successful urban research project

- Byron Miller, University of Calgary

This practical guide for students focuses on the city and on the different ways to research it. Substantive chapters explain each method in detail, from using archival methods, interviews, ethnography, questionnaires, discourse analysis and diaries, to using GIS and visual methods.

With real-world examples throughout and guided further reading for each chapter, this is an inspiring guide for students carrying out their own research in urban geography, urban planning, urban studies and urban sociology courses.

RESEARCH FOR DEVELOPMENT
A Practical Guide
Second Edition
Sophie Laws Coram, Caroline Harper, Nicola Jones both at Overseas Development Institute and Rachel Marcus Independent Researcher

Has become the “go-to” text for development practitioners, students and researchers alike... comprehensive, authoritative and highly informative. Whether one is seeking a quick definition or brief explanation of a subject, or needing a more detailed guide to how to go about doing research for development, this book is quite simply indispensable

- David Lewis, London School of Economics and Political Science

2013 • 440 pages

FILM AS A RESEARCH METHOD
A Practice-based Guide
Jessica Jacobs Queen Mary, University of London

This applied text provides students and researchers with a practical, step-by-step guide to using film to produce research. Each chapter uses case studies to provide practical advice and recommendations, including advice from film professionals. In two sections on method and on output, this guide explains film as a visual methodology, covering:

- technologies of film - equipment and software
- constructing the sound and the image
- filming - using your camera in the field
- editing - from the first cut to post-production
- impact and the audience.

This highly-informative resource - including web-based materials - provides anyone with a smartphone in their pocket with the tools to use film in their research. From the qualitative issues of film as a method to the practical issues of film as an output, this is the social science researcher’s A-Z.

CONTENTS
PART ONE: THE METHOD / Film as a Visual Research Method / Technologies of Film / Filming (Workflow i) / Editing (Workflow ii) / PART TWO: FILM AS PUBLICATION / Editing to Out (Workflow iii) / Impact and the Audience / Conclusion: Text and the Film

FIELDWORK FOR HUMAN GEOGRAPHY

Richard Phillips University of Sheffield and Jennifer Johns University of Liverpool

Fieldwork is the heart of most geographic endeavours to the extent that it stimulates our passions and pushes us to ask the pithy questions that build disciplinary knowledge. This book provides an excellent introduction to the art and science of fieldwork. It makes clear that fieldwork is not just about getting out of the classroom and gaining first-hand experience of places, it is about instilling passion about those places.

Our understanding of space is crucial to the way in which we understand major social problems and issues and the way we develop and maintain our worldviews.

Building from a history of philosophers’ and geographers’ theories of space, Rob Shields presents the importance of spatialisation and cultural topology in social theory and the possibilities that lie within these theoretical tools.

Innovative and thought-provoking, this book goes beyond traditional ideas of spatiality and temporality, seeking to understand the multiplicity of spatialisations and relate them to the everyday life.

KEY THINKERS ON SPACE AND PLACE

Second Edition

Edited by Phil Hubbard Loughborough University and Rob Kitchin National University of Ireland, Maynooth

A most welcome and expanded version of the original Key Thinkers, this work more than any other guides readers through the complex theoretical landscape of space and place. An outstanding volume that articulates, through analyses of the visionary writings of some of the most important theorists in and beyond geography, the migrations of thought produced around our most important objects of analysis. The contributors excel in this effort

- John-Paul Jones III, University of Arizona

KEY CONCEPTS IN HISTORICAL GEOGRAPHY

John Morrissey National University of Ireland, Galway, David Nally University of Cambridge, Ulf Strohmayer National University of Ireland, Galway and Yvonne Whelan University of Bristol

This book provides a cutting-edge introduction to the central concepts that define contemporary research in historical geography. Involving detailed and expansive discussions, the book includes:

• a succinct overview of the recent developments in the field
• 24 key concepts entries with comprehensive explanations, definitions and evolutions of the subject
• extensive pedagogic features including a glossary, figures, diagrams and further reading.

It covers the expected staples from the discipline - from people, space and place to colonialism and geopolitics - in an accessible style. Written by an internationally recognized set of authors, it is an essential addition to any geography student’s library.

