

CALL FOR PAPERS

Infant, Child, & Adolescent Nutrition

Editor: Linda Heller, MS, RD, CSP, CLE,
Children's Hospital Los Angeles

COMING TO SAGE IN 2009!

ICAN: Infant, Child, & Adolescent Nutrition is a bimonthly journal for health care professionals involved in the nutritional care of children from birth through adolescence. **ICAN** provides practical information derived from research and practice and publishes:

- translation reviews of original basic and clinical nutrition research for clinicians
- evidence-based practice innovations
- research reviews
- commentaries relating to pediatric nutrition and eating behavior
- case reports
- roundtable discussions
- practice tips
- media reviews
- alerts to new sources of information for clinicians

ICAN is a must-read for:

- Dietitians and nutritionists in children's and general hospitals, outpatient facilities, schools, and consulting practices
- Nurses, including pediatric nurse practitioners, family nurse practitioners, children's hospital staff, home practice nurses, pediatric acute and critical care nurses, and school nurses
- Physicians, including pediatricians; pediatric specialists in gastroenterology, endocrinology, pulmonology, nephrology, and cardiology; and general and primary care practitioners
- Allied Health Professionals, including physician assistants; exercise physiologists; occupational therapists; physical therapists; speech and language specialists; health psychologists; and family therapists, social workers, and psychologists

The editor is now accepting manuscripts on the following topics:

- Early Lifespan Nutrition
- Nutrition Support/Special Diets
- Gastrointestinal Disorders
- Growth & Development
- Chronic Disease Management
- Acute Disease Management
- Overweight & Comorbidities

Manuscript submissions can be sent to <http://mc.manuscriptcentral.com/ican>
For manuscript inquiries, please contact the editor
at lheller@chla.usc.edu or call (323) 361-2179

Journal topics include:

Early Lifespan Nutrition

High Risk Newborn
Human Lactation
Prematurity
Newborn or Neonate (birth to 28 days)
Infant (1 to 12 months)
Toddler (1 to 3 years)
Preschooler (3 to 5 years)
School Age (5 to 11 years)
Preteen or Tween (11 to 12 years)
Adolescent / Teen (13 to 19 years)

Nutrition Support / Special Diets

Anti-seizure diets/Ketogenic Diet
Blenderized Tube Feedings
Carbohydrate Controlled Diet
Dysphagia Diet
Enteral and parenteral feeding
Fat Controlled Diet
Gluten Free Diet
Human Lactation/Donor Breastmilk
Neutropenic Diet
Pediatric intensive / critical care
Protein Controlled Diet
Renal Diet
Special formulas/preparation and delivery
Supplementary Nutrition
Tube feeding evaluations
Tube feeding safety
Vegetarian Diet

Gastrointestinal Disorders

Allergic gastroenteropathy
Celiac disease
Colic
Constipation (chronic, recurrent)
Crohn's disease
Delayed Gastric Emptying
Diarrhea (chronic, recurrent)
Dumping Syndrome
Eosinophilic Esophagitis
Food allergies/intolerances
Gastro-esophageal reflux
Hepatology and Liver Diseases

Intestinal Rehabilitation
Intestinal Transplant
Malabsorption syndromes
Pancreatitis, Acute and Chronic
Pre and probiotic therapy
Short Bowel Syndrome

Overweight & Comorbidities

Asthma
Bariatric/gastric bypass surgery
Cardiovascular Disorder
Diabetes type II
Disordered Eating/Eating disorders
Elevated cholesterol levels
Fatty Liver
High blood pressure
Hyperlipidemias
Hypertriglyceridemia
Insulin Resistance
Mental Health
Metabolic Syndrome
Obesity
Obstructive Sleep Apnea
Orthopedics/bone and joint problems
Polycystic Ovarian Syndrome

Chronic Disease Management

Allergies
Asthma
Cancer / oncology
Cardiovascular Disorders
Chronic Lung Disease
Congenital Heart Disease
Craniofacial Anomalies
Diabetes (Type I & II)
Eating Disorders
Eczema
Endocrine & metabolism
Esophageal Dysfunction
Hematology and Blood Disorders
Hepatology / liver diseases
HIV / AIDS
Immunodeficiencies, primary
In-born errors of metabolism/Metabolic

Disorders
Juvenile Arthritis and Other Rheumatic Diseases
Kidney disease
Neurological Disorders
Renal disease
Sickle Cell Anemia
Spina Bifida
Transplantation (kidney, liver, heart, lung, small bowel, bone marrow)

Acute Disease Management

Burns
Eating Disorders
Pancreatitis
Skin Breakdown
Wound Healing

Growth & Development

Autism and Diet
Dental and Oral Health
Developmental delays
Developmental disabilities
Feeding and Swallowing problems
Growth Problems
Neurological Disorders
Nutrition and Rehabilitation
Special Healthcare Needs
Sports-related nutrition issues
Teen/High Risk Pregnancy
Transitional Nutrition Care
Vegetarianism

Other

Body Composition Measurement
Effecting Public Policy Change
Electronic Medical Record and Outcomes
End of Life Nutrition and Hydration
Long Term Care/Technology Dependent Children
Nutrition Care Process
Medical Nutrition Therapy
Reimbursement in Pediatrics
