Preparing your manuscript for submission

Your article must be within the scope of the journal and be of sufficient quality. If not, it will not be reviewed. Please read the journal's [Aims and Scope](#) to see if your article is appropriate.

The manuscript must be your original work, you must have the rights to the work, and you must have obtained and be able to supply all necessary permissions for the reproduction of any copyright works not owned by you, including figures, illustrations, tables, lengthy quotations, or other material previously published elsewhere.

Article types

- Research Articles: only the research articles are refereed.
- Book Reviews: vary from number to number invariably guided by limits to the size of the manuscript

Full-fledged papers should preferably be of 10,000 words, including figures, tables and annexures. Brief write-ups may also be sent as Book Reviews.

Points to note:

- They should not be under consideration of any other publication at the time of submission.
- A soft copy in the MS-Word format as well as in the PDF file if it contains diacritical marks or passages in non-European languages, should be sent.

Formatting your manuscript

Accepted file types

The preferred format for your manuscript is Word. You do not need to follow a template, but please ensure your heading levels are clear, and the sections clearly defined.

Your article title, keywords, and abstract all contribute to its position in search engine results, directly affecting the number of people who see your work. For details of what you can do to influence this, visit [How to help readers find your article online](#).

Title

Your manuscript's title should be concise, descriptive, unambiguous, accurate, and reflect the precise contents of the manuscript. A descriptive title that includes the topic of the manuscript makes an article more findable in the major indexing services.

Abstract

Please include an unstructured abstract not exceeding 200 words between the title and main body of your manuscript that concisely states the purpose of the research, major findings, and conclusions. If your research includes clinical trials, the trial registry name and URL, and registration number must be included at the end of the abstract. Submissions that do not meet this requirement will not be considered.

Keywords

Please include a minimum of 4-7 keywords, listed after the abstract. Keywords should be as specific as possible to the research topic.

Manuscript Structure

The manuscript should be structured as follows:

- Cover page, showing title of the paper, name of author, author's affiliation and institutional address with pin code, email id and an abstract (set in italics) not exceeding 200 words. In case there are two or more authors, then corresponding author's name and address details must be clearly specified on the first page itself.
- Acknowledgements are also placed on the cover page
- Text should start on a new page, and must not contain the names of authors.
- References should follow the *Chicago Manual of Style*, in which all references are relegated to footnotes. Full publication details are to be given at the initial occurrence of citation. **Important note: There is no limit on the number of references allowed.**

Please Note: For each text citation there must be a corresponding citation (a note cue in this case) in the reference list and for each reference list citation there must be a corresponding text citation.

Tables should be provided in editable format. Both tables and figures should be referred to in the text by number separately (e.g., Table1) not by placement (e.g., see Table below).

Please Note: *All figures and tables should be cited in the text and should have the source (a specific URL, a reference or, if it is author's own work, 'The author(s)') mentioned irrespective of whether or not they require permissions.*

- Figures, including maps, graphs and drawings, should not be larger than page size. They should be numbered and arranged as per their references in the text. All photographs and scanned images should have a resolution of minimum 300 dpi and 1,500 pixels and their format should be TIFF or JPEG. Permissions to reprint should be obtained for copyright protected photographs/images.
- The language and spellings used should be British (UK), with 's' variant, for example, globalisation instead of globalization, labour instead of labor. For non-English and uncommon words and phrases, use italics throughout the text. Meaning of non-English words should be given in parentheses just after the word when it is used for the first time.
- Articles should use non-sexist and non-racist language.
- Spell out numbers from one to nine. However, for exact measurement (e.g., China's GDP growth rate 9.8 per cent) use numbers. Very large round numbers, especially sums of money, may be expressed by a mixture of numerals and spelled-out numbers (India's population 1.2 billion).
- Single quotes should be used throughout. Double quote marks are to be used within single quotes. Spellings of words in quotations should not be changed. Quotations of 45 words or more should be separated from the text.

