World Journal for Pediatric and Congenital Heart Surgery
Information for Authors

Editorial Office
E-mail: wjpchs@comcast.net
Website: http://wjpchs.sagepub.com
Electronic submission: http://mc.manuscriptcentral.com/wjpchs

Please address all non-Internet correspondence to:
Marshall L. Jacobs, MD
Editor, World Journal for Pediatric and Congenital Heart Surgery
Center for Pediatric and Congenital Heart Diseases
Cleveland Clinic
9500 Euclid Avenue, Cleveland, Ohio 44195, USA
Or: Virginia F. Hawkins
Managing Editor, World Journal for Pediatric and Congenital Heart Surgery
2455 Teller Road, Thousand Oaks, CA 91320, USA
Telephone: 302-326-9313
Fax: 302-326-9450

General Information
Electronic submission is mandatory at http://mc.manuscriptcentral.com/wjpchs.

World Journal for Pediatric and Congenital Heart Surgery (WJPCHS) is a quarterly, peer-reviewed scientific publication dedicated to the advancement and dissemination of knowledge pertaining to congenital cardiac anomalies, pediatric heart diseases in general, and surgical management in particular.

World Journal for Pediatric and Congenital Heart Surgery publishes original reports of clinical and/or basic scientific investigations and observations relevant to the surgical and medical care and management of patients with congenital heart disease, as well as features such as case reports, “how to do it” articles, image reports, new technology evaluations, review articles, historical reviews, book reviews, invited editorials, correspondence, and commentary. In addition to publishing reports of original scientific and clinical observations and investigations, WJPCHS provides a forum for individuals and organizations interested in advancing the mission of the World Society for Pediatric and Congenital Heart Surgery: “to promote the highest quality comprehensive cardiac care to all patients with pediatric and/or congenital heart disease, from the fetus to the adult, regardless of the patient’s economic means, with an emphasis on excellence in education, research and community service.”

All manuscripts, correspondence, and editorial material must be submitted via the online submission site at http://mc.manuscriptcentral.com/wjpchs. Authors must register with an e-mail address and password to submit manuscripts online. Unregistered authors can create a new account (ie, register) by following the instructions on the login screen at the above address.

Two or more referees are assigned to review each full length original article. Acceptance is based upon significance and originality as well as validity of the material submitted and interest to the readers of WJPCHS. If an article is accepted for publication, editorial revisions may be made to enhance clarity and understanding without altering the meaning.

Each submission should include a cover letter, indicating the category of article (see below), and the complete manuscript, including title page, abstract, text, tables, acknowledgments, required disclosures (see below), references, and figures. All of this material is submitted via the online submission and review system at http://mc.manuscriptcentral.com/wjpchs.

All authors are expected to adhere to the highest professional and ethical standards. Ethical breaches include scientific misconduct, plagiarism, and redundant publication. A Contributor Agreement, which includes the exclusive license to publish the article, disclosures of individual conflicts of interest, sources of funding, scientific responsibility, freedom of investigation, and undisclosed authors, must be signed. Illustrative work (art, drawings, and photographs) may not be separately copyrighted. The corresponding author of an accepted paper will receive directions for submitting the Contributor Agreement electronically. The completed form must be received by the editorial office before an accepted paper is sent to the publisher.
General Information for Submitting and Formatting Manuscripts

Submit manuscripts, prepared in Microsoft Word, through the online submission and review site. Enter the Author Center and follow the instructions for submitting a complete manuscript. Guidelines specified in the American Medical Association Manual of Style 10th edition should be followed.

Manuscripts should be typed double-spaced throughout (including title page, abstract, text, references, tables, and legends) with 1-inch (2.5-cm) margins all around.

Arrange the main document of the manuscript as follows: (1) title page, (2) abstract, (3) text, (4) supplementary files description, (5) acknowledgments, (6) disclosures if required, (7) references, (8) tables, and (9) figure legends. Number pages consecutively, beginning with the title page as page 1 and ending with the legend page. Figures will be submitted as individual files.

