***JOURNAL OF PSYCHOPHARMACOLOGY* RENEWS TEN-YEAR AGREEMENT WITH SAGE**

Los Angeles, London, New Delhi, and Singapore (August 28, 2007) — The British Association for Psychopharmacology (BAP) announced today that it has renewed its contract with SAGE to publish the *Journal of Psychopharmacology* until 2016. The agreement renews a ten-year partnership between BAP and SAGE, which has published the journal on behalf of the society since 1997. SAGE publishes over 460 scholarly journals in the social sciences and science, technology, and medicine (STM).

The fully peer-reviewed, international *Journal of Psychopharmacology* publishes original research and review articles on preclinical and clinical aspects of psychopharmacology. Published six times a year, the journal provides an essential forum for researchers and practicing clinicians on the effects of drugs on animal and human behavior, and the mechanisms underlying these effects.

“SAGE has been a reliable and supportive publishing partner for the past ten years, delivering excellent levels of editorial and production service,” commented journal editor David Nutt. “SAGE offers us a flexible, open partnership, working closely with our editorial team to reach a wide community of international readers, and attracting consistently high quality submissions.”

“The *Journal of Psychopharmacology* remains one of SAGE’s flagship publications in our flourishing STM program, which now includes over 150 journals in the Health Sciences, Clinical Medicine, Health Research, and Nursing,” added Ziyad Marar, SAGE’s Deputy Managing Director. “At SAGE we strive to be the natural home for authors, editors and societies, and we’re committed to building long-lasting relationships with our partners. We’re delighted to be extending our partnership with the BAP, and look forward to working with them to grow and develop the journal in line with the changing publishing environment over the next decade.”

###

SAGE Publications is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology and medicine. A privately owned corporation, SAGE has principal offices in Los Angeles, London, New Delhi, and Singapore. www.sagepublications.com
