Please read the guidelines below, then visit VRD’s manuscript submission site https://mc.manuscriptcentral.com/jvrd to upload your submission electronically. Please note that manuscripts not conforming to these guidelines may be returned.

Only manuscripts of sufficient quality that meet the aims and scope of VRD will be reviewed.

As part of the submission process you will be required to warrant that you are submitting your original work, that you have the rights to the work, that you are submitting the work for first publication in the journal and that it is not being considered for publication elsewhere and has not already been published elsewhere, and that you have obtained and can supply all necessary permissions for the reproduction of any copyright works not owned by you.

7. Further information

1. Article types

*Journal of VitreoRetinal Diseases* welcomes the following article types: Reviews of the Literature, Original Research, Case Reports, Letters to the Editor, Editorials, Retinal Controversies: Pro and Con.

Please note that all abstracts should be no more than 250 words; all full length research and review articles should be no more than 4,000 words. Case Reports may be up to 2,000 words; 150 word abstracts. Editorials and Letters should be 1500 words, no abstract.
2. EDITORIAL POLICIES

2.1 Peer review policy
Submit all articles via Manuscript Central: \[http://mc.manuscriptcentral.com/jvrd\], *Journal of VitreoRetinal Diseases* ....Only original papers written in American English will be accepted. An editing service, SAGE language services, (including translation from Spanish, Portuguese or Chinese) is available from the publisher, SAGE; use of this service does not guarantee acceptance of the paper by the journal. Manuscripts submitted to *Journal of VitreoRetinal Diseases* are evaluated by the editorial staff. If the manuscript is potentially suitable, peer reviewers are normally selected by the Associate Editor. *Journal of VitreoRetinal Diseases* operates a conventional single-blind reviewing policy in which the reviewer’s name is always concealed from the submitting author.

Acceptance of a manuscript for publication is determined by the Editor and Associate Editor based on the peer review, scientific merit and value to readers. This decision may be made in consultation with other editorial staff and/or the Editorial Board. When re-submitting a manuscript, indicate changes in the manuscript in red font (enabling editors and reviewers to readily identify the alterations in the manuscript). Authors must include a response letter that addresses each of the reviewer’s and editor’s comments, in order. Reviewer’s comments should be taken as constructive criticisms by experts in the subject area, and reviews lead to substantial improvement in the quality of scientific manuscripts.

2.2 Authorship
Papers should only be submitted for consideration once consent is given by all contributing authors. Those submitting papers should carefully check that all those whose work contributed to the paper are acknowledged as contributing authors.

The list of authors should include all those who can legitimately claim authorship. This is all those who:

(i) Made a substantial contribution to the concept or design of the work; or acquisition, analysis or interpretation of data,

(ii) Drafted the article or revised it critically for important intellectual content,

(iii) Approved the version to be published,

(iv) Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Authors should meet the conditions of all of the points above. When a large, multicentre group has conducted the work, the group should identify the individuals who accept direct responsibility for the manuscript. These individuals should fully meet the criteria for authorship.

Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship, although all contributors who do not meet the criteria for authorship should be listed in the Acknowledgments section. Please refer to the International Committee of Medical Journal Editors (ICMJE) authorship guidelines for more information on authorship.

2.3 Acknowledgements
All contributors who do not meet the criteria for authorship should be listed in an Acknowledgements section. Examples of those who might be acknowledged include a person who provided purely technical help, or a department chair who provided only general support.

2.3.1 Writing assistance
Individuals who provided writing assistance, e.g. from a specialist communications company, do not qualify as authors and so should be included in the Acknowledgements section. Authors must disclose any writing assistance – including the individual’s name, company, and level of input – and identify the entity that paid for this assistance.
It is not necessary to disclose use of language polishing services.

FOR SINGLE BLIND JOURNALS: Any acknowledgements should appear first at the end of your article prior to your Declaration of Conflicting Interests (if applicable), any notes, and your References.

