5-Year Impact Factor: **3.2**

Submission guidelines

Submit manuscript

Please read the guidelines in full before submitting your manuscript.
Manuscripts not conforming to these guidelines may be returned.

Submit Manuscript

Sage is committed to upholding the integrity of the academic record. We encourage authors to follow Sage's Publication Ethics Policies and the Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals formulated by the International Committee of Medical Journal Editors (ICMJE).

These resources describe ethical conduct and publication requirements for authors and editors to uphold accuracy, transparency, and disclosure – **including authors' appropriate disclosure of AI use as well as a list of prohibited uses of AI**.

Sage Publishing disseminates high-quality research and engaged scholarship globally, and we are committed to diversity and inclusion in publishing. We encourage submissions and peer review from a diverse range of authors and reviewers from across all countries and backgrounds.

Authors should familiarize themselves with Sage's Accessibility Guidelines to ensure their manuscripts meet recognized accessibility standards.

We encourage authors to refer to the Committee on Publication Ethics' International Standards for Authors.

This Journal is a member of the Committee on Publication Ethics.

Key information

Access: Open Access
APC: See article processing charge information below
Accepts preprints? Yes
Identity transparency: Double anonymized

Please note that this journal is online-only and does not offer print copies.

Publishing fees and open access

Chronic Respiratory Disease is an open access, peer-reviewed journal. All accepted articles are made freely available online immediately upon publication, are published under a Creative Commons license, and hosted online in perpetuity.

If, after peer review, your manuscript is accepted for publication, a one-time article processing charge (APC) is payable to cover the cost of publishing, paid by the funder, institution, or author. There is no charge for submitting a manuscript.

The article processing charge (APC) is $3200.

*If the paying party is based in the European Union, to comply with European law, value added tax (VAT) must be added to the APC. Providing a VAT registration number will allow an institution to be exempt from paying this tax, except for UK institutions.

The article processing charge (APC) is payable when a manuscript is accepted after peer review, before it is published. The APC is subject to taxes where applicable. Tax-exempt status can be indicated by providing appropriate registration numbers when payment is requested. Please see further details on tax-exempt status here.

Preparing your manuscript for submission

Your article must be within the scope of the journal and be of sufficient quality. If not, it will not be reviewed. Please read the journal's Aims and Scope to see if your article is appropriate.

The manuscript must be your original work, you must have the rights to the work, and you must have obtained and be able to supply all necessary permissions for the reproduction of any copyright works not owned by you, including figures, illustrations, tables, lengthy quotations, or other material previously published elsewhere.

Article types

View our Special Collections currently accepting submissions.

Manuscripts are considered for publication with the understanding that they have not been published previously and are not under consideration by another publication.

The journal publishes original papers, reviews and correspondence.

Summary of manuscript structure:

- Please double-space the text and references and leave generous margins at head, foot and left- and right-hand margins. All pages must be numbered. Do not paste figures and tables into the text - they should appear at the end of the paper.
- Headings: In dividing articles under headings, please grade the headings by writing A, B, or C in the margin:
  A - subheading;
  B - subsubheading;
  C - subsubsubheading.

Manuscripts should be approximately as follows:

- Review articles, 4000 words plus references;
- Original research papers, 3000 words plus references, with up to six tables or figures;
- Editorials, up to 1200 words plus references;
- Review of the guidelines, 500-1000 words plus references;
- Hot topic, up to 1000 words plus references;
- Technical notes, 500-1000 words plus references;
- Letters, including Research Letters, up to 1000 words plus 2-3 references and 2-3 illustrations or tables.
- Case Reports, up to 1200 words plus references

Scientific papers should be divided into a structured abstract that uses the headings 'Background, Methods, Results, Conclusions', introduction, methods, results,

discussion, acknowledgements, and references. Authors bear sole responsibility for the accuracy of such abstracts. Authors can place material in a supplementary file to assist with meeting word limits (see below).

