Invitation to Contributors

California Management Review serves as a vehicle of communication between those who study management and those who practice it. *CMR*'s editorial mission is to publish academic research that contributes to the practice of management and demonstrates general editorial and pedagogical excellence.

CMR primarily publishes original articles that are both research based and address issues of current concern to managers.

CMR interprets management broadly, to include subject matter taught in business schools as well as work in other fields that is applicable to management functions and practices. *CMR* typically publishes articles that extend our knowledge of a given topic either by contesting or building upon existing theories or by presenting new empirical work. Additionally, every manuscript should also be practitioner oriented, including recommendations that will improve the practice of management.

Articles that present the results of original research and analysis are given high priority, but we also invite reports on business surveys, analyses or descriptions of new or revised business techniques, and perspectives on contemporary social, economic, and political issues. We also welcome articles by practitioners on contemporary business policies and

practices as well as revisions of papers originally prepared for academic conferences or scholarly publications. All submissions are subject to peer review.

Preparation of Manuscripts

All submissions are processed within our online system.

Please log in or create an account here:

mc.manuscriptcentral.com/uc-cmr

- There is no fee for submitting a manuscript for publication consideration in *CMR*.
- Authors should upload manuscripts in Microsoft Word (.doc or .docx) format (not as PDFs).
- The author(s)' name should not appear anywhere on the actual manuscript, filenames, charts, figures, or graphs.
- You will be required to include a 100-word summary (abstract) of the manuscript's basic argument.
- You will be required to select at least three (3) keywords that indicate the general subject of the article.
- Manuscripts should run approximately fifteen to thirty pages, double-spaced with 12 point font (more exactly, 5,000 to 9,000 words). Please inquire with the editor before submitting articles of greater or shorter length.
- Notes, citations, and references should be numbered in the text and compiled at the end of the manuscript (endnote format). All bibliographic material should be contained directly in the notes and not as a separate section.
- Tables, charts, and diagrams should be uploaded as separate documents with references for insertion throughout the document.

Timeline Estimates

- Email queries will be promptly acknowledged. If you do not receive a response within 10 business days, please follow up to ensure your request was received.
- Authors of submissions that are not selected for external review can expect to receive a prompt response.
- If your submitted article is selected for external review, authors can normally expect a first publication decision within 12 to 16 weeks. There are exceptions to this timeframe. If your online submission is successful, you will receive an automated e-mail confirmation of receipt within 24 hours. If you do not receive said e-mail, contact *CMR* immediately as your submission was most likely not received

- Accepted articles are generally published within 6 to 8 months. Special issues take significantly longer.
- Submissions that are not selected for external review will receive a decision within four weeks.
- *CMR* does not accept multiple submissions (manuscripts simultaneously submitted to other publications).

Style Guidelines

- Articles should be as jargon-free as possible. Terminology and acronyms that are not common knowledge should be defined. Technical material should be placed in notes or appendices whenever possible.
- Three descending levels of headings should be used periodically and consistently throughout the article. They should be descriptive but brief.
- Tables, charts, diagrams, and other graphic materials should be used for providing necessary information or clarification of central concepts. They should be clean and uncluttered and should appear on separate pages. If copyright permission is required for publishing this graphic material, it is the author's responsibility to obtain it at his/her cost.
- *CMR* uses endnote style (not scientific notation), and references or bibliographies should be folded into the notes (not listed as a separate section). Citation order should be author(s) (first name first), title of work, complete publication information (city, state, publisher, date or name of periodical, volume and issue number, date), and page number references. The accuracy of citations and references is the responsibility of the author(s).
- *CMR* uses the Chicago Manual of Style as primary reference source.
- For more specific style questions, consult a [recent issue](#), [read a sample article](#), or [contact our Senior Editor](#).
- Authors should familiarize themselves with [Sage's Accessibility Guidelines](#) to ensure their manuscripts meet recognized accessibility standards.