- Notes should be numbered serially and presented at the end of each page as **footnotes**. Notes must contain references.
- Ibid. must be used in the footnotes.
- Use 'per cent' instead of % in the text. In tables, graphs, etc., % can be used. Use 'twentieth century', 'the 1990s'.
- Number ranges should be truncated, for example, 1800–89 and 1800–989.
- The initials must be separated by dots and spaces in case of proper nouns in the text.
- Abbreviations are spelled out at first occurrence. Very common ones (US, GDP, BBC) need not be spelled out.
- Website sources, that is, mere URLs with the last access date, as well as URLs (accompanied with titles) which do not have a year of publication can be retained in the footnotes. For example: "Barzani appoints Kosrat Rasoul as supreme leader of Peshmerga", Iraq Today, accessed October 15, 2017, <http://iraqtoday.com/ar/news/15266/>
- There is a choice for the use of diacritical marks for authors, though consistency is required. Italicised words can have diacritics as well. References in European languages other than English should be checked carefully for accents.

Artwork, figures, and other graphics

For guidance on the preparation of illustrations, pictures, and graphs in electronic format, please read Sage's [artwork guidelines](#).

All photographs and scanned images should have a resolution of minimum 300 dpi/1500 pixels and their format should be TIFF or JPEG.

Due permissions should be taken for copyright protected photographs/images. Even for photographs/images available in the public domain, it should be clearly ascertained whether or not their reproduction requires permission for purposes of publishing (which is a profit-making endeavour).

All photographs/scanned images should be provided separately in a folder along with the main article.

Please Note: *All figures and tables should be cited in the text and should have the source (a specific URL, a reference or, if it is author's own work, 'The Author') mentioned irrespective of whether or not they require permissions.*

Figures supplied in color will appear in color online.

Please ensure that you have obtained any necessary permission from copyright holders for reproducing any illustrations, tables, figures, or lengthy quotations previously published elsewhere. For further information including guidance on fair dealing for criticism and review, please see the [Frequently Asked Questions page](#) on the Sage Journal Author Gateway.

Title page

To ensure fair and anonymous peer review, your manuscript must be fully anonymized. Please ensure any identifying information is removed from the main manuscript document and included on the Title Page instead. Do not include any author names in the manuscript file name and remove names from headers and footers. This version of the manuscript **will** be sent to the peer reviewers. The Title Page **will not** be sent to peer reviewers. See the Sage Journal Author Gateway for [detailed guidance on making an anonymous submission](#).

The Title Page should include:

- Article title
- The full list of authors including names and affiliations of each
 - **The listed affiliation should be the institution where the research was conducted.** If an author has moved to a new institution since completing the research, the new affiliation can be included in a note at the end of the manuscript – please indicate this on the title page.
 - **All persons eligible for authorship must be included at the time of submission (please see the authorship section for more information).**
- Contact information for the corresponding author: name, institutional address, phone, email
- Acknowledgments section
- Declaration of conflicting interest
- Funding statement
- Ethical approval and informed consent statements
- Data availability statement
- Any other identifying information related to the authors and/or their institutions, funders, approval committees, etc, that might compromise anonymity.

Acknowledgments

If you are including an Acknowledgements section, this will be published at the end of your article. The Acknowledgments section should include all contributors who do not meet the criteria for authorship. Per [ICMJE recommendations](#), it is best practice to obtain consent from non-author contributors who you are acknowledging in your manuscript.

Writing assistance and third party submissions: if you have received any writing or editing assistance from a third-party, for example a specialist communications company, this must be clearly stated in the Acknowledgements section and in the covering letter. Please see the [Sage Author Gateway](#) for what information to include in your Acknowledgements section. If your submission is being made on your behalf by someone who is not listed as an author, for example the third-party who provided writing/editing assistance, you must state this in the Acknowledgements and also in

your covering letter. **Please note that the journal editor reserves the right to not consider submissions made by a third party rather than by the author/s themselves.**

Author contributions

You will be asked to list the contribution of each author as part of the submission process. Please include the Author Contributions heading within your submission after the Acknowledgements section. The information you give on submission will then show under the Author Contributions heading later at the proofing stage.

