**SAGE PARTNERS WITH THE TEXAS STATE UNIVERSITY SYSTEM
TO PROVIDE SAGE'S ONLINE JOURNALS TO PARTICIPATING SCHOOLS**

Los Angeles, London, New Delhi, and Singapore – (April 25, 2007) SAGE Publications and the Texas State University System (TSUS) have signed a three-year agreement to make SAGE's online journals available to participating institutions.

With the new agreement, 74,000 students and 3,500 faculty members at six participating schools in the Texas State University System, as well as Stephen F. Austin State University, will have access to over 400 journals via *SAGE Premier*, complete with backfile to 1999. The journals are available on SAGE's online platform, *SAGE Journals Online*, which was recently enhanced with new features and functionality.

"Although each TSUS school is unique, all have the same need to provide their students with quality, full-text research resources," commented Paivi Rentz, Electronic Resources Librarian, Texas State University-San Marcos. "The addition of these high-quality SAGE journals will provide the users with a superior research experience – something that's an integral part of a comprehensive education."

"The Texas State University System has a long and illustrious history in Texas, and it's not surprising that they've decided to enrich their students' research experience by adding SAGE's prestigious journals to their offerings," added Tom Taylor, SAGE Vice President of Marketing and Sales. "They're joining other distinguished consortia across the country that have discovered the richness of the information available in *SAGE Premier*."

###

SAGE Publications is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology, and medicine. A privately owned corporation, SAGE has principal offices in Los Angeles, London, New Delhi, and Singapore. www.sagepublications.com

The Texas State University System is the oldest multi-campus system in Texas. It plays a critical role in the educational and economic development of the state and its nine component institutions are committed to serving the people of Texas through education. <http://www.tsus.edu/>
