Editorial Scope & Priority

Academic Pathology is the official journal of the Association of Pathology Chairs, a non-profit organization which was founded in 1967 to provide leadership and advocacy for the dynamic discipline of Pathology and to enable academic departments to meet the demands of their three missions - medical education, research and practice.

Academic Pathology seeks to build the scholarly evidence base for the future performance and success of academic pathology. This journal will publish original articles, reviews and commentaries that address the performance of Pathology and Laboratory Medicine in the core missions of education, clinical practice and research, as supported by knowledge in business practice, management and administration, policy, innovation, and leadership. Contributions should reflect the best practices of Pathology and Laboratory Medicine as a dynamic 21\textsuperscript{st} century discipline.

Manuscripts will be evaluated as suitable for the journal by the Editor-in-Chief and Associate Editors. All suitable manuscripts will be rigorously peer reviewed for relevance and quality. Priority will be given to articles that address any of the following:

1. Methods or infrastructure that advance pathology and clinical laboratory practice quality and improve patient care, including clinical informatics, genomic testing and data management, laboratory automation, electronic health record (EHR) integration, and annotated biorepositories;
2. Best practices in cost-effective multidisciplinary and/or inter-professional clinical partnerships that add demonstrated value to patient care;
3. New and effective pedagogical approaches to undergraduate and graduate medical education in Pathology; including curricula and practice settings designed to enhance resident and fellowship training;
4. Evaluative methods for reaching objective teaching goals, such as competencies and milestones;
5. Models for training and sustaining academic pathologists, including clinician scientists in Pathology;
6. Methods for enhancing extramural support for basic, translational, and/or clinical outcomes research in Pathology;
7. Administrative and organizational models that best promote academic pathology's clinical, educational, and research missions;
8. Business practices that advance the ability of academic pathology to serve its three missions, including access to regional or national markets; effective service to home institutions; and best-practices in business and operational performance.

Editorial Policies

Open Access Policy: Academic Pathology is an Open Access publication, which has no subscription barriers to viewing the full content of the journal. All articles are rigorously peer-reviewed, and brought to publication as rapidly as possible. All articles are freely available online immediately upon completion of production. Production costs are covered by the Article Processing Fee (APF) paid by the author/institution/funder upon acceptance of their manuscript. There is no charge for submitting a manuscript for consideration to Academic Pathology.

Open Access Fee: Upon acceptance of a manuscript for publication, the corresponding author will be invoiced for a one-time Article Processing Fee (APF), which must be paid prior to production. This fee covers the costs of publication and enables the Open Access Policy to be sustained. The average time from acceptance to publication is 25 business days, including author and editor proofreading. For Academic Pathology, the APF is $1,250 for APC members and $1,950 for non-members. APC membership dues must be current at the time of acceptance for the member rate to apply. For solicited reviews and commentaries, the APF will be waived by the Editor-in-Chief and authors will be informed of this waiver in the solicitation letter. Periodic discounts on the APF will be offered by the publisher (SAGE) and the association (APC). For information, contact the Executive Editor.
**Editorial Style:** Academic Pathology follows the style conventions set forth in the 10th Edition of the American Medical Association Manual of Style (see [http://www.amamanualofstyle.com/](http://www.amamanualofstyle.com/)). Exceptions to the AMA style will be granted in production for references that do not include volume numbers for journal articles.

