MEDIA KIT
Effective January 2013
Print publications provide the highest ROI of any individual medium
The most effective combination of media always includes print
If choosing only one medium, print provides the best return
Adding online increases overall media buy impact by as much as 33%
An integrated buy increases purchase intent by 56%
An integrated buy increases brand favorability by 60%

Ads in print publications seen and read more strongly than ever
Print ads still prompting reader action as high or higher than in previous years
- In 2010, 69% of readers reported that they saw a 1 pg/4C ad, up from 65% in 2006
- In 2010, 25% of readers actually read the ad, up from 23% in 2006
- In 2010, 34% of readers responded to ads or plan to respond, up from 27% in 2006
Ad location in publications has no discernable effect on readership of ad
Larger and color ads increase readership
- 30% more respondents read 1 page ads than ½ page ads
- 28% more respondents read 4/C ads vs. B/W ads
Content of ad more important than position

Advertisers reserving print and online together may take a 5% discount across the entire campaign.
ABOUT SLAS
The membership of SLAS comprises academic, industrial and government scientists, engineers and informatics professionals, and science and technology focused product development, marketing and sale specialists — all of whom share a common interest in advancing their understanding and expertise in laboratory technology and science. Members of the Society are scientists who conduct research and develop new technologies to increase productivity, elevate data quality, reduce lab process cycle times or enable experimentation that otherwise would be impossible.

SLAS has a strong presence in the scientific market segment of drug discovery, including the disciplines of drug discovery testing (library management, screening, assay development, data management, automation, etc.), system integration and miniaturization technologies.

SLAS has a moderate to small presence in the (listed alphabetically) clinical diagnostics, consumer products, drug development, food and agriculture, forensics and security, and energy and petrochemical segments; and in the disciplines of bioanalytical testing, biological sampling techniques, pharmacological testing, informatics, molecular diagnostics, process analytical technology, and scientific imaging technology.

Within SLAS there are two membership sections (areas of primary interest). Some members belong to one; some members belong to both.

- **Biomolecular Sciences Section**
  This section serves to advance SLAS with respect to the science and technology of drug discovery and the use and development of biomolecular screening technology.

- **Laboratory Automation Section**
  This section serves to advance SLAS by furthering science and education related to laboratory automation, and in particular by encouraging and advancing the study and improving the practice of laboratory automation.

ABOUT THE JOURNALS
The *Journal of Biomolecular Screening* (JBS) is the leading peer-reviewed journal focusing on drug discovery sciences. JBS publishes information that enables researchers to evaluate current technologies and incorporate applications to enhance performance and objectives. Manuscripts and editorial commentary emphasize scientific and technical applications and advances in target identification/validation; lab automation and robotics; high-throughput screening (HTS); lead generation/optimization; virtual screening, chemoinformatics; diagnostic assays; assay development; assay technologies (novel applications, comparisons); data/image analysis, statistics and information technologies/methods; high content screening, imaging platforms; sample management (library design, compound logistics, chemical diversity); biological reagent production, characterization and management for drug discovery (cell lines, stem cells, surrogate tissues/species [xenopus, zebrafish, yeast]); genomic, proteomic screening; biomarkers; high throughput approaches to PK, ADME and predictive toxicology; legal, licensing issues.

JBS Manuscript abstracts are indexed by MEDLINE, Biomolecular Interaction Network Database (BIND), BIOSIS database, BIOSIS Previews, Biotechnology Citation Index, Chemical Abstracts, Current Contents: Life Sciences, Elsevier BIOBASE/Current Awareness in Biological Sciences, EMBASE/Excerpta Medica, EMiology, Index Medicus, Prous Science Integrity, Science Citation Index Expanded (Web of Science), and Scopus.

**FREQUENCY:** 10 TIMES/YEAR

The *Journal of Laboratory Automation* (JALA) is a multi-disciplinary international forum devoted to the advancement of technology in the laboratory. It is an official, peer-reviewed journal of the Society for Laboratory Automation and Screening, and provides a unique forum for the presentation of method-focused scientific papers and related news and product announcements.

