

Intended for healthcare professionals

## Sage Journals

### Canadian Association of Radiologists Journal

Impact Factor: 3.7

5-Year Impact Factor: 3.2

#### Submission guidelines

The **Canadian Association of Radiologists Journal (CARJ)** is a peer-reviewed, Medline-indexed publication that presents a broad scientific review of radiology in Canada. The journal publishes original research, reviews, research letters and Letters to the Editor. It does not consider case reports. Studies should be relevant to radiologists' clinical practice.

#### Submit Your Article

CARJ is hosted on a web-based online submission and peer review system powered by ScholarOne™ Manuscripts. The platform guides you through the process step-by-step. All correspondence is sent by email, including notification of the Editor's decision and requests for revision.

**All manuscripts and letters must be submitted online to:**

<https://mc.manuscriptcentral.com/carj>

**IMPORTANT:** Please check whether you already have an account in the system before trying to create a new one.

- For assistance with ScholarOne™ accounts, please email the [Journal Office](#).
- For further guidance on submitting your manuscript online, please visit [ScholarOne Online Help](#).

[\(Return to TOP\)](#)

## Additional Notes and Inclusions

### Word count

- Excludes abstract, tables/figures/figure legends, and references

### Authorship

- [Follow the ICMJE criteria for authorship](#)
- Indicate co-authorship on the title page and cover letter upon submission
- List authors' primary affiliations on the title page (e.g. university, department, city and province) followed by any other affiliation
- Refer to [Artificial Intelligence \(AI\) Policy for Authors](#)

### Cover letter

- Addressed to: Michael N. Patlas, MD, FRCPC, Editor-in-Chief, Canadian Association of Radiologists Journal
- Highlight co-authorship if applicable

### Title page

- **Title:** Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.
- **Short title:** Please supply an abbreviated version of the title for the running head. The short title should be no more than 45 characters long (including spaces).
- **Authorship:** Provide full name, university affiliation followed by any other affiliations. Indicate if there are co-first authors. Credentials are not published.

**Corresponding author:** Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. Contact details must be kept up to

date by the corresponding author and must be reflected in ScholarOne.

- **Keywords:** Provide a list of no more than 6 relevant key words. Avoid general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Do not use abbreviations. These keywords will be used for indexing purposes (not required for editorials or letters to the editor).
- **Acknowledgements:** Collate acknowledgements on the title page, as a footnote to the title or otherwise list individuals who provided help during the research (e.g., providing language help, writing assistance, or proofreading the article, etc.) but who do not meet the [ICMJE](#) authorship criteria.

## Abstract

- Do not contain references, abbreviations or institutions/affiliations

## Main Manuscript Document

- **Introduction:** Purpose of the investigation and relevant background information including knowledge gaps.
- **Methods:** Materials used\* and/or participants, imaging protocols and statistical methods, and ethics approval statement.

*\*The names and locations (as city and province or state) of equipment manufacturers are given. Generic names are provided for drugs and contrast media. Where relevant authors should adhere to standardized reporting guidelines (refer to [EQUATOR Network](#) for further details).*

- **Results:** Presented in a clear and logical fashion. If tables and graphs are used, they should summarize the data and not be repeated in the text.
- **Discussion:** Describes the relevance of the findings and provides context of what other studies have found, presents the limitations of the statistics and other methods, and clearly demonstrates the important outcomes of the study.
- **Conclusion:** may be replaced by a bulleted list of key points, at the discretion of the author

## References

- [AMA Style](#), authors are responsible for the accuracy of cited references.
- Citations from internet sources should provide the name of the author(s), the title of the web page, the URL, the page's original publication or creation date, and the date the page was last accessed.
- Cited journal articles are retrievable (i.e., published online or in print). Do not cite manuscripts in preparation, under review or revision, or accepted but not yet published in some form.

## Tables

- Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article. Number tables consecutively in order of their appearance in the main manuscript document.
- Include a short descriptive title for each table.
- Place footnotes to tables below the table body with superscript lowercase letters. Avoid vertical rules
- Submit each table as a separate Word file (.docx).