**Research Ethics & Randomized Controlled Trials:** All papers submitted for consideration to Academic Pathology that report animal and human studies must include notification of whether written consent was obtained from the local Ethics Committee or Institutional Review Board. If consent was obtained, the full name and institution of the IRB or an Ethics Committee reference number must be provided on the Title page. When reporting on animal studies, authors should indicate on the Title Page which guideline/law on the care and use of laboratory animals was followed. The editors of Academic Pathology recommend that all randomized controlled trials submitted for publication include a completed Consolidated Standards of Reporting Trials (CONSORT) flow chart (see [http://www.consort-statement.org](http://www.consort-statement.org)). Further, clinical trials should be registered at a public trials registry, such as [http://clinicaltrials.gov](http://clinicaltrials.gov), at or before the onset of patient enrollment. The clinical trial registration number should be included at the end of the Abstract of the article. In general, Academic Pathology has adopted the International Committee of Medical Journal Editor’s (ICMJE) January 2014 Guiding Principles for the Development of Policies on Sharing Clinical Trials Data (see [http://www.icmje.org/news-and-editors/principles_data_sharing_jan2014.html](http://www.icmje.org/news-and-editors/principles_data_sharing_jan2014.html)). For article submission purposes, a clinical trial is defined as any research project that prospectively assigns human subjects to intervention or comparison groups to study the cause-and-effect relationship between a medical intervention and a health outcome. Studies designed for other purposes, such as to study pharmacokinetics or major toxicity (e.g. phase I trials), would be exempt.

**Authorship Criteria:** Academic Pathology follows the authorship criteria set forth by the International Committee of Medical Journal Editors, Uniform Requirements for Manuscripts Submitted to Biomedical Journals. Please refer to the ICMJE’s December 2013 authorship guidelines (see [http://www.icmje.org/icmje-recommendations.pdf](http://www.icmje.org/icmje-recommendations.pdf)).

**Prior to Submission:** Papers should only be submitted for consideration once the authorization of all contributing authors has been gathered. Corresponding authors who are submitting papers should carefully check that anyone whose work contributed to the paper are acknowledged as contributing authors and that all contributing authors approved the version to be reviewed or published. When a large, multicenter group has conducted the work, the group should identify the individuals who accept direct responsibility for the manuscript. These individuals should fully meet the criteria for authorship. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship, although all contributors who do not meet the criteria for authorship should be listed in the Acknowledgments section.

**Permissions:** Authors are responsible for obtaining permission from copyright holders for reproducing any illustrations, tables, figures or lengthy quotations previously published elsewhere. If an author is using their own work they will still require permission, if they did not retain copyright of the previously published article. Papers will not be accepted for publication without the correct permissions. For further information including guidance on fair dealing for criticism and review, please visit Frequently Asked Questions on the SAGE Journal Author Gateway.

**Following Publication:** Academic Pathology and SAGE take issues of copyright infringement, plagiarism or other breaches of best practice in publication very seriously. SAGE seeks to protect the rights of our authors and always investigates claims of plagiarism or misuse of articles published in the journal. Equally, SAGE seeks to protect the reputation of the journal against malpractice. Submitted articles may be checked using duplication-checking software. Where an article is found to have plagiarized other work or included third-party copyright material without permission or with insufficient acknowledgement, or where authorship of the article is contested, SAGE reserves the right to take action including, but not limited to: 1) publishing an erratum or corrigendum (correction); 2) retracting the article (removing it from the journal); 3) taking up the matter with the head of department or dean of the author’s institution and/or relevant academic bodies or societies; or 4) banning the author from publication in the journal or all SAGE journals, or appropriate legal action.
Manuscript Preparation

Manuscript Types & Components:

Review Articles should contain the Title page, Abstract and Key Words, Introduction, section headings, Acknowledgements (if any), Sources and Manufacturers (if any), Declaration of Conflicting Interests, Funding, References, Tables (if any), and Figure Legends (if any). Review articles should have appropriate section headings and subheadings chosen by the author.

Regular Articles (e.g. Research Article, Innovation Report, Management Report, Education Report, Clinical Report) should contain the Title page, Abstract and Key Words, Introduction, Materials and Methods, Results, Discussion, Acknowledgements (if any), Sources and Manufacturers (if any), Declaration of Conflicting Interests, Funding, References, Tables (if any), and Figure Legends (if any). Introduction and Discussion should not contain any subheads.

Brief Reports and Case Studies should contain the Title page, Abstract and Key Words, body of the manuscript (no section or subheadings), Acknowledgements (if any), Sources and Manufacturers (if any), Declaration of Conflicting Interests, Funding, References, Tables (if any), and Figure Legends (if any).