JALA authors, readers and reviewers are academic, commercial and government researchers, scientists and engineers who conduct research and develop new technologies to increase productivity, elevate data quality, reduce lab process cycle times or enable experimentation that otherwise would be impossible.

JALA manuscript abstracts are indexed by MEDLINE, Analytical Abstracts, Biological Abstracts, BIOSIS Previews, Chemical Abstracts (CAS+), CINAHL, Compendex, EMBASE / Excerpta Medica, Google Scholar, Inspec, Journal Citation Reports/Science Edition, Proquest CSA Technology Research Database, Science Citation Index Expanded (also known as SciSearch), SciFinder, Scirus, and Scopus.

**FREQUENCY:** 6 TIMES/YEAR
MEMBERSHIP DEMOGRAPHIC

Other demographics for the entire SLAS membership
- 69% are from the U.S. and Canada / 31% are from throughout the rest of the world
- 47% have doctorate degrees / 17% have master degrees / 22% have bachelor degrees
- Top 3 fields/areas of interest identified include liquid handling (30%), pharmacogenomics (22%) and information technology for the laboratory (11%).
- Top 2 work sectors identified include drug development (44%) and technology provider or integrator (39%).
- Top 5 job titles identified include scientist/engineer/researcher (31%), manager/dept. head (9%), president/ceo (8%), administrative (8%) and vice president (5%).

WHAT DO SLAS MEMBERS PURCHASE?

Readers make significant annual investments in technology (particularly automated systems, robotics, instrumentation, hardware, software and labware) that support automated research initiatives in their laboratories. Note that in many cases, suppliers who design and develop solutions and need to reach this market also are scientists and active members of SLAS.

Insertions made after the printed space reservation deadline are non-cancelable.

If artwork cannot be provided by the above deadlines or an extension approved by the publisher, then the publisher will run the most recent artwork submitted. If no artwork is on hand, then the advertiser will still be responsible for payment on the space reserved.

HIGH-IMPACT PRINT ADVERTISING

- Cover tips - An exclusive way to place your message front and center with each journal reader. Your ad would attach to the front of the journal with removable glue. The reader would therefore not have to remove your ad to open the journal.
- Belly Bands - Another exclusive visibility option. Your ad would wrap around the entire journal.
- Outserts - Include your product brochure in the polybag of each mailed issue and get it right into the hands of the readers

Please contact your representative for pricing and details on any of these options. Samples must be provided.

- All artwork is subject to review/acceptance by publisher prior to placement.
- Third party ad tags accepted

HIGH-IMPACT ONLINE ADS

Expandable ads, roadblocks and other rich media ads may be available. Please contact us for availability.
MOBILE WEBSITE
Each SAGE journal’s website has a complementary mobile website, optimized for smaller mobile screens.

Please contact your sales representative for more information about advertising opportunities.

MOBILE APPLICATION
Please contact your sales representative for more information about advertising opportunities.

MICROSITES
SAGE offers our industry partners the opportunity to collaborate with us in the development of microsites on specific topics pertinent to their businesses and product lines.

These sites will become destination sites for any practitioners seeking information on the specific topic.

Information included on the microsites:
- The most relevant journal content from all of SAGE’s journals
- Feature article highlighted
- Links and related content provide by the sponsor
- "About the Sponsor" section
- Leaderboard banner for the sponsor

SAGE will host and update the site, which will be fully linkable to the sponsor’s site and the related SAGE journal sites.

This is an excellent opportunity to drive traffic to your own corporate or product sites while branding your company as the leader in that specific topic.

Please contact your sales representative for more information.

ELN - www.ELN.SLAS.ORG

The SLAS Electronic Laboratory Neighborhood (ELN) is a popular and highly regarded online news magazine. This “people focused and people sourced” e-zine is offering an exclusive sponsorship opportunity. Join the laboratory science and technology community at the SLAS ELN. Contact your sales representative for additional information.

