INFORMATION AND GUIDELINES FOR SUBMISSIONS
Thank you for your interest in submitting a manuscript to the Health Environments Research & Design Journal (HERD). HERD publishes only original works. Manuscripts must not be previously published or under consideration by another publication. Papers published in HERD may not be published again in whole or in part without permission. Please review these guidelines for researching, writing, formatting, and submitting your paper.

HERD features articles and research papers on the relationships among environmental design, health, and organizational, provider, and patient outcomes. As a translational journal linking research to practice, HERD features both rigorous research from academic sources and applied research from practice. Papers on research methods, theory, completed research studies, opinion papers, systematic reviews of literature, meta-analyses, case studies, independent post occupancy evaluations, and critical reviews of new books are accepted. Letters to the editors and responses commenting on articles or research and theory are invited.

MANUSCRIPT REVIEW
HERD adheres to a rigorous double-blind reviewing policy in which the identity of both the reviewer and author are always concealed from both parties. Authors are urged to seek colleague peer review before submitting their manuscripts. Poorly written or formatted manuscripts will not be reviewed.

Manuscript content is assessed for relevance, accuracy, and usefulness to those in healthcare, design, and research settings and for fit with the HERD Mission. Manuscripts will be blind reviewed by at least two peer reviewers, depending on the type of paper. Authors will receive a summary of reviewer comments, and the editors’ recommendation to accept, revise (minor or major) or reject. Articles with a recommendation for revision will require the author(s) to provide a summary of changes. The editors’ final
recommendation to accept or reject will be forwarded to the corresponding author. If your manuscript is accepted for publication, SAGE will require you to complete a Contributor Agreement Form online.

AUTHOR(S) RESPONSIBILITY
All persons designated as authors should have contributed significantly to the conception and writing of the manuscript. Names of those who contributed general support or technical help may be listed in Acknowledgments. Authors are responsible for obtaining written permission to adapt or reprint all material that they did not create themselves or which has been previously published. This includes all material for which the author does not hold the copyright, including art (Photos, Figures, and Tables) and significant textual quotations (exceeding 100 words). Please note that this permission covers reproduction in HERD in all current and future formats.

Papers should only be submitted for consideration once consent is given by all contributing authors. Those submitting papers should carefully check that all those whose work contributed to the paper are acknowledged as contributing authors. The list of authors should include all those who can legitimately claim authorship. This is all those who:

(i) Made a substantial contribution to the concept and design, acquisition of data or analysis and interpretation of data,
(ii) Drafted the article or revised it critically for important intellectual content,
(iii) Approved the version to be published.
Authors should meet the conditions of all of the points above. Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content.

When a large, multicenter group has conducted the work, the group should identify the individuals who accept direct responsibility for the manuscript. These individuals should fully meet the criteria for authorship.

Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship, although all contributors who do not meet the criteria for authorship should be listed in the Acknowledgments section.

Please refer to the International Committee of Medical Journal Editors (ICMJE) authorship guidelines for more information on authorship.
All contributors who do not meet the criteria for authorship should be listed in an
Acknowledgements section. Examples of those who might be acknowledged include a
person who provided purely technical help, or a department chair who provided only
general support.

Individuals who provided writing assistance, e.g. from a specialist communications
company, do not qualify as authors and so should be included in the Acknowledgements
section. Authors must disclose any writing assistance – including the individual’s name,
company and level of input – and identify the entity that paid for this assistance").
It is not necessary to disclose use of language polishing services.

HERD requires all authors to acknowledge their funding in a consistent fashion under a
separate heading. Please visit the Funding Acknowledgements page on the SAGE
Journal Author Gateway to confirm the format of the acknowledgment text in the event of
funding, or state that: This research received no specific grant from any funding agency
in the public, commercial, or not-for-profit sectors.