Microsoft Word is the preferred software program. Manuscripts written in 11-point Arial or Times New Roman fonts are preferred and more reliably convert to PDF files during electronic submission. (Note: Do not submit your manuscript in PDF format because it will cause problems in processing your submission.) American rather than British spelling should be used throughout the manuscript, including within figures.

Word Limits by Category of Manuscript

Original articles should not exceed 5000 words. The counted words include title page, abstract, text, acknowledgments, disclosures, tables, figure legends, and references. The combined total of figures and tables should not exceed 10 and the number of references should not exceed 40. At the discretion of the editor, supplementary material may be submitted for publication in the electronic copy of the journal, which is the version of record, but will not be included in the print journal.

New Technology articles are limited to 2500 words including title page, abstract, text, figure legends, and references. The number of tables should not exceed 3; the number of figures should not exceed 6 if tables are included; 8, if there are no tables. The number of references should not exceed 10.

Case reports and “how to do it” articles are limited to a total of 2000 words including title page, abstract, text, references, and figure legends. These reports should not include tables; if the author deems a table essential, he or she should provide justification for the table in the cover letter. References are limited to 8. A “how to do it” article should be a description of a useful technique and contain descriptive, illustrative material describing the innovation.

Images in Congenital Heart Disease are limited to 500 words including title and text and up to two, possibly 3 figures.

Review articles are limited to 6500 words, including title page, abstract, text, figure legends, and all references. The total number of references should not exceed 80. The editor is willing to discuss more specific guidelines about the subject matter and content of review articles by e-mail.

Historical review articles are limited to 2500 words, including title page, abstract, text, references and figure legends.

Correspondence (Letters to the Editor) and commentaries are limited to 500 words. Do not include tables and subtract 100 words for each illustration.

Editorials are limited to 2500 words including references.

World Society for Pediatric and Congenital Heart Surgery Reports are limited to 4500 words including title page, text, figure legends, and references.

Sections of the Manuscript (items in order from front to back; pages must be numbered)

Title Page (first page)

Title. The title is limited to 100 characters (including spaces). The title may not contain acronyms or abbreviations. All submissions, including correspondence, must have a title.

Running head. Supply a short title of 40 characters (including spaces).

Authors. List all authors by first name, all initials, family name, and highest earned academic degree (eg, MD) or degrees (eg, MD, PhD). Institution and affiliations. List the name and full address of all institutions in which the described work was done. List departmental affiliations of each author affiliated with that institution after each institutional address. Connect authors to departments using numbered superscripts.

Meeting Presentation. If the paper has been or is to be presented at the annual meeting of the World Society for Pediatric and Congenital Heart Surgery or another professional society, provide the name, location, and dates of the meeting.

Keywords. Provide a minimum of 4 keywords, which is available online, to describe the manuscript. Be sure to enter the same keywords when you submit the manuscript.

Word Count. Provide the electronic total word count of the entire manuscript including title page, abstract, text, figure legends, and entire reference list.
Corresponding Author. Provide the name, exact postal address with zip or postal code, telephone number, fax number, and e-mail address of the author to whom communications, proofs, and requests for reprints should be sent after publication. (It does not have to be the same person whom you have designated in the online submission system to handle prepublication correspondence.) The corresponding author must attest that no undisclosed authors contributed to the manuscript.

Abstract (second page)

Original articles. Provide a structured abstract, no longer than 250 words, divided into 4 sections: Background, Methods, Results, Conclusions. Avoid abbreviations and acronyms. Indicate the abstract word count below the abstract.

New Technology. Provide a structured abstract, no longer than 175 words, divided into 4 sections: Purpose, Description, Evaluation, Conclusions. Avoid abbreviations and acronyms. Indicate the abstract word count below the abstract.

Case reports, “how to do it” articles, review articles, and historical review articles. Provide an unstructured abstract of no more than 100 words.

Images, correspondence, commentaries and editorials. No abstract is required.

Text (third page, after the Abstract and continuing through Disclosures)

Text should be organized as follows: Introduction, Material (or Patients) and Methods, Results, and Comment.

Cite references, tables, and figures in numeric order by order of mention in the text.