SLAS DAILY NEWS
Stay connected with all SLAS members and conference attendees during the Annual Meeting! SLAS Daily News will be the only e-newsletter that conference participants will be reading on-site. Delivered each morning, this vital communication tool will provide information on conference highlights and events, announcements, schedule-at-a-glance, meeting planners, exhibitor showcase, social networking, photos, and much more. Contact your sales representative for sponsorship opportunities.

ARTICLE REPRINTS, E-PRINTS, TRANSLATED REPRINTS
Reprints of articles discussing specific products, therapies, or topics related to your company serve as excellent marketing support materials for conference hand-outs, collateral sales materials, and direct mail pieces.

SAGE can also provide e-prints of articles to post to your website, intranet, or to distribute via email.

SAGE can also arrange for translation of reprints into the local language of your target audience.

SUPPLEMENTS
Peer-reviewed journal supplements provide you with a credible, objective means to publish themed articles on topics related to your company’s business.

Supplements mail with the regular issues of the journal to the entire readership and are also posted online. You may include a Continuing Education component to enhance value.

All supplement topics need to be pre-approved by the editor, and all articles must undergo peer review.

TRANSLATED REGIONAL EDITIONS
Partner with us to produce regional editions based on select journal articles translated to the local language in the geographic region of your choice.

SPONSORED SUBSCRIPTIONS
Target the mailing list of your choice by sponsoring subscriptions to the journal.

SPONSORED COLLECTIONS
Industry partners may choose 5-20 articles from JBS or JALA on a specific topic related to their business. SAGE will then host open access links to these articles on a dedicated landing page within the journal site. This is an excellent way to create educational partnership between your target audience and your company.
ELECTRONIC TABLE OF CONTENTS (E-TOC) ALERT SPONSORSHIPS

Single sponsorships are available for every issue of the e-TOC alert, which is delivered to 20,000+ SLAS members, e-members, and opt-in subscribers prior to each print issue mailing. Subject to Society approval.

Live matter: ¼” from trim
Linescreen: 133-150

REQUIREMENTS FOR ELECTRONIC DELIVERY:

General Instructions:
A High Resolution Press-Ready PDF is required for all electronic ad submissions. All fonts must be embedded. Minimum required image resolution is 300 dpi for color or grayscale images and 900-1200 dpi for line art (1-bit) images. All color files must be created and submitted to publisher in CMYK color mode. Publisher will convert ads submitted in RGB but is not responsible for color reproduction on these ads. 2-color ads (standard) must be provided as black plus 100% cyan, magenta, or yellow.

Image Size/Crop:
Digital art files should be cropped to remove non-printing borders. Art should be created or scaled to the size intended for print. Image orientation should be the same as intended for print. For ads that are intended to run off the page, a 1/8” minimum bleed is required on all sides.

Proof Instructions:
• Color Ads: An identifiable SWOP-certified proof (Specifications Web Offset Publications—www.swop.org) must be supplied with the final digital file. If a SWOP-certified proof is not supplied, then the publisher cannot guarantee correct reproduction of color. Any omissions or color deviation from a submitted proof, other than a SWOP-compliant proof, will not warrant compensation to the advertiser.
• B&W Ads: A hard-copy proof the same size as the digital art must be supplied with the final digital file.

File Submission Instructions:
Please supply files on one of the following media: CD-ROM or e-mail. Please include a SWOP-certified proof with your digital submission. If e-mailing artwork, then send the proof in a separate package in the mail.

BIND-IN CARDS AND INSERTS:
All bind-in cards and inserts are jogged to the head. All bind-in cards and inserts must have 1/8” trim beyond the crop mark area of the Head, Foot, Gutter and Face of the advertisement. Perforations must be 3/8” from gutter.

For inserts, 70# coated stock is the minimum weight and 110# coated stock is the maximum.

POSTAL REQUIREMENTS OF BUSINESS REPLY CARDS:
Final size of all BRCs must be 4 ¼” h x 6” w. Minimum paper weight is 7 pt. Recommended stock is 75# hibulk. It meets the requirements set forth by the USPS for reply cards.

Publisher is not responsible for any errors in reproduction if artwork is not provided according to the above specifications.