Original research papers

Should include:

- Title page: (1) title of the article; (2) first name(s) or initial(s) and surname of each author; (3) address of the department or institution to which the work should be attributed; (4) full postal address of each author; (5) name, telephone, email address and fax number of the author responsible for correspondence and to whom requests for offprints should be sent. (This is particularly important where the corresponding author is not the first named author.)
- Abstract (<200 words): a short inclusive statement suitable for direct electronic abstracting identifying the purpose of the study, key methods, the main results and the main conclusion. Structured abstracts are essential for research and review papers, and should be submitted under the headings: objectives, methods, results, and discussion.
- Keywords: maximum of 6 keywords for indexing.
- Introduction: concise description of background, sufficient for the non-specialist to appreciate the context of the work. Clear statement of the purpose of the study. Authors should avoid obviously partisan selection and quotation of literature.
- Methods: should demonstrate a clear and documented design or strategy directed towards a specific research question. The study design should be appropriate to the aims of the study and be clearly described. The criteria for selecting the sample should be clearly described and justified. A clear description of sampling, recruitment to the study, data collection, and data analysis should be provided. Full details of interventions should be given for intervention studies. This section should also include details of approval from a named Research Ethics Committee, and any arrangements for data oversight.
- Results: should contain all the information required by referees and readers to assess the validity of the conclusions. The characteristics of the sample included in the study should be clearly described. For quantitative studies, the section should include details of the response rates and numbers lost to follow-up. The analysis should be clear and systematic. Results of statistical tests should be reported with confidence intervals in order to provide an estimate of precision. No more than six tables should be included.
- Discussion: an interpretation of the study placed within the context of current knowledge leading to specific conclusions where possible. We recommend that this covers the following sections, using sub-headings: summary of main findings; the strengths and the limitations of this study; how and why it agrees or disagrees with the existing literature, in particular including any papers published since the study was designed and carried out; the implications for future research or clinical practice.
- Each of the above sections should use subheadings as appropriate.
- Acknowledgements.
- References (ideally max. 25), figures and tables (see 4.5 for more details).
- Supplementary Material: This should only include information relating to the Methods or Results sections and must be referenced within the text of the main manuscript. For more

information please refer to our guidelines on submitting supplementary files.

Style

1. Generic names should be used for drugs. Authors should be aware of different drug names and availability in the UK, North America and Australia, and give alternative names or drugs in the text.
2. Scientific measurements should be given in SI units, but blood pressure should be expressed in mmHg and haemoglobin as g/dl.
3. For numbers, adopt a rule that all numbers under 10 should be written as words, except when attached to a unit of quantity (e.g. 1 mm or 3 kg), and that numbers of 10 or more should be written as digits, except at the beginning of a sentence.
4. Abbreviations should be kept to a minimum and must be clearly defined when used for the first time. Abbreviations should be typed with no full point.
5. Avoid excessive capitalization. For the titles of books and articles, capitals should be used for the initial letter of the first word only. However, for the titles of journals and series, the initial letter of all principal words should be capitalized.
6. Use italics for emphasis only very sparingly.

Tables

Tables should be typed on separate sheets. Indicate in the margin of the text where tables should be positioned. Each table should have an explanatory caption, and be clearly numbered.

Statistics

Numbers of patients or subjects should be given, with percentages in brackets. Means should be expressed as the mean with standard deviation of the mean: where appropriate, authors should also consider supplying the median. Care should be taken that all statistical methods are appropriate and that it is clear which methods were used for which analyses. Any statistical methods not in common use should be supported by references or described in detail. Results of statistical tests should be reported as well as the p values; where possible, confidence intervals should also be reported.

Clinical trial registration

The journal conforms to the ICMJE requirement that clinical trials are registered in a WHO-approved public trials registry at or before the time of first participant enrollment as a condition of consideration for publication. The trial registry name and URL, and registration number must be included at the end of the abstract.

