Minimum required image resolution is 300 dpi for color or grayscale images and 900-1200 dpi for line art (1-bit) images. All color files must be created and submitted to publisher in **CMYK** color mode. Publisher will convert ads submitted in RGB but is not responsible for color reproduction on these ads. 2-color ads (standard) must be provided as black plus 100% cyan, magenta, or yellow. If other colors are present in the file, then we will charge accordingly.

Image Size/Crop:

Digital art files should be cropped to remove non-printing borders. Art should be created or scaled to the size intended for print. Image orientation should be the same as intended for print. For ads that are intended to run off the page, a 1/8" minimum bleed is required on all sides.

Proof Instructions:

- Color Ads: An identifiable **SWOP-certified** (Specifications Web Offset Publications—www.swop.org) must be supplied with the final digital file. If a SWOP-certified proof is not supplied, then the publisher cannot guarantee correct reproduction of color. Any omissions or color deviation from a submitted proof, other than a SWOP-compliant proof, will not warrant compensation to the advertiser.
- B&W Ads: A hard-copy proof the same size as the digital art must be supplied with the final digital file.

For detailed instructions on file preparation, please log on to <http://dx.sheridan.com/>. We recommend that all advertisers pre-flight their ads prior to submission to publisher to check for errors. If you do not have pre-flight software, then you may use the free pre-flight at: <http://dx.sheridan.com/connect/main.html>.

File Submission Instructions:

Please supply files on one of the following media: Iomega Zip (100 or 250), CD-ROM, or e-mail. Please include a SWOP-certified proof and the pre-flight report with your digital submission. If e-mailing artwork, then send the proof in a separate package in the mail.