## Figures (Images, charts and graphs)

- Number figures consecutively in order of their appearance in the main manuscript document.
- Provide a descriptive legend for all figures, which should include:
  - A brief title, not on the figure itself
  - A description of the illustration explaining all symbols and abbreviations used
- Submit each figure as a separate file in the following formats: .jpg, .png or .tiff

## Funding Declaration

All research articles should have a funding acknowledgement statement included in the manuscript in the form of a sentence under a separate heading entitled 'Funding' directly after your Acknowledgements and Declaration of Conflicting Interests, if applicable, and prior to any Notes and References. [Learn More](#)

## Supplemental Materials

CARJ accepts the submission of supplemental material for original research and review articles. Please submit through ScholarOne™.

- For more information about parameters and permissions, please see the [Sage Author Gateway](#).

## ORCID

Sage is a supporting member of [ORCID, the Open Researcher and Contributor ID](#). ORCID provides a unique and persistent digital identifier that distinguishes researchers from every other researcher, even those who share the same name, and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between researchers and their professional activities, ensuring that their work is recognized.

It takes seconds to do: click the link when prompted, sign into your ORCID account and our systems are automatically updated. Your ORCID ID will become part of your accepted

publication's metadata, making your work attributable to you and only you.

For ORCIDiDs to be linked properly to all authors, the **ORCIDiDs must be linked with author profile in ScholarOne™ at the time of submission** of the manuscript. They cannot be added after the manuscript has been submitted.

- For assistance making changes to ScholarOne™ author profiles, please contact [info@carjonline.org](mailto:info@carjonline.org).

**IMPORTANT:** CARJ is unable to verify and add ORCIDiDs at any time.

[\(Return to TOP\)](#)

## After Acceptance

### Contributor Form

Corresponding authors will receive an automated email instructing them to complete a contributor form on behalf of their colleagues.

### Sage Production

Your Sage Production Editor will keep you informed as to your article's progress throughout the production process. Page proofs will be sent via Proof Central to the corresponding author and should be returned promptly.

[\(Return to TOP\)](#)

## Publication Options

### Open Access

For Canadian authors, the [CRKN Open Access Agreement](#) includes all Canadian research universities at **no cost to authors or departments**. Publishing papers OA also ensures that researchers adhere to the [Tri-Agency Open Access Policy on Publications](#) (any research funded by [CIHR](#)).

All authors covered by an [Open Access agreement](#) should select a CC BY 4.0 Open Access license for their article.

**IMPORTANT:** Ensure the corresponding author's primary affiliation is identified in ScholarOne™ as a [Canadian university or research institute](#) and on the manuscript's title

page. If not, it may not be possible to select the open access option without incurring additional costs.

If a researcher is not covered by an existing OA agreement and wishes to make the work OA, two options are available: pay an article processing charge (APC) to have the work made OA at the time of publication or self-archive the work in a suitable repository to be made available after an embargo period has elapsed.

- For more information, please email the [Journal Office](#).

### **OnlineFirst publication**

OnlineFirst allows final revision articles (completed articles in queue for assignment to an upcoming issue) to be published online prior to their inclusion in a final journal issue which significantly reduces the lead time between submission and publication.

- For more information please [visit OnlineFirst Fact Sheet](#).

### **Access to your published article**

Sage provides authors with online access to their final article. Corresponding authors receive an email with an e-access link when the article has been published online (OnlineFirst), and then again when the article is published in an issue. This link may be passed along to other authors.

[\(Return to TOP\)](#)

## **CARJ Policies**

### **Peer Review**

The CARJ uses a double-blind peer-review process, which means that both the reviewer and author identities are concealed from each other throughout the review process.

- Do not self-identify your prior work. For example, do not state “as we have previously described,” [author’s reference]. Instead, suitable language would be, “Prior studies have shown... “[reference].
- Do not mention the author(s)’ institution or funding information in the manuscript.
- Blind the author(s)’ initials if they are readers.

