Reproductive Sciences is a highly ranked and highly cited peer-reviewed forum for ground-breaking and seminal original research, reviews, editorials, and position papers in all aspects of basic reproductive biology and medicine and its translation to clinical medicine. Eight times a year, it covers a wide range of disciplines, including maternal-fetal medicine, obstetrics, gynecology, reproductive endocrinology, urogynecology, fertility/infertility, embryology, gynecologic/reproductive oncology, developmental biology, stem cell research, molecular/cellular biology and other related fields.

Reproductive Sciences invites professionals concerned with these and related areas to submit original articles, reviews, or topical issue proposals to the editor. The journal is particularly seeking original articles or reviews on

- Development
- Gamete biology
- Genetic diagnosis
- Sex steroid receptors
- Stem cells

More topics of interest can be found on the next page.

Reproductive Sciences is the official publication of the Society for Gynecologic Investigation (SGI) whose mission is the advancement of knowledge in reproductive biology and medicine.

For more detailed information about submitting a paper to Reproductive Sciences, please visit http://rs.sagepub.com and click on Manuscript Submission Guidelines.

SUBMIT YOUR ARTICLE ONLINE NOW WITH SAGETRACK!

SAGETRACK is a web based peer review and submission system powered by ScholarOne's® Manuscript Central™.

The entire process from article submission to acceptance for publication is now handled online by the SAGETRACK website. SAGETRACK’s graphical interface will guide you through quick and easy online submission with step-by-step prompts.

SAGETRACK makes it easy for you to:

- Submit your articles easily online
- Submit revisions and resubmissions through automatic linking
- Track the progress of your article online
- Publish your research faster with Reproductive Sciences!

A SAMPLE OF THE KIND OF ARTICLES YOU’LL SEE IN EVERY ISSUE

Identification of a Sensitive Period for Developmental Programming that Increases Risk for Uterine Leiomyoma in Eker Rats
Jennifer DeAnn Cook, Barbara J. Davis, Julia Alicia Goewey, Tia D. Berry, and Cheryl Lyn Walker

Orthostatic Stress Response During the Menstrual Cycle is Unaltered in Formerly Preeclamptic Women with Low Plasma Volume
Dorette A. Courtar, Marc E. A. Spaanderman, Ben J. A. Janssen, and Louis L. H. Peeters

Regulation of Endothelial-Dependent Relaxation in Human Systemic Arteries by SKCa and IKCa Channels
J. C. Gillham, P. N. Baker, J. E. Myers, and M. J. Taggart

Nutrient Restriction In Utero Induces Remodeling of the Vascular Extracellular Matrix in Rat Offspring
Omid Khorram, Mazdak Momeni, Mina Desai, and Michael G. Ross

Silencing of HPV 18 Oncoproteins with RNA Interference Causes Growth Inhibition of Cervical Cancer Cells
Jayanthi S. Lea, Noriaki Sunaga, Mitsuo Sato, Geetha Kalahasti, David S. Miller, John D. Minna, and Carolyn Y. Muller

Fetal Hypercapnia in High-Altitude Acclimatized Sheep: Cerebral Blood Flow and Cerebral Oxygenation
Takuji Tomimatsu, Jorge Pereyra Pena, and Lawrence D. Longo

More Topics of Interest

- Androgen action
- Breast disease
- Contraception
- Endometriosis
- Environmental hormones
- Extracellular matrix and signal transduction
- Fertilization
- Gonad function
- Implantation
- Infectious disease
- IUGR
- IVF
- Leiomyomata
- Male factor infertility
- Maternal-fetal medicine
- Mechanisms of preterm births
- Mechanotransduction
- Menopause
- Oncology
- Parturition
- PCOS
- Preeclampsia
- Pregnancy
- Regenerative medicine
- Reproductive embryology
- Reproductive genetics
- Reproductive physiology
- SERM and SPRM development
- Sex steroid hormone action
- Testis and prostate
- Urogynecology
