**SAGE REFERENCE'S COMPREHENSIVE, NEW  
ENCYCLOPEDIA OF HEALTH SERVICES RESEARCH  
IS THE LARGEST WORK EVER PUBLISHED ON THIS  
EXPLODING FIELD OF STUDY**

*Los Angeles, London, New Delhi, Singapore, and Washington, D.C. (February 18, 2009)*—Why does America spend more on healthcare than any other nation but still have a high infant-mortality rate and a low life expectancy compared to other industrialized nations? The rapidly growing, multidisciplinary field of health services research answers this critical question and more.

SAGE Reference's monumental, new, two-volume *Encyclopedia of Health Services Research* is the only single reference source to cover comprehensively this diverse, complex field. An expert team of health services researchers have focused on the access, costs, quality, and outcomes of healthcare to create an enduring resource. Its highly accessible, A-to-Z entries present biographies of the field's current and past leaders; health services associations, foundations, and research organizations; and major concepts and topics. Cross-cultural, racial, and international differences are examined in both historical and contemporary contexts, and a helpful Reader's Guide organizes the wealth of content into key categories, including the following:

- Disease, Disability, Health & Health Behavior`
- Government & International Healthcare Organizations
- Health Professionals & Healthcare Organizations
- Laws, Regulations & Ethics
- Measurement, Data Sources & Coding, and Research Methods
- Policy Issues, Healthcare Reform & International Comparisons
- Special & Vulnerable Groups

All public and academic libraries will be certain to add SAGE's essential print and/or electronic formats of *Encyclopedia of Health Services Research* to offer general readers, students, scholars, and professionals access to its state-of-the-art information.

Editor **Ross M. Mullner** is Associate Professor of Health Policy Administration at the University of Illinois at Chicago, Special Assistant to the Director of the Illinois Department of Healthcare and Family Services, and Visiting Adjunct Associate Professor in the Department of Health Systems Management at Rush University.

**SAGE** is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students spanning a wide range of subject areas including business, humanities, social sciences, and science, technology and medicine. A privately owned corporation, SAGE has principal offices in Los Angeles, London, New Delhi, Singapore, and Washington, DC. [www.sagepublications.com](http://www.sagepublications.com)
