SAGE PUBLICATIONS GOES ROMEO GREEN

Thousand Oaks, California, USA and London, United Kingdom (October 5, 2004) - SAGE Publications is pleased to announce its improved author self-archiving copyright policy as part of its ongoing commitment to provide the highest standards of service and support to authors. This new policy makes SAGE Publications a Green publisher according to the SHERPA/ROMEO Publisher Copyright classification.

"As a leading publisher across many disciplines, we have always had a mission to disseminate knowledge and to serve authors. While we have been letting authors archive their own copy on request for some time, we have now decided to make our policy more straightforward," said Anthony Ross, Vice President, Content Management. "We will be encouraging authors who archive their own copy to include a link to the published version of the article as it appears on our new journal delivery platform: SAGE Journals Online, <http://online.sagepub.com>."

This improved policy comes into effect immediately and applies to all journals where SAGE is responsible for author copyright policy. It allows authors to self-archive their own copy pre-print (i.e. submitted), and their own copy post-print (i.e. accepted for publication).

Please visit: <http://www.sherpa.ac.uk/romeo.php> for more information on the SHERPA/ROMEO listings.

For additional information regarding this policy or other SAGE policy statements, please contact Leo Walford (leo.walford@sagepub.co.uk) or Carol Richman (carol.richman@sagepub.com).

Please see the individual journal homepages on www.sagepublications.com for full details.
