SAGE CONTRIBUTES JOURNALS TO DEVELOPING WORLD RESEARCH INITIATIVE

INASP and SAGE team up to provide online access to hundreds of SAGE's publications for research institutions in developing countries.

Thousand Oaks, CA and London, UK (September 1, 2005) – SAGE Publications is delighted to announce the signing of an agreement with the International Network for the Availability of Scientific Publications (INASP) for 2006. Under the terms of the agreement, SAGE will provide online access to more than 300 SAGE journals to research institutions in 66 of the world's less developed countries, either free of charge or for greatly subsidized rates.

This agreement was arranged via the Programme for the Enhancement of Research Information (PERI), an INASP initiative. This program supports capacity building in the research sector of developing countries by strengthening the production, access and dissemination of information and knowledge.

For a full list of countries whose researchers will benefit from this agreement with SAGE, see the INASP website at <http://www.inasp.info/peri/countries.shtml>.

"The objectives of the PERI program fit closely with SAGE's core company values, which aim to support the dissemination of teaching and research on a global scale," commented Stephen Barr, Managing Director of SAGE UK. "We are delighted to have been invited to participate in this important program."

About SAGE:

SAGE Publications (www.sagepub.com) is a leading international publisher of journals, books, and electronic media for academic, educational, and professional markets. Since 1965, SAGE has helped inform and educate a global community of scholars, practitioners, researchers, and students. SAGE Publications, a privately owned corporation, has principal offices in Thousand Oaks, California; London, United Kingdom; and New Delhi, India.

About INASP:

INASP (www.inasp.info) was established in 1992 by the International Council for Science (ICSU) to improve access to information and knowledge through a commitment to capacity building in emerging and developing countries. Initially based within the International African Institute, the organization moved to its own premises in Oxford UK in June 1996.
