**SAGE PUBLICATIONS AND MANEY PUBLISHING EXCHANGE JOURNALS
CHRONIC ILLNESS AND JOURNAL OF ENDOTOXIN RESEARCH EXCHANGED
WITH COMPARATIVE AMERICAN STUDIES**

Los Angeles, London, New Delhi, and Singapore (March 28, 2007) — As a way to complement their portfolios, SAGE Publications and Maney Publishing have completed an exchange of three of their journals. In this unprecedented agreement, the Maney journals *Chronic Illness* and *Journal of Endotoxin Research* have been exchanged for the SAGE journal *Comparative American Studies*.

"*Chronic Illness* and the *Journal of Endotoxin Research* complement SAGE's existing list of over 460 academic and professional journals," commented Stephen Barr, SAGE Publications Managing Director. "We look forward to working with both the International Endotoxin and Innate Immunity Society and the editors of the journals for their continuing success and development."

"Our new global list now includes 113 journals across the health sciences," he continued. "We have an excellent international mix of medical titles, which continue to reinforce our reputation as the natural home for authors, editors and societies, on a global scale. And while we have enjoyed publishing *Comparative American Studies* since 2003, we believe that Maney will be in a better position to develop it in the future."

Michael Gallico, managing director of Maney Publishing, is pleased with the exchange. "We are delighted to add *Comparative American Studies* to our humanities list," he said. "It will broaden our existing language and literature collection to cover American studies, which is hugely important as Maney's presence continues to grow in the US."

###

SAGE Publications is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology and medicine. A privately owned corporation, SAGE has principal offices in Los Angeles, London, New Delhi, and Singapore. www.sagepublications.com

Founded in 1900, **Maney Publishing** has offices in the UK and in Cambridge, Massachusetts. With a collection of over 70 journals in materials sciences, the humanities, and healthcare, Maney is committed to publishing high quality, peer-reviewed, international print and electronic journals for learned societies, universities and professional bodies. www.maney.co.uk

Comparative American Studies extends scholarly debates about American Studies beyond the geographical boundaries of the US, repositioning discussions about American culture within an international, comparative framework. Covering literature, film, popular culture, photography and the visual arts, attention is also given to history, the social sciences and politics.

Chronic Illness explores the common principles of the experience and management of chronic illness. Publishing high-quality original research, it informs practice and policy relating to chronic illness providing insight into the experiences of people living with long-term medical conditions.

Journal of Endotoxin Research, from the International Endotoxin and Innate Immunity Society (IEIIS), disseminates new information on endotoxin and innate immunity to researchers in chemistry, microbiology, molecular biology, immunology, cell biology, pharmacology, infectious disease and clinical medicine.