SAGE Language Services: Authors who would like to refine the use of English in their manuscripts might consider using SAGE Language Services, which provides editing; manuscript formatting; and translation for Chinese, Portuguese, and Spanish for a modest fee. For information about SAGE Language Services, see http://www.sagepub.com/journalgateway/engLang.htm. Please note that SAGE Language Services is an editing service only, and using the service will in no way guarantee that your manuscript will be selected for peer review or accepted for publication. Journal editors independently assess manuscripts submitted for publication based on the quality and appropriateness of a manuscript for the journal, and their editorial evaluation will not consider whether or not a manuscript has been edited through SAGE Language Services.

Title, Keywords & Abstract: The title, keywords and abstract are key to ensuring readers find the article online through online search engines such as Google. Please refer to the information and guidance on how best to title the article, write the abstract and select the keywords by visiting SAGE’s Journal Author Gateway Guidelines on How to Help Readers Find Your Article Online. The abstract should consist of no more than 250 words summarizing the contents of the article. Please do not subdivide, e.g. Background, Aim, Results, Conclusion, or similar. The abstract must stand alone, and it should be presumed that the reader has some knowledge of the subject but has not read the paper. Abbreviations and reference citations must not be used in the abstract. For online search purposes, provide an alphabetical list of key words or phrases not to exceed 80 characters (including spaces). Key words should appear directly below, and on the same page as, the abstract. In the title, abstract and keywords, abbreviations should be spelled out.

Title Page: The title page should give the following information: (1) title of the article (in bold) and a short running title not to exceed 60 characters (including spaces), without abbreviations; (2) one full first name, initials (if applicable) and full last name of each author; (3) address of the department or institution to which the work should be attributed; (4) name, telephone, fax number and email address of the author responsible for correspondence and to whom the proofs should be sent.

Acknowledgements: All contributors who do not meet the criteria for authorship should be listed in the ‘Acknowledgements’ section. Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Authors should disclose whether they had any writing assistance and identify the entity that paid for this assistance.
Sources and Manufacturers: Trade names for commercial test kits, equipment, chemicals, etc., should not be included in the text but should be listed in full with the appropriate text citation in the Sources and Manufacturers section. Generic names of drugs should be used in the text. In the text, sources should be designated by superscript lowercase letters in sequential order. Under the Sources and Manufacturers heading, sources (including manufacturer’s name, city, state, and country if other than the U.S.) should be cited in a lettered list to correspond to superscript letters in the text.

Declaration of Conflicting Interests: It is the policy of Academic Pathology to require a declaration of conflicting interests from all authors and for any conflicts to be disclosed in the published article. Please include any declaration at the end of the manuscript after any acknowledgements and prior to the references, under a heading ‘Declaration of Conflicting Interests’. Authors who have no conflicts should state “The author(s) declared no potential conflicts of interest with respect to the research, authorship, and/or publication of this article.” When making a declaration, the disclosure information must be specific and include any financial relationship that all authors of the article has with any sponsoring organization and the for-profit interests the organization represents, and with any for-profit product discussed or implied in the text of the article. Any commercial or financial involvements that might represent an appearance of a conflict of interest need to be additionally disclosed in the cover letter accompanying the article to assist the Editor in evaluating whether sufficient disclosure has been made within the Declaration of Conflicting Interests provided in the article. Such information will not alter established editorial and review policies, but will assist the editorial staff in avoiding any potential conflicts that could give the appearance of a biased review. For more information please visit the SAGE Journal Author Gateway.

Funding Acknowledgements: To comply with the guidance for research funders, authors and publishers issued by the Research Information Network (RIN), Academic Pathology additionally requires all authors to acknowledge their funding in a consistent fashion under a separate heading. Please visit Funding Acknowledgement on the SAGE Journal Author Gateway for funding acknowledgement guidelines. Where no specific funding has been provided for the research, the authors may include the following sentence: “The author(s) received no financial support for the research, authorship, and/or publication of this article.”