Reporting guidelines

Your manuscript **must** follow the relevant EQUATOR Network reporting guidelines, depending on the type of study. The EQUATOR wizard can help identify the

appropriate guideline. You will need to upload the appropriate checklist with your submission.

Other resources can be found at NLM's Research Reporting Guidelines and Initiatives.

If your research involves animals, you will be asked to confirm that you have carefully read and adhered to the ARRIVE guidelines.

Formatting your manuscript

Accepted file types

The preferred format for your manuscript is Word. You do not need to follow a template, but please ensure your heading levels are clear, and the sections clearly defined.

The LaTeX files are also accepted. A LaTeX template is available on the Sage Journal Author Gateway.

Your article title, keywords, and abstract all contribute to its position in search engine results, directly affecting the number of people who see your work. For details of what you can do to influence this, visit How to help readers find your article online.

Title

Your manuscript's title should be concise, descriptive, unambiguous, accurate, and reflect the precise contents of the manuscript. A descriptive title that includes the topic of the manuscript makes an article more findable in the major indexing services.

Abstract

Please include a structured abstract for research articles of a maximum of 200 words between the title and main body of your manuscript that concisely states the purpose of the research, major findings, and conclusions. If your research includes clinical trials, the trial registry name and URL, and registration number must be included at the end of the abstract. Submissions that do not meet this requirement will not be considered.

For clinical trials, the trial registry name and URL, and registration number must be included at the end of the abstract.

Keywords

Please include a maximum of 6 keywords, listed after the abstract. Keywords should be as specific as possible to the research topic.

Artwork, figures, and other graphics

For guidance on the preparation of illustrations, pictures, and graphs in electronic format, please read Sage's artwork guidelines.

Figures supplied in color will appear in color online.

Please ensure that you have obtained any necessary permission from copyright holders for reproducing any illustrations, tables, figures, or lengthy quotations previously published elsewhere. For further information including guidance on fair dealing for criticism and review, please see the Frequently Asked Questions page on the Sage Journal Author Gateway.

Title page

To ensure fair and anonymous peer review, your manuscript must be fully anonymized. Please ensure any identifying information is removed from the main manuscript document and included on the Title Page instead. Do not include any author names in the manuscript file name and remove names from headers and footers. This version of the manuscript **will** be sent to the peer reviewers. The Title Page **will not** be sent to peer reviewers. See the Sage Journal Author Gateway for detailed guidance on making an anonymous submission.

The Title Page should include:

- Article title
- The full list of authors including names and affiliations of each
    - **The listed affiliation should be the institution where the research was conducted**. If an author has moved to a new institution since completing the research, the new affiliation can be included in a note at the end of the manuscript – please indicate this on the title page.
    - **All persons eligible for authorship must be included at the time of submission (please see the authorship section for more information)**.
- Contact information for the corresponding author: name, institutional address, phone, email
- Acknowledgments section
- Declaration of conflicting interest
- Funding statement
- Ethical approval and informed consent statements
- Data availability statement
- Any other identifying information related to the authors and/or their institutions, funders, approval committees, etc, that might compromise anonymity.

Acknowledgments

If you are including an Acknowledgements section, this will be published at the end of your article. The Acknowledgments section should include all contributors who do not meet the criteria for authorship. Per ICMJE recommendations, it is best practice to obtain consent from non-author contributors who you are acknowledging in your manuscript.

Writing assistance and third party submissions: if you have received any writing or editing assistance from a third-party, for example a specialist communications company, this must be clearly stated in the Acknowledgements section and in the covering letter. Please see the Sage Author Gateway for what information to include in your Acknowledgements section. If your submission is being made on your behalf by someone who is not listed as an author, for example the third-party who provided writing/editing assistance, you must state this in the Acknowledgements and also in your covering letter. **Please note that the journal editor reserves the right to not consider submissions made by a third party rather than by the author/s themselves.**

Statements and declarations

To ensure proper anonymization, please include a section with the heading 'Statements and Declarations' on your title page, after the Acknowledgements section [and Author Contributions section if applicable] including each of the sub-headings listed below. If a declaration is not applicable to your submission, you must still include the heading and state 'Not applicable' underneath. Please note that you may be asked to justify why a declaration was not applicable to your submission by the Editorial Office. This information will be added to the end of your published paper.

