**GAIN FULLER INSIGHT INTO THE COMPLEX CHALLENGES OF THE HUMAN  
CONDITION WITH SAGE REFERENCE'S *ENCYCLOPEDIA OF SOCIAL PROBLEMS***

*Los Angeles, London, New Delhi, and Singapore (May 2008)* — SAGE Reference's unprecedented ***Encyclopedia of Social Problems*** is the first single reference work to offer comprehensive, multi-disciplinary coverage of all of the interconnected social issues in our lives, whether we confront them on a personal, local, national, or global level.

Written by experts and scholars from a wide range of specialties, the ***Encyclopedia of Social Problems*** contains 600+ A-to-Z entries that examine all of the major theories, approaches, applications, and contemporary issues related to social problems. Providing an easy-to-use approach to this vast and complicated topic, the content is organized in a helpful Reader's Guide into key themes, such as:

- Aging and the Life Course
- Crime and Defiance
- Economics and Work
- Housing and Urbanization
- Population and Environment
- Poverty, Class and Inequality
- Race and Ethnic Relations
- Substance Abuse

The ***Encyclopedia of Social Problems*** also includes a complete analysis of social issues related to community, politics, education, family, and health. How social conditions get defined as social problems is examined as well as the ways different people and organizations view them and try to solve them.

All public and academic libraries will want SAGE's ***Encyclopedia of Social Problems*** on their reference shelves so that students, scholars, and professionals have access to the rich treasure of information and insights contained in this premier reference tool, covering virtually any social problem.

General Editor Vincent N. Parrillo is a professor of sociology at the William Paterson University of New Jersey.

**SAGE** is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology and medicine. A privately owned corporation, SAGE has principal offices in Los Angeles, London, New Delhi, and Singapore. [www.sagepublications.com](http://www.sagepublications.com)
