**UNDERSTAND THE WESTWARD PATHS IN SAGE REFERENCE'S
ENCYCLOPEDIA OF IMMIGRATION AND MIGRATION IN THE AMERICAN WEST**

Thousand Oaks, CA, USA (November 1, 2005) – The American West has become home to wave after wave of migrants and immigrants. One of the largest influxes of new peoples to the West was in 1848, when the California gold rush made the region the most cosmopolitan place in the known world – all in just a few months.

SAGE Reference's pioneering new release, the [*Encyclopedia of Immigration and Migration in the American West*](#) examines the settlement of America's West like no other resource available. Not only do its two A-to-Z volumes comprehensively present the tapestry of the heterogeneous region called "the West" along with its population during various periods of migration, they also highlight the relationship between the migrants and the new place they called home.

Focusing on much more than ethnic groups crossing the plains, landing at ports, and crossing borders, this unique resource provides in-depth coverage on the movements of American Indians, African Americans, and the often-forgotten role of women in the West's development. Readers also discover how the peopling of the American West played a crucial role in the building of its infrastructure, cities, and neighborhoods, via:

- * sweeping entries
- * focused biographies
- * community histories
- * economic enterprise analyses
- * demographic studies
- * coverage of immigration law

A welcome addition to all public and academic libraries, SAGE's [*Encyclopedia of Immigration and Migration in the American West*](#) delivers new insight into the history of the American West.

Co-editor Gordon Morris Bakken is Professor of History at California State University, Fullerton. Co-editor Alexandra Kindell is a doctoral candidate at Iowa State University.