2.4 Funding
Journal of VitreoRetinal Diseases requires all authors to acknowledge their funding in a consistent fashion under a separate heading. Please visit the Funding Acknowledgements page on the SAGE Journal Author Gateway to confirm the format of the acknowledgment text in the event of funding, or state that: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

2.5 Declaration of conflicting interests

It is the policy of VRD to require a declaration of conflicting interests from all authors enabling a statement to be carried within all published articles. Please ensure that a ‘Declaration of Conflicting Interests’ statement is included at the end of your manuscript, after any acknowledgements, and prior to the references. If no conflict exists, please state: “The Author(s) declare(s) that there is no conflict of interest.”

For guidance on conflict of interest statements, please see the ICMJE recommendations here.

2.6 Research ethics and patient consent

Medical research involving human subjects must be conducted according to the World Medical Association Declaration of Helsinki.

Submitted manuscripts should conform to the ICMJE Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals, and all papers reporting animal and/or human studies must state in the methods section that the relevant Ethics Committee or Institutional Review Board provided (or waived) approval. Please ensure that you have provided the full name and institution of the review committee, in addition to the approval number.

For research articles, authors are also required to state in the methods section whether participants provided informed consent and whether the consent was written or verbal.

Information on informed consent to report individual cases or case series should be included in the manuscript text. A statement is required regarding whether written informed consent for patient information and images to be published was provided by the patient(s) or a legally authorized representative.

Please also refer to the ICMJE Recommendations for the Protection of Research Participants.

2.7 Reporting guidelines

The relevant EQUATOR Network reporting guidelines should be followed depending on the type of study. For example, all randomized controlled trials submitted for publication should include a completed Consolidated Standards of Reporting Trials (CONSORT) flow chart as a cited figure, and a completed CONSORT checklist as a supplementary file.

Other resources can be found at NLM’s Research Reporting Guidelines and Initiatives.

3. Publishing Policies
3.1 Publication ethics
SAGE is committed to upholding the integrity of the academic record. We encourage authors to refer to the Committee on Publication Ethics’ International Standards for Authors and view the Publication Ethics page on the SAGE Author Gateway.

3.1.1 Plagiarism
Journal of VitreoRetinal Diseases and SAGE take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. We seek to protect the rights of our authors and we always investigate claims of plagiarism or misuse of published articles. Equally, we seek to protect the reputation of the journal against malpractice. Submitted articles may be checked with duplication-checking software. Where an article, for example, is found to have plagiarised other work or included third-party copyright material without permission or with insufficient acknowledgement, or where the authorship of the article is contested, we reserve the right to take action including, but not limited to: publishing an erratum or corrigendum (correction); retracting the article; taking up the matter with the head of department or dean of the author’s institution and/or relevant academic bodies or societies; or taking appropriate legal action.

3.1.2 Prior publication
If material has been previously published it is not generally acceptable for publication in a SAGE journal. However, there are certain circumstances where previously published material can be considered for publication. Please refer to the guidance on the SAGE Author Gateway or if in doubt, contact the Editor at the address given below.

3.2 Contributor’s publishing agreement
Before publication, SAGE requires the author as the rights holder to sign a Journal Contributor’s Publishing Agreement. SAGE’s Journal Contributor’s Publishing Agreement is an exclusive licence agreement which means that the author retains copyright in the work but grants SAGE the sole and exclusive right and licence to publish for the full legal term of copyright. Exceptions may exist where an assignment of copyright is required or preferred by a proprietor other than SAGE. In this case copyright in the work will be assigned from the author to the society. For more information please visit our Frequently Asked Questions on the SAGE Journal Author Gateway.

3.3 Open access and author archiving
VRD offers optional open access publishing via the SAGE Choice program. For more information please visit the SAGE Choice website. For information on funding body compliance, and depositing your article in repositories, please visit SAGE Publishing Policies on our Journal Author Gateway.

3.4 Permissions
Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere. For further information including guidance on fair dealing for criticism and review, please visit our Frequently Asked Questions on the SAGE Journal Author Gateway.

4. PREPARING YOUR MANUSCRIPT

4.1 Word processing formats
Preferred formats for the text and tables of your manuscript are Word DOC, RTF, XLS. LaTeX files are also accepted. The text should be double-spaced throughout and with a minimum of 3cm for left and right hand margins and 5cm at head and foot. Text should be standard 10 or 12 point. Word and (La)TeX templates are available on the Manuscript Submission Guidelines page of our Author Gateway.