Avoid abbreviations. Consult the American Medical Association Manual of Style, 10th edition, for recommended abbreviations. Define abbreviations at first appearance in the text. If 8 or more abbreviations or acronyms are used, provide a separate table of abbreviations and acronyms. This table should be submitted on a separate page between the abstract and text pages of the main document.

Measurements and weights should be given in standard metric units.

Statistical Nomenclature and Data Analysis. Methodology for all statistical analysis should be described, and references should be cited. Use of standard tests (chi-square test, Student’s t test, etc) does not require citation of references. Use of proprietary software for statistical analysis should be documented.

Footnotes. Type footnotes at the bottom of the manuscript page on which they are cited.

Suppliers. Credit suppliers of drugs, equipment, and other commercial material mentioned in the article within parentheses in text, giving company name, city and state or city and country.

Supplementary Files Description. See Supplementary Files guidelines below.

Acknowledgments. Grants, financial support and technical or other assistance must be acknowledged at the end of the text before the references. All financial support for the project must be acknowledged and will be printed in the article.

Disclosures and Freedom of Investigation. A disclosure statement is required for all studies, regardless of category of article, which specifies any financial, property, or intellectual aid from a commercial source. The disclosure statement must state the source(s) of all funds used to support the study or to perform the evaluation and whether property or tested technology was purchased, borrowed, or donated to the study. In addition, the authors must state that they had full control of the design of the study, methods used, outcome parameters, analysis of data, and production of the written report. These disclosures are mandatory for all articles, and conflicts of interest statements are published in the article. The Contributor Agreement includes definitions of financial support and freedom of investigation. The existence of undisclosed authors must be declared on the Contributor Agreement and their identity provided to the editorial office.

References (new page)

Identify references in the text using Arabic numerals in brackets on the line (do not use superscripts or EndNote). Do not cite personal communications, manuscripts in preparation, and other unpublished data.

Type references double-spaced after acknowledgments, beginning on a separate page. Number consecutively in the order in which they appear in the text. The references must not be linked to the manuscript with EndNote because that formatting is not compatible with automated publication production processes.

Journal references should provide inclusive page numbers; book references should cite specific page numbers.

Authors are solely responsible for accuracy, completeness, and nonduplication of references.

Journal abbreviations should conform to those used in Index Medicus. The style and punctuation of the references should follow the formats outlined below:

(List all authors if 6 or fewer; otherwise list first 3 and add “et al.”)

Tables should be typewritten double-spaced on separate pages. Do not use vertical lines. Each table should be numbered (Arabic) and have a title above. Legends and explanatory notes should be placed below the table. Abbreviations used in the table follow the legend in alphabetic order. Lower case letter superscripts beginning with “a” and following in alphabetic order are used for notations regarding statistics. Exact P values must be used; “NS” is obsolete.

Tables should be self-explanatory, and the data should not be duplicated in the text or figures. Tables must be created within and submitted as part of the text file and not as figures.

Figure Legends (new page)

Figure legends should be numbered (Arabic) and typed double-spaced in order of appearance beginning on a separate page. Identify (in alphabetical order) all abbreviations appearing in the figures at the end of each legend. Give the type of stain and magnification power for all photomicrographs.

Cite the source of previously published (print or electronic) material in the legend and indicate permission has been obtained. Proof of permission must be scanned and emailed, surface mailed, or faxed to the editorial office once the manuscript is accepted.

Figures

Submit figures online as separate files, which may contain one or more panels of one figure. For each figure file, use the figure number (eg, Figure 1A) as the filename. The system accepts image files formatted in TIFF and EPS. PowerPoint (.ppt) files are also accepted, but for line drawings only. Images should be created in grayscale or CMYK color and have a resolution of at least 300 dpi.

Figures may not be separately copyrighted or have a copyright logo. Illustrations may have a discrete signature of the artist if permitted by the payer of the illustrative work.

Symbols, letters, numbers, and contrasting fills must be distinct, easily distinguished, and clearly legible when the illustration is reduced in size. Use only standard fonts. Most figures will be reproduced at a width of one column (8.25 cm; 3-1/4 inches).

