**SAGE REFERENCE'S GROUNDBREAKING NEW
ENCYCLOPEDIA OF ANTHROPOLOGY
HARNESSES THE WORLD'S MOST ALL-ENCOMPASSING DISCIPLINE**

"This monumental encyclopedia makes an astonishing contribution to our understanding of human evolution, human culture, and human reality through an inclusive global lens."

– From the Foreword, Biruté Mary F. Galdikas, *Camp Leakey, Bornea, Indonesia*

Thousand Oaks, CA, USA (August 22, 2005) – Like air, we humans frequently take culture for granted. We ignore its influence on our thoughts, beliefs, and actions. Even in this era of global communication, we routinely interpret what we see through our own local cultural lens. This is why anthropology is so important. It illuminates and explains the continuum of human biological and cultural evolution, while acknowledging and addressing its limits.

SAGE Reference's stunning new five-volume *Encyclopedia of Anthropology* is the most comprehensive, up-to-date and accessible resource on anthropology available. A unique collection of 1200+ entries focusing on topics in physical anthropology, archaeology, cultural anthropology, linguistics, and applied anthropology, its far reach also extends into the fields of geology, paleontology, biology, evolution, sociology, psychology, philosophy, and theology.

Presenting important facts, concepts, methods, hypotheses, and perspectives comprising modern anthropology and its related disciplines, special attention is given to:

- human evolution
- primate behavior
- genetics
- ancient civilizations
- socio-cultural theories
- the value of human language for symbolic communication

Authored by over 300 internationally renowned experts from some of the most distinguished museums, universities, and institutes in the world, the *Encyclopedia of Anthropology* is an essential reference work for any library with collections in anthropology, as well as the natural sciences, social sciences, and humanities.

Editor H. James Birx is on the faculty at Canisius College, SUNY Geneseo, and the University of Montana-Western.