Ethical considerations

Please include your ethics approval statements under this heading, even if you have already included ethics approval information in your methods section. If ethical approval was not required, you need to explicitly state this.

All papers reporting studies involving human participants, human data or human tissue must state that the relevant Ethics Committee or Institutional Review Board approved the study, or waived the requirement for approval, providing the full name and institution of the review committee in addition to the approval number. If applicable, please also include this information in the Methods section of your manuscript.

Consent to participate

Please include any participant consent information under this heading and state whether informed consent to participate was written or verbal. If the requirement for informed consent to participate has been waived by the relevant Ethics Committee or Institutional Review Board (i.e. where it has been deemed that consent would be impossible or impracticable to obtain), please state this. If this is not applicable to your manuscript, please state 'Not applicable' in this section.

Consent for publication

Submissions containing any data from an individual person (including individual details, images or videos) must include a statement confirming that informed consent for publication was provided by the participant(s) or a legally authorized representative. Non-essential identifying details should be omitted. Please do not submit the participant's actual written informed consent with your article, as this in itself breaches the patient's confidentiality. The Journal requests that you confirm to us, in writing, that you have obtained written informed consent to publish but the written consent itself should be held by the authors/investigators themselves, for example in a patient's hospital record. The confirmatory letter may be uploaded with your submission as a separate file in addition to the statement confirming that consent to publish was obtained within the manuscript text. If this is not applicable to your manuscript, please state 'Not applicable' in this section.

Declaration of conflicting interest

The journal requires a declaration of conflicting interests from all authors so that a statement can be included in your article. For guidance on conflict of interest statements, see our policy on conflicting interest declarations and the ICMJE recommendations.

If no conflict exists, your statement should read: 'The author(s) declared no potential conflicts of interest with respect to the research, authorship, and/or publication of this article'.

Funding statement

All articles need to include a funding statement, under a separate heading, **even if you did not receive funding**. You'll find guidance and examples on our Funding page.

Data availability

The Journal is committed to facilitating openness, transparency and reproducibility of research, and has the following research data sharing policy. For more information, including FAQs please visit the Sage Research Data policy pages.

Subject to appropriate ethical and legal considerations, authors are encouraged to:

- Share your research data in a relevant public data repository
- Include a data availability statement linking to your data. If it is not possible to share your data, use the statement to confirm why it cannot be shared.
- Cite this data in your research

Reference style and citations

The journal follows the Sage Vancouver reference style. View the Sage Vancouver guidelines to ensure your manuscript conforms.

Every in-text citation must have a corresponding citation in the reference list and vice versa. Corresponding citations must have identical spelling and year.

Authors should update any references to preprints when a peer reviewed version is made available, to cite the published research. Citations to preprints are otherwise discouraged.

EndNote

If you use EndNote to manage references, you can download the Sage Vancouver EndNote output file.

Supplemental material

This Journal can host additional materials online (e.g. datasets, podcasts, videos, images etc.) alongside the full text of the article. Your supplemental material must be one of our accepted file types. For that list and more information please refer to our guidelines on submitting supplemental files.

English language editing services

Authors seeking assistance with English language editing, translation, or figure and manuscript formatting to fit the journal's specifications should consider using Sage Author Services. Visit Sage Author Services for further information.

Submitting your manuscript

As part of the submission process you will need to confirm that this is your original work, that you have the rights in the work, that this is for first publication in this Journal, that it is not being considered for/has not already been published elsewhere, and that you have obtained and can supply all necessary permissions for the reproduction of any copyright works not owned by you.

Please see our guidelines on prior publication and note that the journal may accept submissions of manuscripts that have been posted on preprint servers.