Black, white, and widely crosshatched bars are preferable; do not use stippling, gray fill, or thin lines. Some commercial software generates graphs and plots using multiple colors. It is preferable to submit graphs prepared in black and white to ensure that lines and data points will be easily distinguished in the print version of your article.

Written permission from unmasked patients appearing in photographs must be obtained by the authors and must be scanned and e-mailed, surface mailed, or faxed to the editorial office once the manuscript is accepted. Download an Audio-Visual Likeness Release Form.

Color figures. Figures submitted in color will be published in color in the online version of the journal at no cost. If you wish to have figures printed in color in hard copy, the following fees will apply: $800 for the first, and $200 for each additional color figure within the same article. The authors’ agreement to assume this cost must be indicated by checking the appropriate box on the online submission form. If opting for online-only color, please ensure that (1) the figure legends indicate that the color image is available in the online version of the article, (2) the text is an accurate description of both the black-and-white and color versions of the figure, and (3) the style of lines used for graphing will translate well to a black-and-white printed image.

Original figures. If your manuscript is accepted for publication and the electronic art you have submitted online is not acceptable for reproduction purposes, you may be required to send a set of original figures to the editorial office. You will be instructed accordingly by the staff. Original figures will not be returned.

Audio and Video Files

Authors are encouraged to submit audio/video clips to further illustrate their work. These files will be posted online as supplementary files and permanently linked to articles. Acceptable video file types are QuickTime (.mov), MPEG Movie (.mpg), and Microsoft AVI Video (.avi); acceptable audio files include Windows Media Player (.wma) and MP3 (.mp3). Signed release from all participants in audio and video clips is required. See the Permissions and Releases section below.

Supplementary Files

Supplementary files are supporting material that cannot be included in the printed version for reasons of space or format and that is not essential for inclusion in the full text of the manuscript but would nevertheless benefit the reader. This information should not be essential to understanding the conclusions of the paper but should contain data that is additional or complementary and directly relevant to the article content. Supplementary files will be made available by the publisher as online-only content linked to the online manuscript.

Supplementary files will be subject to the same editorial standards and peer review process as the printed article and must be submitted along with the main manuscript. Supplementary files will not be copyedited so it is important that the data are clearly and succinctly presented and that the style of terms conforms with the rest of the paper. The information
should be submitted in separate files and clearly designated as “Supplementary.” Please ensure that the supplementary data are referred to in the main manuscript at an appropriate point in the text. We also ask that you provide a brief description of the supplementary files. The information you provide will be used to describe supplementary data content and will appear in the print version after the main body of the article.

Permissions and Releases

Material taken directly from a copyrighted source should be clearly identified, and the copyright holder’s written permission to reproduce it must be submitted in a separate file. Note: Obtaining permission to reproduce copyrighted material is the author’s responsibility, as is the payment of any fees the copyright holder may request. Further information and a template Permission Request Letter is available on the Journal Author Gateway (see Obtaining Permissions).

Identifiable audio and visual recordings and images of people should be accompanied by a signed release granting permission for their likeness to be reproduced in an article. (In children’s cases, the release form must be signed by a parent or guardian.) Download an Audio-Visual Likeness Release Form.

Manuscript Revision

Revised manuscripts must be submitted in two parts as word-processing files (PDF files are not acceptable): (1) revised, marked manuscript showing additions and deletions, preferably using strike through format for deletions; (2) revised, unmarked manuscript. A point-by-point response to reviewers’ comments must be pasted into the appropriate field on the submission form.

Manuscript Processing

Each manuscript is assigned a unique number. Receipt of each manuscript is acknowledged by e-mail. The editorial office staff will release information about manuscripts only to authors who provide the manuscript number.