KEY CONCEPTS IN HUMAN GEOGRAPHY

February 2014 • 328 pages
Cloth (978-1-4129-3043-7)
Paper (978-1-4129-3044-4)
This wonderfully unconventional book demonstrates human geography’s character and significance not by marching through traditional themes, but by presenting a set of geographical essays on basic ideas, practices, and concerns... It challenges readers to think in new ways and to recognize the sophistication, reach, and possibility of human geographic inquiry

- Alexander B Murphy, University of Oregon

Published in association with the journal, Progress in Human Geography, edited and written by the principal scholars in the discipline, the Handbook demonstrates the difference that thinking about the world geographically makes. Each section considers how human geography shapes the world, interrogates it, and intervenes in it.

A key reference for any scholar interested in questions about what difference it makes to think spatially or geographically about the world, this Handbook is a rich and textured statement about the geographical imagination.

KEY CONCEPTS IN MIGRATION

David Bartram University of Leicester, Maritsa V Poros City University of New York and Pierre Monforte University of Leicester

Demonstrates that the study of international migration has really come of age. From acculturation to undocumented immigration, the authors consider more than three dozen concepts at the heart of migration studies

- Nancy Foner, City University of New York

Written by a leading team of experts, this book provides lucid and intuitive explanations of the most important migration concepts as used in classrooms, among policy makers, and in popular and academic discourse. Arguing that there is a clear need for a better public understanding of migration, the book sets out to clarify the field by providing readers with relevant concepts in a direct and engaging way. Each concept:

• includes an easy-to-understand definition
• provides real-world examples
• gives suggestions for further reading
• is carefully cross-referenced to other related concepts.

URBAN THEORY
A critical introduction to power, cities and urbanism in the 21st century

Alan Harding University of Liverpool and
Talja Blokland Humboldt University of Berlin

Harding and Blokland address the vaunted ‘crisis’ in urban theory with a thoughtful assessment of extant theories in terms of performance, commensurability, and critical engagement. In a conversational and lively tone, they view theories of inequality, public space, identity, power, agency, and culture through the lens of ‘relaxed urban theory. An excellent overview for scholars and engaging classroom material

- Susan E Clarke, University of Colorado at Boulder

What is Urban Theory? How can it be used to understand our urban experiences? Experiences typically defined by enormous inequalities, not just between cities but within cities, in an increasingly interconnected and globalised world. This book explains:

• relations between urban theory and modernity in key ideas of the Chicago School, in spatial analysis, humanistic urban geography, and ‘radical’ approaches such as Marxism
• cities and the transition from industrial to informational economies, globalization, the importance of urban growth machine and urban regime theory
• spatial expressions of inequality and key ideas like segregation, ghettoization, suburbanization, gentrification, and “neighbourhood effects”
• socio-cultural spatial expressions of difference and key concepts like gender, sexuality, race, ethnicity, age, public space, lifestyle and subculture.

Critical, interdisciplinary and pedagogically informed, Urban Theory provides the tools for any student of the city to understand, even to change, our own urban experiences.

CITIES AND ECONOMIC CHANGE

Edited by Ronan Paddison University of Glasgow and Tom Hutton University of British Columbia

This textbook combines a sound theoretical grounding with an empirical overview of the urban economy. Specific references are made to key emergent processes and debates including splintered labour markets, informal economies, consumption, a comparative discussion of North and South, and quantitative aspects of globalization. The text is clear and readable with pedagogical features and illustrative case studies integrated throughout, including questions for discussion at the end of main chapters together with suggested readings and key websites.

CITIES AND SOCIAL CHANGE
Encounters with Contemporary Urbanism

Edited by Ronan Paddison University of Glasgow and Eugene McCann Simon Fraser University

Edited by leading scholars in the field and containing an eminent, international cast of contributors, this book provides a critical analysis of the key thinkers, themes and paradigms dealing with the relationship between the built environment and urban life. It is also pedagogically informed with illustrative case studies, questions for discussion, suggestions for further reading and web links.

An essential resource for students looking to get to grips with the different theoretical and substantive approaches that make up the diverse and rich study of urban life.

CITIES IN A WORLD ECONOMY
Fourth Edition

Saskia Sassen Columbia University

The Fourth Edition of Cities in a World Economy shows how certain characteristics of flows of money, information, and people have led to the emergence of a new social formation: global cities, new types of migrations, financial crises, environmental catastrophes, and the multiplication of communication technologies. These developments give new meaning to such fixtures of urban sociology as the centrality of place and the importance of geography in our social world.