MANUSCRIPT PREPARATION
Papers must adhere to the style and format described in the Publication Manual of
the American Psychological Association (APA), Sixth Edition (2010) in all respects,
except the Title Page. The Title Page should contain the following information:

- Title of article;
- Name, degrees, job title or position, and affiliation of each author in the order of
  authorship;
- Full contact details for the corresponding author including email, mailing address
  and telephone numbers; Acknowledgment of funding or other support (financial
  and otherwise);
- Keywords: Authors are required to submit at least five (5) keywords for their
  article. Suggested keywords can be found on the SAGE Track website
GENERAL STYLE AND FORMAT

*Page Length:* Manuscripts must be submitted in Microsoft Word, double-spaced in an 8 ½ x 11-inch format with 1-inch margins in Times New Roman 12-point font. Manuscript and references length depends on the type of article, but in general, the text should be approximately 18–20 pages or less, exclusive of the Title Page, Executive Summary of Key Concepts, Abstract, Implications for Practice, References, Photos, Tables, and Figures.

All pages should be numbered consecutively. Text manuscript should contain pull-out quotes, highlighted in bold.

The Title Page, Executive Summary of Key Concepts, Abstract, Manuscript text including references, and Implications for Practice are each submitted as separate files. Each Photo, Figure, and Table must be submitted in a separate, individual file (preferably .jpg, .tif, or .pdf files for Photos or Figures; Word files for Tables).

The author(s) name(s) must not appear anywhere in the abstract or manuscript main text to ensure a fully blind review process.

**Article Types, Keywords, Abstracts, Executive Summary of Key Concepts, and Recommended Lengths**

- Keywords for indexing are required for all manuscripts
- Abstracts must not exceed 250 words
- An Executive Summary of Key Concepts (200 words max) is required for all articles of most types (except Methodology articles, book reviews, and article reviews)
- Articles of most types (except book reviews) require Implications for Practice in bulleted format that identify tips on how the information in the article can be used in practice

The Executive Summary should be a non-technical or non-academic narrative preview of the article, encouraging the reader to become interested in the topic. The Executive Summary should be written for the design or healthcare practitioner. In contrast, the abstract is formal and provides an outlined explanation of the expected standard
components in a paper. They serve different purposes and should not be the same in style or substance.

The number of pages recommended in the following sections includes the manuscript text and references EXCLUDING all tables, figures, title page, abstract, and executive summary.

- **Research paper, 4,500 to 7,000 words (15-20 pages):** The Executive Summary of Key Concepts should not exceed 200 words. The Abstract should not exceed 250 words, but should include five headings: (1) Objective(s), (2) Background, (3) Methods, (4) Results, and (5) Conclusions. Typically, research articles are organized in sections including the introduction, significance, aim or purpose, conceptual or theoretical framework that guides the study, review of the literature, methodology (study design, sample, instruments used to measure the results, data analysis), results, limitations, conclusions, recommendations for future results, and implications for practice. Research studies can be qualitative, quantitative, or mixed methodology.

  A statement must be included in the text about approval for the study from an Institutional Review Board (IRB), administrative approval board, or an ethical committee, and authors should indicate methods used for protecting human subjects' rights or methods of protecting animals. Please review the section below *Protecting Research Subjects*. A hard copy or scanned PDF file of the IRB approval should be submitted as a separate file when submitting your manuscript.

- **Theory paper, 4,500 to 7,000 words (15-20 pages):** The Executive Summary of Key Concepts should not exceed 200 words. The Abstract should not exceed 250 words, with four headings: (1) Aim or Purpose of the paper, (2) Background, (3) Topical Headings, and (4) Conclusions/Recommendations. This type of paper presents a review of theoretical or conceptual models that explain variables of interest, scholarly white papers or manuscripts about healthcare or design innovations, or specific challenges to improve outcomes. The paper should include recommendations and/or implications for practice.
• **Meta-analysis or Metasynthesis, 4,500 to 7,000 words (15-20 pages):** The Executive Summary of Key Concepts should not exceed 200 words. The abstract should not exceed 250 words, and the manuscript should synthesize all studies pertinent to the topic and have a summarizing conclusion with implications for practice.