Citations and References: Academic Pathology manuscripts must be prepared in accordance with the 10th Edition of the American Medical Association (AMA) Manual of Style. The authors are responsible for the accuracy of the references. Only published material or accepted manuscripts should be listed in references. URLs, personal communications, unpublished observations, dissertations, abstract-only citations, meeting/conference/workshop proceedings, and citations from other non-refereed publications are not acceptable references; they must be cited in the text within parentheses. In general, meeting proceedings and citations from other non-refereed publications should be avoided. References should be double-spaced and cited in the text in the order of appearance. Examples of reference style are below.

Book:

Chapter:

Journal:

Tables: Tables should appear on separate pages following the References. The table title should appear directly above the table. Tables must be numbered consecutively with Arabic numerals, and must be cited consecutively in
the text. They should be self-explanatory and should supplement, rather than duplicate, the material in the text. All abbreviations must be spelled out using table footnotes. References to footnotes should be indicated by the following sequential symbols (*, †, ‡, §, ¶, †, ‡, **).

**Figure Legends:** Legends should appear on a separate page following the tables, and should be cited consecutively in the text. Legends must be submitted for all figures. They should be brief and specific, and they should appear on a separate manuscript page place to follow the references. Identify histological stains and indicate the magnification on electron micrographs with a scale bar in the figure and an explanation in the legend (e.g., Hematoxylin and eosin. Bar = 20 μm.).

**Figures:** For guidance on the preparation of illustrations, pictures and graphs in electronic format, please visit SAGE’s [Manuscript Submission Guidelines](http://mc.manuscriptcentral.com/APC). Figures must NOT be embedded in the text of the manuscript. Figures should be cited and numbered in the order in which they are discussed in the text of the manuscript. Figures should be saved as separate files with the figure number (Fig 1, Fig 2, Figs 3-5, etc.) as the file name. Figure numbers and/or titles should not appear as part of the image. Art should be created/scanned and saved and submitted only in the formats: TIFF (tagged image file format), EPS (encapsulated PostScript) or PPT (PowerPoint). Please note that artwork generated from office suite programs such as CorelDRAW and MS Word and artwork downloaded from the Internet (JPEG or GIF files) cannot be used. Line art must have a resolution of at least 1200 dpi (dots per inch), and electronic photographs; radiographs, CT scans, MRIs, all medical imaging, and all scanned images must have a resolution of at least 300 dpi. If fonts are used in the artwork, they must be converted to paths or outlines or they must be embedded in the files. Color images must be created/scanned and saved and submitted as CMYK files. Figures should be submitted UN-flattened to allow for editing if needed. Black and white figures should be saved as Grayscale.

**Manuscript Submission**

Before submitting a manuscript, please carefully read and adhere to all the guidelines and instructions to authors provided below. Manuscripts not conforming to these guidelines may be returned without review.

Manuscripts submitted to *Academic Pathology* (APC) may not be under consideration for publication at any other journal at the time of submission and, following submission to APC, may not be submitted for publication to ANY other source pending official, written notification of the final decision by the editors of APC. Submission to APC indicates that this is the authors’ primary choice for publication and APC retains sole publication rights until a final publication decision is made.

Submissions to *Academic Pathology* are received at [http://mc.manuscriptcentral.com/APC](http://mc.manuscriptcentral.com/APC), which is part of the SAGE Track web-based online submission and peer review system, customized on ScholarOne’s Manuscript Central platform. For assistance in using the system, please go to [http://mchelp.manuscriptcentral.com/GetHelpNow/](http://mchelp.manuscriptcentral.com/GetHelpNow/) or contact the Managing Editor. Some brief starting instructions for original submissions follow:

- Go to the SAGE Track home page at: [http://mc.manuscriptcentral.com/APC](http://mc.manuscriptcentral.com/APC).
- If you have previously submitted or reviewed a manuscript using SAGE Track, use your User ID and Password to log in.
- If you have forgotten your User ID and Password, enter your e-mail address to receive an e-mail with your account information.
- If you are not registered, click on the “Create Account” tab in the upper right-hand corner of the home page and follow the on-screen instructions.
- Click on the Author Center, find the button and click to submit a new manuscript, then follow the on-screen instructions. It is useful to have the original text file open so that you can copy and paste into the required fields. You can provide e-mail addresses for up to 20 of your co-authors. Please note: The system only allows up to 20 accounts per manuscript. While SAGE Track only allows you to list 20 authors, this does not have any bearing on the number of authors you may list on your title page. The system will
create accounts for the co-authors you list, thereby allowing them to log in and check the manuscript status.