Protection of Human and Animal Subjects

Human Investigation

WJPCHS adheres to the principles of the Helsinki Declaration (http://www.wma.net/e/policy/b3.htm) regarding all reported research conducted with human participants. Reports including data obtained from research conducted with human participants must contain a statement in the Patients and Methods section indicating whether your Institutional Review Board (IRB) (or Ethics Committee or comparable group) approved this study and whether individual consent for the study was obtained or waived. This information should be stated in the first paragraph under Patients and Methods. This policy applies for both prospective and retrospective studies. When this is the case, it must be so stated in the Patients and Methods section. When no formal ethics review process is available, authors must state that informed consent to participate in prospective studies was obtained from each human subject in accordance with relevant guidelines.

Humane Animal Care

When animals are used as subjects, institutional approval of the protocol is necessary and authors should include a statement in the Patients and Methods section indicating that investigators complied with the 1996 “Guide for the Care and use of Laboratory Animals” (see http://www.nap.edu/readingroom/books/labrats/contents.html), recommended by the US National Institutes of Health, or with equivalent guidelines administered by the author’s governmental regulatory body. When no formal ethics review process is available, authors must state that humane care was provided in animal experiments, in accordance with either of the above.

Policies

Scientific Responsibility Statement

Upon submission, the submitting author will be required to attest that each author has participated sufficiently in the work to take responsibility for a meaningful share of the content of the manuscript, and that each author has had full “freedom of investigation” before, during, and after this study. “Freedom of investigation” is defined as freedom from outside interests in controlling the design of the study; freedom in acquisition, collection, analysis, and interpretation of data; and freedom to fully disclose all results.

Exclusive Publication Statement

Upon submission, the submitting author will be required to attest that none of the material in this manuscript has been published previously in either print or electronic form and that none of this material is currently under consideration for publication elsewhere. This includes symposia, transactions, books, articles published by invitation, posting in electronic format, and preliminary publications of any kind except an abstract of 400 words or fewer.

Disclosures: Conflicts of Interest; Sources of Funding:
Scientific Responsibility; and Freedom of Investigation

Individual disclosures will appear on the last page of the final article. Disclosures relating to funding of research appear in the Acknowledgments at the end of the text, before the references. All original scientific articles, editorials, reviews, and New Technology articles must state sources of funding for the work described in the article, within the Acknowledgments. Except for New Technology articles, statements regarding scientific responsibility and freedom of investigation do not appear in the published manuscript but are required of every author on the Contributor Agreement.
author is required to name any undisclosed authors of the manuscript.

Copyright

Authors of articles accepted for publication in *World Journal for Pediatric and Congenital Heart Surgery* must transfer the exclusive license for the World Society for Pediatric and Congenital Heart Surgery and SAGE Publications to publish the entire article, including artwork, photographs, and other matter. SAGE Publications, Inc, maintains copyright records for the World Society for Pediatric and Congenital Heart Surgery. No part of the published material may be reproduced elsewhere without written permission from SAGE Publications, Inc.

NIH Initiative

Although not a requirement, the National Institutes of Health requests that all authors whose paper describes research wholly or in part supported by NIH post the final version of their accepted paper to Pub Med Central: http://www.pubmedcentral.nih.gov within 12 months of publication (http://www.nih.gov/about/publicaccess/Enhanced_Public_Access.pdf). The final version is defined as “the final version accepted for journal publication, and includes all modifications from the publishing peer review process.”

Registration of Clinical Trials

*World Journal for Pediatric and Congenital Heart Surgery* supports mandatory registration of all publicly or commercially funded clinical trials, including Phase 1 and 2 trials, as a condition for publication. Information regarding requirements for registration of a clinical trial may be found at http://www.icmje.org/#clin_trials. Information for registering a clinical trial is available at http://prsinfo.clinicaltrials.gov. The trial registration number should appear at the end of the abstract.

English Language

Authors who want to refine the use of English in their manuscripts might consider using the services of SPi, a nonaffiliated company that specializes in editing and correcting English-language manuscripts written by authors with a primary language other than English. Visit http://www.prof-editing.com for more information. (Please be aware that SAGE has no affiliation with SPi and makes no endorsement of the company. An author’s use of SPi’s services in no way guarantees that his or her submission will ultimately be accepted. Any arrangement an author enters into will be exclusively between the author and SPi, and any costs incurred are the sole responsibility of the author.)