Preprints

The journal will consider submissions of manuscripts that have been posted on preprint servers.

Please enter the preprint DOI in the designated field when submitting your manuscript. We advise that you inform the Journal Editorial office about your posted preprint at submission.

Note that you should **not** post an updated version of your manuscript on a preprint server while it is being peer reviewed.

Learn more about our preprint policy.

Submission site

Submit your manuscript online via Sage Track.

IMPORTANT: Please check whether you already have an account in Sage Track before trying to create a new one. If you have reviewed or authored for the journal in the past year it is likely that you will have had an account created. For further guidance on submitting your manuscript online please visit ScholarOne Online Help.

Manuscripts should only be submitted with the consent of all contributing authors. The individual responsible for submitting the manuscript should carefully check that all those whose work contributed to the manuscript are listed as authors.

Ensure you upload all relevant manuscript files, including any additional supplemental files (including reporting guidelines where relevant).

Authorship

Please view our authorship policies, which includes information on criteria for authorship, who should be the corresponding author and more.

Please note that AI chatbots, for example ChatGPT, should not be listed as authors. For more information see the policy on Use of ChatGPT and generative AI tools.

Files

- **Cover letter.** To help the Editor in their preliminary evaluation, please indicate why you think the manuscript suitable for publication.
- **Title Page** with all required identifying information as laid out in Preparing your manuscript for submission (above). This **will not** be sent to the peer reviewers.
- Your **manuscript**, properly formatted according to all stipulations above, and within the scope of the journal.
- **Figures and images.**
    - All figures must be numbered consecutively in the order in which they appear in the text – they will appear in the published article in the order they are numbered.
    - Figure resolution is 300dpi. More information on figure/image preparation can be found here.
- **Supplemental material.** This journal can host additional materials online (e.g. datasets, podcasts, videos, images, etc) alongside the full-text of the article. Your supplemental material must be one of our accepted file types. For that list and more information please refer to our guidelines on submitting supplemental files.

Other information required for submission

- ORCID ID of the submitting author.
    - It is strongly encouraged that all co-authors ensure their ORCID IDs are linked to their accounts in the submission system prior to article acceptance, as this is the only way to have their ORCID ID present on the published article. **ORCID IDs cannot be added to manuscripts after acceptance/publication.** Please note that each co-author must log in to the submission system to add their own ORCID ID to their account. To add an ORCID ID, edit your account, click the link when prompted, and sign into your ORCID account to validate your ID. You will then be redirected back to the submission system and your ORCID ID will become part of your accepted publication's metadata.
    - Please create an ORCID ID if you do not already have one or visit our ORCID homepage to learn more.
- Complete list of authors, with their institutional affiliations.
    - The author information you enter at submission must exactly match what is included on your manuscript and/or title page, including full names, academic affiliations, and corresponding author contact details.
    - **The listed affiliation should be the institution where the research was conducted.** If an author has moved to a new institution since completing the research, the new affiliation can be included in a note at the end of the manuscript.
    - **All listed authors must meet the criteria for authorship (above).**
    - **All persons eligible for authorship must be included at the time of submission.**

    - All authors must have given consent for the manuscript to be submitted in its current form.
- Keywords: During submission, you may be asked to select or enter keywords for your manuscript. These keywords are used to match appropriate reviewers to your manuscript.
- The number of figures, tables, and words in your manuscript.
- Funder information: Name, grant/award number.
- You may be required to enter your declaration of conflicting interest as part of the submission process, in addition to listing it on your manuscript and/or title page. Please have it on hand.
- If you have posted your manuscript to a preprint server, you will be asked to supply the DOI (this does not prohibit submission, but no changes should be made to the preprint version while your manuscript is under evaluation in this journal). Please see our guidelines on prior publication. If the article is accepted for publication, the author may re-use their work according to the journal's author archiving policy. If your manuscript is accepted, you must include a link in your preprint to the final version of your published article.