Statements and declarations

To ensure proper anonymization, please include a section with the heading 'Statements and Declarations' on your title page, after the Acknowledgements section [and Author Contributions section if applicable] including each of the sub-headings listed below. If a declaration is not applicable to your submission, you must still include the heading and state 'Not applicable' underneath. Please note that you may be asked to justify why a declaration was not applicable to your submission by the Editorial Office. This information will be added to the end of your published paper.

Ethical considerations

Please include your ethics approval statements under this heading, even if you have already included ethics approval information in your methods section. If ethical approval was not required, you need to explicitly state this. You can find information on what to say in your ethical statements as well as example statements on our [Publication ethics and research integrity policies page](#).

All papers reporting studies involving human participants, human data or human tissue must state that the relevant Ethics Committee or Institutional Review Board approved the study, or waived the requirement for approval, providing the full name and institution of the review committee in addition to the approval number. If applicable, please also include this information in the Methods section of your manuscript.

Consent to participate

Please include any participant consent information under this heading and state whether informed consent to participate was written or verbal. If the requirement for informed consent to participate has been waived by the relevant Ethics Committee or Institutional Review Board (i.e. where it has been deemed that consent would be impossible or impracticable to obtain), please state this. If this is not applicable to your

manuscript, please state 'Not applicable' in this section. More information and example statements can be found on our [Publication ethics and research integrity policies page](#).

Consent for publication

Submissions containing any data from an individual person (including individual details, images or videos) must include a statement confirming that informed consent for publication was provided by the participant(s) or a legally authorized representative. Non-essential identifying details should be omitted. Please do not submit the participant's actual written informed consent with your article, as this in itself breaches the patient's confidentiality. The Journal requests that you confirm to us, in writing, that you have obtained written informed consent to publish but the written consent itself should be held by the authors/investigators themselves, for example in a patient's hospital record. The confirmatory letter may be uploaded with your submission as a separate file in addition to the statement confirming that consent to publish was obtained within the manuscript text. If this is not applicable to your manuscript, please state 'Not applicable' in this section.

Declaration of conflicting interest

The journal requires a declaration of conflicting interests from all authors so that a statement can be included in your article. For guidance on conflict of interest statements, see our [policy on conflicting interest declarations](#) and the [ICMJJE recommendations](#).

If no conflict exists, your statement should read: 'The author(s) declared no potential conflicts of interest with respect to the research, authorship, and/or publication of this article'.

Funding statement

All articles need to include a funding statement, under a separate heading, **even if you did not receive funding**. You'll find guidance and examples on our [Funding](#) page.

Data availability

The Journal is committed to facilitating openness, transparency and reproducibility of research, and has the following research data sharing policy. For more information, including FAQs please [visit the Sage Research Data policy pages](#).

Subject to appropriate ethical and legal considerations, authors are encouraged to:

- Share your research data in a relevant public data repository

- Include a data availability statement linking to your data. If it is not possible to share your data, use the statement to confirm why it cannot be shared.
- Cite this data in your research

Reference style and citations

Additional notes

In the footnotes, *Ibid.* should be employed to avoid repetition of detailed references.

A superscript number (not symbol) should adjoin the piece of text being referred to. The numbering of the note cues should be in the Hindu-Arabic numerals: 1, 2, 3, etc.

In the footnotes, complete details of references should not be provided. All sources, primary and secondary, published or unpublished, should be referred to in an abbreviated form, followed by a colon and the precise page reference, if applicable.

Short titles should be capable of standing alone (e.g., Al-Azmeh, Muslim Kingship or Smits, 'Poets in Their Place').