• **Book review, 600 to 1,200 words:** Book reviews present a scholarly review of a book and your impression of its value to practitioners. Please provide a photo of the cover.

• **Case study, 1,500 to 3,000 words:** The Executive Summary of Key Concepts should not exceed 200 words. The abstract should not exceed 250 words. Case studies should evaluate a particular design methodology in healthcare or healthcare settings. The actual organization or site of the case study must not be included in the text for an appropriate blind review.

• **Methodology paper, 1,900 to 3,000 words:** Methodology manuscripts should focus on qualitative or quantitative research methods for knowledge development or methods for translating existing research into practice for evidence-based design. Please submit your topic of interest in a query letter to either co-editor. (Contact information is included at the end of these guidelines.)

• **Independent post-occupancy evaluation, 1,500 to 3,000 words:** The Executive Summary of Key Concepts should not exceed 200 words. The abstract should not exceed 250 words. Independent post-occupancy evaluations should be third-party evaluations of the strengths or weaknesses of built facilities intended to improve the design of future facilities. This type of manuscript can include recommendations and implications for future practice.

• **Letters to the Editors:** Please send all letters to the editors to nsachs@tamu.edu. These submissions are not handled through the SAGE Track system.
PREPARING YOUR MANUSCRIPT

Word Processing Formats
Preferred formats for the text and tables of your manuscript are Word DOC, RTF, XLS. LaTeX files are also accepted. The text should be double-spaced throughout and with a minimum of 1 inch margins. Text should be standard 10 or 12 point. Word and (La)Tex templates are available on the Manuscript Submission Guidelines page of our Author Gateway.

Artwork, Figures and Other Graphics
For guidance on the preparation of illustrations, pictures and graphs in electronic format, please visit SAGE’s Manuscript Submission Guidelines. Figures supplied in color will appear in color online regardless of whether or not these illustrations are reproduced in color in the printed version. For specifically requested color reproduction in print, you will receive information regarding the costs from SAGE after receipt of your accepted article.

Supplementary Material
This journal is able to host additional materials online (e.g. datasets, podcasts, videos, images, etc.) alongside the full-text of the article. These will be subjected to peer-review alongside the article. For more information please refer to our guidelines on submitting supplementary files, which can be found within our Manuscript Submission Guidelines page.

References
References should be prepared in APA style as described previously, and placed immediately after the body of the article. References should be keyed single-spaced in alphabetical order according to the (first) author’s last name and double-spaced between references. If you use EndNote or some other type of referencing system, please convert the final copy of your paper to a Word document without the EndNote Codes (Convert Citations and Bibliography drop down menu and choose plain text).
English Language Editing Services

Authors seeking assistance with English language editing, translation, or figure and manuscript formatting to fit the journal’s specifications should consider using SAGE Language Services. Visit SAGE Language Services for further information.

PHOTO LICENSE AGREEMENTS AND PERMISSION TO REPRODUCE PHOTOS/ILLUSTRATIONS

It is the author’s responsibility to secure permission for the use of photos or illustrations that come from another source. The permission email or letter should be uploaded in the submittal process as a separate file. It is also the author’s responsibility to obtain written permission to reproduce material that has appeared in another publication, including the author’s own writings that may have been previously published. Please note: If portions of your paper or article have been published elsewhere, the copyright belongs to that publisher or organization, even though you are the author. If you wish to use any or all of that content in your HERD submission, you must obtain written permission to reproduce those excerpts.

All relevant forms should be submitted concurrent with initial manuscript submission. No article can be published unless all pertinent permissions have been secured.

