**VISION AND ROBOTICS – A UNIQUE CONTRIBUTION FROM SAGE AND SPRINGER
JOINT SPECIAL ISSUE FROM *INTERNATIONAL JOURNAL OF ROBOTICS RESEARCH*
AND *INTERNATIONAL JOURNAL OF COMPUTER VISION***

Los Angeles, London, New Delhi, and Singapore – (July 20, 2007) SAGE and Springer have launched a landmark joint-special issue between *The International Journal of Robotics Research* and *International Journal of Computer Vision* to bring together ground breaking research from both the Robotics and Computing communities.

This ground-breaking agreement supports both SAGE and Springer's desire to offer boundless access to research in these important fields. As a result, both publishers will be offering free access to this issue online for perpetuity.

Fourteen original research papers, divided between the two journals, highlight the importance of the interaction between computers and vision, and provide an ideal briefing for researchers on the latest developments at the interface of the two fields. Subjects covered include vision-based navigation, vision-based control and human-robot interaction.

The joint-special issue is available online now and is free to access.

Read the computer vision papers in IJCV in the September 2007 issue www.springerlink.com/content/1573-1405

Read the robotics papers in IJRR in the July 2007 issue <http://ijr.sagepub.com/content/vol26/issue7/>

###

Notes to Editors

All 14 articles in the two journals are free to access. Visit www.springerlink.com/content/1573-1405 and <http://ijr.sagepub.com/content/vol26/issue7/> to access content.

International Journal of Robotics Research is published by SAGE.

International Journal of Computer Vision is published by Springer.

SAGE is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology and medicine. An independent company, SAGE has principal offices in Los Angeles, London, New Delhi, and Singapore. www.sagepub.co.uk

Springer (www.springer.com) is the second-largest publisher of journals in the science, technology, and medicine (STM) sector and the largest publisher of STM books. It publishes on behalf of more than 300 academic associations and professional societies. Springer is part of Springer Science+Business Media, one of the world's leading suppliers of scientific and specialist literature. The group publishes over 1,700 journals and more than 5,500 new books a year, as well as the largest STM eBook Collection worldwide. Springer has operations in over 20 countries in Europe, the USA, and Asia, and some 5,000 employees.