### **Artificial Intelligence (AI) Policy for Authors**

Authors may use generative AI technologies to improve language and readability in manuscript preparation. However, AI tools must not be credited as authors or cited as sources, as they do not meet the criteria for authorship, which include accountability for the work.

If generative AI is used in the preparation of a manuscript, authors must include the following statement prior to the references:

- **Declaration of Generative AI in the Writing Process:**

*During the preparation of this work, the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.*

Use of AI should also be disclosed in the Methods section along with the name, version, manufacturer of the AI tool, and a description of how it was used. Authors remain fully responsible for ensuring the accuracy, originality, and proper attribution of any content created or developed using AI.

### **AI-Assisted Copy Editing**

Use of AI for copy editing, defined as improving readability, style, grammar, spelling, punctuation, and tone of human-written text, does not require disclosure. This excludes any generative editorial work or autonomous content creation. In all cases, final content must reflect the authors' original work and authors retain full accountability.

This policy will be reviewed and updated regularly in response to ongoing developments in the field.

- For more information, please consult the [Sage Artificial Intelligence Policy](#).

### **Authorship**

CAR Journal agrees with the recommendations of the International Committee of Medical Journal Editors (ICMJE) that authors must meet the following four criteria:

1. Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work.
2. Drafting the work or revising it critically for important intellectual content.
3. Final approval of the version to be published.
4. Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

The CAR Journal will allow only two first authors. If two authors contributed equally to the manuscript and requested to share the first authorship, it should be stated in the cover letter during the initial submission of the manuscript. Each manuscript can only have one senior and/or corresponding author.

## **Changes to authorship**

Authors are expected to carefully consider the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor.

To request such a change, the Editor must receive the following from the corresponding author:

1. Reason for the change in author list and
2. Written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.

Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. While the Editor considers the request, publication of the manuscript will be suspended. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum.

## **Declaration of Conflicting Interests**

All authors must disclose any conflicts of interest or perceived conflicts of interest. This may include, but not be limited to commercial affiliations, consultant affiliations, stock, equity, or patent/licensing interests. All funding sources, including grant numbers, must be disclosed. [Learn more](#)

Authors must disclose a summary declaration of interest statement in the Title Page. If there are no interests to declare then please state this: 'Declarations of interest: none'. This summary statement will be ultimately published if the article is accepted.

## **Research ethics and consent**

Medical research involving human participants must be conducted according to the World Medical Association Declaration of Helsinki. The manuscript should be in line with the [ICMJE Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals](#) and aim for the inclusion of representative human populations (sex, age

and ethnicity) as per those recommendations. The terms sex and gender should be used correctly.

CARJ does not consider case series or animal studies.

### **Clinical trials**

If your study is prospective and was registered in a clinical trials registry such as ClinicalTrials.gov, then the trial registry name and URL, and registration number must be included at the end of the abstract.

### **Publication ethics**

We encourage authors to refer to the Committee on Publication Ethics' International Standards for Authors and view the [Publication Ethics & Responsibility](#) page on the [Sage Author Gateway](#).

### ***Plagiarism***

The CAR Journal takes issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. Submitted articles may be checked with duplication-checking software.

### ***Prior Publication***

Upon submission, authors must confirm that their manuscript has not been published previously, is not currently in press, is not publicly available in any form or format, and is not under consideration elsewhere. Authors wishing to reproduce material appearing in other publications, such as figures, tables or limited text passages, must obtain appropriate permission from the copyright holder and reproduced material must be disclosed in the cover letter.

### **Reporting Guidelines**

The CAR Journal strongly endorses complete and transparent reporting of research. Authors should consult standardized reporting guidelines relevant to their research. For example, diagnostic accuracy studies should consult STARD 2015, systematic reviews should consult PRISMA (or its extension such as PRISMA-DTA), and randomized trials should consult CONSORT. The EQUATOR network is a comprehensive resource for authors to determine which reporting guideline is optimal for their research type.

### **Permissions**

Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere. [Learn](#)