4.2 Structured abstracts
Abstracts should be structured with the following elements: Purpose, Methods, Results, and Conclusions, and should not exceed 250 words (≤150 words for Brief Communications and Case Reports).

4.3 Arrangement of sections
The general arrangement of sections of the manuscript at submission should be as follows:
• Title page (with Author Information)
• Abstract
• Keywords
• Introduction
• Methods
• Results
• Conclusions
• Acknowledgements
• References
• Figure legends
• Tables (submit as separate files—see more information about submitting tables below)

4.4 Artwork, figures, and other graphics
For guidance on the preparation of illustrations, pictures, and graphs in electronic format, please visit SAGE’s Manuscript Submission Guidelines.

Figures supplied in color will appear in color online regardless of whether or not these illustrations are reproduced in color in the printed version. For specifically requested color reproduction in print, you will receive information regarding the costs from SAGE after receipt of your accepted article.

Tables should not be embedded images or pdfs. They should be editable, and should be in either Word or Excel format.

4.5 Supplementary material
This journal is able to host additional materials online (e.g. datasets, podcasts, videos, images etc) alongside the full-text of the article. These will be subjected to peer-review alongside the article. However, these materials are not edited in any way by SAGE and should arrive fully edited and ready for publication. Please use the word “Supplemental” or “Supplementary” in the file name. For more information please refer to our guidelines on submitting supplementary files: Manuscript Submission Guidelines.

4.6 Reference style
Authors are required to follow the 10th edition of the American Medical Association Manual of Style. References should be formatting according to AMA 10th. Please ensure that references are numbered and cited in order of appearance throughout the text. Please be aware that references which are changed after submission require extensive re-ordering and re-working of the paper, so please attempt to have the references complete and final at submission.

4.7 English language editing services
Authors seeking assistance with English language editing, translation, or figure and manuscript formatting to fit the journal’s specifications should consider using SAGE Language Services.

5. Submitting your manuscript

5.1 How to submit your manuscript
Journal of VitreoRetinal Diseases is hosted on SAGE Track, a web-based online submission and peer review system powered by ScholarOne Manuscripts. Visit https://mc.manuscriptcentral.com/jvrd and create an account. Then submit your article.

IMPORTANT: Please check whether you already have an account in the system before trying to create a new one. If you have reviewed or authored for the journal in the past year, it is likely that you will have had an account created. For further guidance on submitting your manuscript online, please visit ScholarOne Online Help.

5.2 Title, keywords and abstracts
Please supply a title, short title, an abstract and keywords to accompany your article. The title, keywords and abstract are key to ensuring readers find your article online through online search engines such as Google.
Please refer to the information and guidance on how best to title your article, write your abstract and select your keywords by visiting the SAGE Journal Author Gateway for guidelines on How to Help Readers Find Your Article Online.

5.3 Corresponding author contact details
Provide full contact details for the corresponding author including email, mailing address, and telephone numbers. Academic affiliations are required for all co-authors. These details should be presented separately to the main text of the article to facilitate anonymous peer review. Please ensure that spelling of all author names and affiliations is up-to-date and correct.

6. ON ACCEPTANCE AND PUBLICATION

6.1 SAGE Production
Your SAGE Production Editor will keep you informed as to your article’s progress throughout the production process. Proofs will be sent by PDF to the corresponding author and should be returned promptly. Authors are reminded to check their proofs carefully to confirm that all author information, including names, affiliations, sequence and contact details are correct, and that Funding and Conflict of Interest statements, if any, are accurate.

6.2 Access to your published article
A downloadable pdf should be sent to the corresponding author upon online publication. If you do not receive the link to the pdf, please notify the SAGE Production Editor, after first checking with the corresponding author.

6.3 Online First publication
Online First allows final revision articles (completed articles in queue for assignment to an upcoming issue) to be published online prior to their inclusion in a final journal issue which significantly reduces the lead time between submission and publication. For more information please visit our Online First Fact Sheet.

7. FURTHER INFORMATION
Any correspondence, queries, or additional requests for information on the manuscript submission process should be sent to the VRD Peer Review Associate: Aaina.Dhawan@sagepub.in.