Peer review policy

The following summary describes the peer review process for this journal:
Identity transparency: Single-anonymized
Reviewer interacts with: Editor
Review information published: None

Your manuscript will undergo an initial evaluation. If it does not conform to the requirements laid out in these guidelines, it will be returned to you for amendments prior to peer review. Manuscripts may be desk rejected without peer review at this point if they are out of scope for the journal or otherwise unsuitable.

After passing the initial evaluation, your manuscript will then be peer reviewed. You can log in at any time to check the status of your manuscript. We will notify you when a decision has been reached.

The journal operates a conventional single-anonymized reviewing policy in which the reviewer's name is always concealed from the submitting author. Two independent reviews are required for a manuscript to reach a Revise or Accept decision.

To ensure the integrity of the peer review process we assign reviewers and cannot accept author recommendations.

All manuscripts are reviewed as rapidly as possible, while maintaining rigor. Reviewers make comments to the author and recommendations to the Associate Editor and the Editor who then makes the final decision on all manuscripts, including those

appearing in a special issue or special collection. The Editor or members of the Editorial Board may occasionally submit their own manuscripts for possible publication in the Journal. In these cases, the peer review process will be managed by alternative members of the Board and the submitting Editor/Board member will have no involvement in the decision-making process.

As a COPE member we engage with multiple forms of post-publication discussion in line with wider guidance from Sage: Commentaries, Critiques and Responses.

You can view our complaints and appeals policy here.

Read Sage's complete peer review policy.

Plagiarism

The journal and Sage take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. Please read Sage's complete policy on plagiarism and the actions we may take.

After acceptance

After acceptance you will receive instructions via email inviting you to complete the Open Access process. This will include signing the appropriate Creative Commons license and, where applicable, paying the Article Processing Charge (APC) or assigning a bill payer. Once the APC has been processed, your article will be prepared for publication and can appear online within an average of 30 days. Please note that, where an APC is applicable, production work cannot be completed on your manuscript until payment has been received.

Contributor's Publishing Agreement

Before publication we require the author as the rights holder to sign a Journal Contributor's Publishing Agreement. The journal publishes manuscripts under Creative Commons licenses. The standard license for the journal is Creative Commons by Attribution Non-Commercial (CC BY-NC), which allows others to re-use the work without permission as long as the work is properly referenced and the use is non-commercial. For more information, you are advised to visit Sage's OA licenses page. Alternative license arrangements are available at the author's request (e.g. to meet particular funder mandates).

Preprints

If your manuscript was posted on a preprint server prior to acceptance, you must include a link in your preprint to the final published version of your published article.

Production

Your Sage Production Editor will keep you informed as to your article's progress throughout the production process. Proofs will be made available to the corresponding author via our editing portal, Sage Edit, or by email, and should be returned promptly to avoid delaying publication. Authors are reminded to check their proofs carefully to confirm that all author information, including names, affiliations, sequence, and contact details are correct, and that Funding and Conflict of Interest statements, if any, are accurate. **This is the final opportunity to make changes to your manuscript. Further corrections will not be possible after publication. Changes to the author list are not permitted at this stage.**

Publication

One of the many benefits of publishing your research in an open access journal is the speed to publication. With no page count constraints, your article will be published online in a fully citable form with a DOI number as soon as it has completed the production process. At this time it will be completely free to view and download for all.

Promoting your article

Publication is not the end of the process. Between us, we can ensure that your article is found, read, downloaded and cited as widely as possible. Many of the most effective tactics are those you can do quickly and easily to your network of contacts and peers. Visit the Promote Your Article page on the Sage Journal Author Gateway for numerous resources to help you promote your work.

Further resources

The Sage Journal Author Gateway has some general advice on how to get published, plus links to further resources. Sage Author Services also offers authors a variety of ways to improve and enhance your article including English language editing, plagiarism detection, and video abstract and infographic preparation.

If you have any questions about publishing with Sage, please visit the Sage Journals Solutions Portal.

You can view our complaints and appeals procedure.