- If at any step you need to stop the submission process, click on the “Main Menu” link. Everything you have typed into the system will be saved, and the partially completed submission will appear under “Unsubmitted Manuscripts” in your “Author Center.” To return to the submission process you will need to click on the “Continue Submission” button next to the relevant manuscript title.

For File Upload:
- Enter individual files using the Browse button.
- Select the appropriate File Designation type (e.g., Main Document, Figure) from the pull-down menu. Choose Main Document for your manuscript text file. Choose Figure for all illustrations; a confirmation window will appear and you will be prompted to provide a File Tag and a Figure legend for each figure. The File Tag should be Figure 1, Figure 2, etc. Cut and paste the figure legend from your text file. If you do not want a document to be included as part of the consolidated PDF used for peer review, please designate it as a Supplementary File.
- Upload your files by clicking on Upload Files. This may take several minutes. Repeat these steps until you have uploaded all your files.
- Once you have uploaded all files, indicate the Order in which they should appear in your paper using the drop-down menu to the left of the file names. Then click Save.
- Click on PDF to view your files in PDF format. This PDF will be used for peer review.
- If the files have not uploaded to your satisfaction, click Save and Go Back to return to the file upload screen where you can remove or redo the order of the files, and repeat the upload process.
- When you are satisfied with the PDF, click Save and Continue. SAGE Track will check that you have completed all the mandatory fields and that you have viewed the PDF. It will also present you with a summary of all the information you have provided and give you a final chance to edit it. When you have finished reviewing this information click Submit.
- After the manuscript has been submitted you will see a confirmation screen and receive an e-mail confirmation stating that your manuscript has been successfully submitted. This email will include the assigned manuscript number that will be used in all correspondence. If you do not see a confirmation screen and/or receive a confirmation e-mail, your manuscript has not been successfully submitted to the Journal and cannot progress to peer review. If this is the case, your manuscript will appear in the “Unsubmitted Manuscripts” section of your “Author Center” awaiting your attention. Please contact SAGE Track’s customer support (434-817-2040, ext. 167) or the Managing Editor if you encounter problems submitting your manuscript.
- If you return to the Author Center, click on Submitted Manuscripts to the left of your screen. Find your manuscript title, and locate the Status section. This provides information on your manuscript as it moves through the review process.

**Following Acceptance for Publication**

**Contributing Author Agreement:** Before publication, SAGE requires the corresponding author as the rights holder to sign a Journal Contributor’s Publishing Agreement. *Academic Pathology* publishes articles under Creative Commons licenses. The standard *Academic Pathology* license is Creative Commons by Attribution (CC BY), which allows others to re-use the work without permission as long as the work is properly referenced. For more information, visit SAGE’s Open Access licenses page. Alternative license arrangements are available, for example, to meet particular funder mandates, made at the author’s request. To discuss obtaining an alternative license, please contact the Managing Editor.

**Proofs:** SAGE will email a PDF of the proofs to the corresponding author. Any accompanying queries should be answered as soon as possible, so that publication is not delayed.
E-Prints: The final version PDF of the article will be available for download on the journal website after publication and may be used by the authors (without restriction, except as outlined in the Creative Commons License) to produce author e-prints.

Further Information: Any correspondence, queries or additional requests for information should be sent to the following:

Editor-in-Chief: James M. Crawford, MD, PhD – jcrawford1@nshs.edu
Managing Editor: Jennifer Norman, MEd – jnorman@apcprods.org
Executive Editor: Priscilla Markwood, CAE – pmarkwood@apcprods.org