If two or more references are cited in a single footnote, then the references should be separated by semi-colons (e.g., Rocher, "Lawyers" in Classical Hindu Law'; Mathur, Medieval Hindu Law: 201; Kane, History of Dharmashastra, vol. 3: 288–90.).

Only the surnames of the authors should be provided in the footnotes.

Contributors are advised to use the abbreviations 'bc' and 'ad' rather than 'bce' and 'ce' for years of the Christian/ Common Era.

Every in-text citation must have a corresponding citation in the reference list and vice versa. Corresponding citations must have identical spelling and year.

Authors should update any references to preprints when a peer reviewed version is made available, to cite the published research. Citations to preprints are otherwise discouraged.

Peer review policy

The following summary describes the peer review process for this journal:

Identity transparency: Double anonymized

Reviewer interacts with: Editor

Review information published: None

Your manuscript will undergo an initial evaluation. If it does not conform to the requirements laid out in these guidelines, it will be returned to you for amendments prior to peer review. Manuscripts may be desk rejected without peer review at this point if they are out of scope for the journal or otherwise unsuitable.

After passing the initial evaluation, your manuscript will then be peer reviewed. You can log in at any time to check the status of your manuscript. We will notify you when a decision has been reached.

The Medieval History Journal operates a strictly anonymized peer review process in which the reviewer's name is withheld from the author and, the author's name from the reviewer. Our standard policy practice is for both identities to remain concealed. Two independent reviews are required for a manuscript to reach a Revise or Accept decision.

To ensure the integrity of the peer review process we assign reviewers and cannot accept author recommendations.

All manuscripts are reviewed as rapidly as possible, while maintaining rigor. Reviewers make comments to the author and recommendations to the Editor who then makes the final decision on all manuscripts, including those appearing in a special issue or special collection. The Editor or members of the Editorial Board may occasionally submit their own manuscripts for possible publication in the Journal. In these cases, the peer review process will be managed by alternative members of the Board and the submitting Editor/Board member will have no involvement in the decision-making process.

[Read Sage's complete peer review policy.](#)

Plagiarism

The journal and Sage take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. [Please read Sage's complete policy on plagiarism and the actions we may take.](#)

After acceptance

Contributor's Publishing Agreement

Before publication, we require the author as the rights holder to sign a Journal Contributor's Publishing Agreement. Sage's Journal Contributor's Publishing

Agreement is an exclusive license agreement which means that the author retains copyright in the work but grants Sage the sole and exclusive right and license to publish for the full legal term of copyright. Exceptions may exist where an assignment of copyright is required or preferred by a proprietor other than Sage. In this case copyright in the work will be assigned from the author to the society. For more information please visit the [Sage Journal Author Gateway](#).

Production

Your Sage Production Editor will keep you informed as to your article's progress throughout the production process. Proofs will be made available to the corresponding author via our editing portal, Sage Edit, or by email, and should be returned promptly to avoid delaying publication. Authors are reminded to check their proofs carefully to confirm that all author information, including names, affiliations, sequence, and contact details are correct, and that Funding and Conflict of Interest statements, if any, are accurate. **This is the final opportunity to make changes to your manuscript. Further corrections will not be possible after publication. Changes to the author list are not permitted at this stage.**

Publication

OnlineFirst publication: This enables us to publish final articles online immediately, without waiting for assignment to a future issue of the Journal. This usually significantly reduces publication lead time. Visit the [Sage Journals help page for more details](#), including how to cite OnlineFirst articles.

Access to your published article: We provide you with online access to your published article. The online access link is provided to the corresponding author for sharing with their co-authors.

Promoting your article

Publication is not the end of the process. Between us, we can ensure that your article is found, read, downloaded and cited as widely as possible. Many of the most effective tactics are those you can do quickly and easily to your network of contacts and peers. Visit the [Promote Your Article](#) page on the Sage Journal Author Gateway for numerous resources to help you promote your work.