FUNDING

HERD requires all authors to acknowledge their funding in a consistent fashion under a separate heading. Please visit the Funding Acknowledgements page on the SAGE Journal Author Gateway to confirm the format of the acknowledgment text in the event of funding, or state that: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

Publication Ethics

SAGE is committed to upholding the integrity of the academic record. We encourage authors to refer to the Committee on Publication Ethics’ International Standards for Authors and view the Publication Ethics page on the SAGE Author Gateway.
**Plagiarism**

*HERD* and SAGE take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. We seek to protect the rights of our authors and we always investigate claims of plagiarism or misuse of articles published in the journal. Equally, we seek to protect the reputation of the journal against malpractice. Submitted articles may be checked using duplication-checking software. Where an article is found to have plagiarized other work or included third-party copyright material without permission or with insufficient acknowledgement, or where authorship of the article is contested, we reserve the right to take action including, but not limited to: publishing an erratum or corrigendum (correction); retracting the article (removing it from the journal); taking up the matter with the head of department or dean of the author’s institution and/or relevant academic bodies or societies; banning the author from publication in the journal or all SAGE journals, or appropriate legal action.

**Open Access and Author Archiving**

*HERD* offers optional open access publishing via the SAGE Choice program. For more information please visit the [SAGE Choice website](http://www.sagepub.com/choice). For information on funding body compliance, and depositing your article in repositories, please visit SAGE Publishing Policies on our Journal Author Gateway.

**Permissions**

Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere. For further information including guidance on fair dealing for criticism and review, please visit our Frequently Asked Questions on the SAGE Journal Author Gateway

**NOTICE OF COMPLIANCE WITH NIH GRANTS AND CONTRACTS POLICY**

In April 2008, a federal law was passed mandating that all articles funded by the National Institutes of Health (NIH) be submitted to PubMed Central within 12 months of publication. It remains the responsibility of the author(s) to fulfill this legal obligation. For information on how to do this, please see the NIH Policy on Public Access at [http://publicaccess.nih.gov/](http://publicaccess.nih.gov/). If your study or manuscript was funded by NIH, please mention the NIH award and grant number in an acknowledgment.
Disclosing Conflicts of Interest
It is the policy of HERD to require a declaration of conflicting interests from all authors enabling a statement to be carried within the paginated pages of all published articles. Please ensure that a ‘Declaration of Conflicting Interests’ statement is included at the end of your manuscript, after any acknowledgements and prior to the references. If no conflict exists, please state that ‘The Author(s) declare(s) that there is no conflict of interest’.

For guidance on conflict of interest statements, please see the ICMJE recommendations here.

Contributor’s Publishing Agreement
Before publication, SAGE requires the author as the rights holder to sign a Journal Contributor’s Publishing Agreement. SAGE’s Journal Contributor’s Publishing Agreement is an exclusive licence agreement which means that the author retains copyright in the work but grants SAGE the sole and exclusive right and licence to publish for the full legal term of copyright. Exceptions may exist where an assignment of copyright is required or preferred by a proprietor other than SAGE. In this case copyright in the work will be assigned from the author to the society. For more information please visit our Frequently Asked Questions on the SAGE Journal Author Gateway.

Protecting Human Subjects*
Medical research involving human subjects must be conducted according to the World Medical Association Declaration of Helsinki.

Submitted manuscripts should conform to the ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals, and all papers reporting animal and/or human studies must state in the methods section that the relevant Ethics Committee or Institutional Review Board provided (or waived) approval. Please ensure that you have provided the full name and institution of the review committee, in addition to the approval number.

For research articles, authors are also required to state in the methods section whether participants provided informed consent and whether the consent was written or verbal.
Identifying details should be omitted if they are not essential. Complete anonymity is difficult to achieve; however, informed consent should be obtained if there is any doubt. For example, masking the eye region in photographs of patients is inadequate protection of anonymity. If identifying characteristics are altered to protect anonymity, such as in genetic pedigrees, authors should provide assurance that alterations do not distort scientific meaning and editors should so note. The informed consent should be indicated in the published article.