SOCIIOLOGY FOR A NEW CENTURY SERIES

2011 • 424 pages
Paper (978-1-4129-8803-2)
This innovative volume offers a much-needed update on urban politics in a globalized world... Davidson and Martin, as well as contributors, chart new territory and produce thought-provoking research that moves the field in a more critical direction

- Setha M Low, City University of New York

A critical analysis of power and politics is essential to an understanding of contemporary urbanism. Informative and challenging, clear and sophisticated, Urban Politics encourages readers to grapple with the great diversity of analytical lenses that frame urban political research through detailed, engaging case studies

- Eugene McCann, Department of Geography, Simon Fraser University

This is a highly readable and challenging discussion of contemporary urban politics in a geographical context. A sound theoretical grounding is provided alongside an extensive thematic overview. This unique approach links classical, institutional urban politics with a broader set of urban politics and practices.

THE BASICS OF GEOMORPHOLOGY

Key Concepts

Kenneth J Gregory University of Southampton and John Lewin

This student-focused book provides a detailed description and analysis of the key concepts, ideas and hypotheses that inform geomorphology. Kenneth J Gregory and John Lewin explain the basics of landform science in 20 concepts, each the subject of a substantive, cross-referenced entry. They use the idea of the ‘geomorphic system’ to organize entries into four sections, with extensive web resources provided for each.

Aligned with the teaching literature, this innovative text provides a fully functioning learning environment for study, revision and even self-directed research for both undergraduate and postgraduate students of geomorphology.

ENCYCLOPEDIA OF URBAN STUDIES
Two-Volume Set
Edited by Ray Hutchison University of Wisconsin, Green Bay
In this urban age, there is clearly a need for such major works as Ray Hutchinson’s excellent Encyclopedia of Urban Studies. A wonderfully rich reference work

- Times Literary Supplement

2010 • 1080 pages
Cloth (978-1-4129-1432-1)

URBAN STUDIES - ECONOMY & SOCIETY
Eight-Volume Set
Edited by Ronan Paddison University of Glasgow
Urban Studies comprises two four-volume sets: i) Economics and ii) Society. These diverse readings map the multidisciplinary nature of the field.

SAGE LIBRARY URBAN STUDIES
2010 • 3328 pages
Cloth (978-1-84787-892-2)
HUMAN GEOGRAPHY

Five-Volume Set

Edited by Derek Gregory University of British Columbia, Vancouver and Noel Castree University of Wollongong

This five-volume collection provides a map for anyone seeking to reconnoitre the landscape of human geography today.

FUNDAMENTALS OF GEOGRAPHY

2011 • 2136 pages
Cloth (978-1-4129-0369-1)

COMPLETE GREEN SERIES BUNDLE

The SAGE Reference Series on Green Society

Edited by Paul Robbins University of Arizona

This collection provides a vital and broad-ranging resource on environmental sociology in a 12-volume reference series of nearly 1,700 entries available in both print and electronic formats.

THE SAGE REFERENCE SERIES ON GREEN SOCIETY: TOWARD A SUSTAINABLE FUTURE

2011 • 6736 pages
Cloth (978-1-4129-6273-5)

21ST CENTURY GEOGRAPHY

A Reference Handbook

Two-Volume Set

Edited by Joseph P Stoltman Western Michigan University

Via approximately 80 entries, the SAGE 21st Century Reference Series on geography highlights the most important topics, issues, questions and debates any student obtaining a degree in this field needs to have mastered for effectiveness in the 21st century.

2011 • 920 pages
Cloth (978-1-4129-7464-6)
PROGRESS IN HUMAN GEOGRAPHY

Managing Editor: Noel Castree University of Wollongong

Sarah Elwood University of Washington, Rob Kitchin NUI Maynooth, Chris Philo University of Glasgow, Sue Roberts University of Kentucky, Kristian Stokke University of Oslo

Progress in Human Geography is the peer-review journal of choice for those wanting to know about the state of the art in all areas of human geography research - philosophical, theoretical, thematic, methodological or empirical. Concerned primarily with critical reviews of current research, PIHG enables a space for debate about questions, concepts and findings of formative influence in human geography.

Impact Factor: 4.489

Ranking: 2 out of 72 in Geography

DIALOGUES IN HUMAN GEOGRAPHY
Managing Editor: Rob Kitchin National University of Ireland, Maynooth
John-Paul Jones III University of Arizona, Lily Kong National University of Singapore, Richard Le Heron University of Auckland, Ugo Rossi University of Turin, Barney Warf University of Kansas
The primary aim of Dialogues in Human Geography is to stimulate open and critical debate on the philosophical, methodological and pedagogic foundations of geographic thought and praxis. It publishes articles, with responses, which seek to critique present thinking and praxis and set the agenda for future avenues of geographic thought, empirical research and pedagogy.