*International Committee of Medical Journal Editors (“Uniform Requirements for Manuscripts Submitted to Biomedical Journals”), February 2006

SUBMISSION CHECKLIST
Before electronically submitting your manuscript to HERD SAGE Track please check the following:

☐ Is the manuscript and reference list in MS Word with a .doc or .docx file extension?
  Are the manuscript pages numbered consecutively?
☐ Is the manuscript text double-spaced in 12-point Times New Roman?
☐ Is there a 1-inch margin all around?
☐ Does your text manuscript **highlight pull-out quotes in bold**?
☐ Have you eliminated all information that identifies the author(s) and/or study (e.g., facility name and location) from the manuscript? (This is to facilitate the blind review process; such information may be added after peer review.)
☐ Have you supplied the following as separate Word files: Title Page, Executive Summary of Key Concepts, Abstract, Manuscript main text, Tables, and Implications for Practice?
☐ Does your Title Page include title of article; each author’s name, degree(s), title, and affiliation in order of authorship; telephone and e-mail for corresponding author; acknowledgment of funding or other support; disclosure of any conflicts of interest; and five or more keywords?
☐ For research papers, is the Abstract no more than 250 words and does it include Objective, Background, Methods, Results, and Conclusions?
☐ For theory papers, is Abstract is no more than 250 words and does it include Aim or Purpose; Background; topical headings; and Conclusions/Recommendations?
☐ Does your manuscript contain a bulleted list of Implications for Practice?
☐ Does your manuscript conform to APA style (6th Edition)?
☐ Are References in APA style, single-spaced, and in alphabetical order according to the first author’s last name, and double-spaced between references?
☐ Are Tables or other illustrative text materials in a 10-point sans serif font (Calibri or Arial), and ready to be submitted as separate Word files?
☐ Are you supplying artwork, photographs, or other images (“Figures”) as separate, high-resolution (300dpi) files in .TIF or .JPEG format?
☐ Does your manuscript length conform to the recommended word count for the type of article you are submitting?
☐ Have you supplied all written permissions to reprint copyrighted material (more than 100 words) that you quote in the text?
☐ Have you supplied written permission to reproduce or adapt any illustrations or photos that come from another source? Have you identified photographers and supplied model releases from identifiable people in photos?
☐ Have you disclosed potential conflicts of interest by submitting the International Committee of Medical Journal Editors' disclosure form?
☐ Have you uploaded your IRB approval or other documentation of protection of human subjects?

**ELECTRONIC MANUSCRIPT SUBMISSION**

*HERD* is hosted on SAGE Track, a web based online submission and peer review system powered by ScholarOne™ Manuscripts. Visit [https://mc.manuscriptcentral.com/herd](https://mc.manuscriptcentral.com/herd) to login and submit your article online.

Please create your own account as instructed by SAGE Track and the system will guide you through the article submission process. You should have the electronic files listed in the checklist above ready to copy and paste into SAGE Track ([https://mc.manuscriptcentral.com/herd](https://mc.manuscriptcentral.com/herd)).

**IMPORTANT:** Please check whether you already have an account in the system before trying to create a new one. If you have reviewed or authored for the journal in the past year it is likely that you will have had an account created. For further guidance on submitting your manuscript online please visit ScholarOne Online Help.
ON ACCEPTANCE AND PUBLICATION

SAGE Production
Your SAGE Production Editor will keep you informed as to your article’s progress throughout the production process. Proofs will be sent by PDF to the corresponding author and should be returned promptly.

Access to your Published Article
SAGE provides authors with online access to their final article.

Online First Publication
Online First allows final revision articles (completed articles in queue for assignment to an upcoming issue) to be published online prior to their inclusion in a final journal issue which significantly reduces the lead time between submission and publication. For more information please visit our Online First Fact Sheet

CONTACT INFORMATION
Correspondence or questions concerning HERD submissions may be directed to the individuals listed below:
